WINTER TEETH

There's more toothache in early winter than any other part of the year-mostly because neglect has been possible in the season just before. When the first chill wind of winter gets into a tooth cavity, it will point out the fact that a filling is needed in a manner that will not encourage further neglect. We make sound, weather-proof teeth by treating and filling your defective teeth, absolutely without pain, by our own methods. and have your teeth examined,
