The Christian View of Death as the Entrance to a Fuller Life is Presented in This Easter Sermon by Dr. Talmage.

WASHINGTON, March 30. - The Christian view of death as the entrance to a fuller life is presented in this Easter discourse by Dr. Talmage from the text 1 Cor. xv. 54, "Death is swallowed up in victory."

About 1,870 Easter mornings have

three centuries the almanacs made the year begin at Easter until Charles IX. made the year begin at Jan. 1. In the Tower of London there is a royal pay roll of Edward I., on which there is an entry of 18 pence for 400 colored and pictured eggs, with which the people sported. In Russia slaves were fed and alms were distributed on Easter. Ecclesiastical councils met in Pontus, in Gaul, in Rome, in Achaia, to decide the particular day, and after a controversy more animated than gracious decided it, and now through all Christendom in some way the first Sunday after the full moon which happens upon or next after March 21 is filled with

Easter rejoiding. The royal court of the Sabbaths is made up of fifty-two. Fifty-one are princes in the royal household, but Easter is queen. She wears richer diadem, she sways a more jeweled sceptre, and in her smile nations are irshe seems to step out of the snow bank rather than the conservatory, to lest of us into con south, out of the arctic rather than the tropics, dismounting from the icy equinox, but welcome this queenly day, holding high in her left hand the key

to all the cemeteries in Christendom: My text is an ejaculation. It is spun out of hallelulahs. Paul wrote right on in his argument about the resurrection and observed all the laws of logic, but when he came to write the words of the text his fingers and his pen and the parchment on which he wrote took fire, and he cried out, "Death is swallowed up in victory!" It is an exciting thing to see an army routed and flying. They run each other down. They scatter everything valuable in the track. Unwheeled artillery; hoof of horse on breast of wounded and dying man. You have read of the French falling back from Sedan, of Napoleon's track of 90,000 corpses in the snowbanks of Russia, of the retreat of our armies from Manassas or of the five kings tumbling over the rocks of Bethhoran with their armies while the hailstorms of heaven and the swords of Joshua's host struck them with their

CHARGE OF THE BLACK GIANT. In my text is a worse discomfiture. It seems that a black giant propsed to conquer the earth. He gathered for his host all the aches and pains and malarias and cancers and distempers and epidemics of the ages. He marched them down, drilling them in the and them down, driving them is the sush of tempests. He threw up barricades of grave mound. Some of the troops marched with slow tread commanded gladsome, transcendent, magnificent, and the sush of by con commanded by pneumonia. Some he took by long besiegement of evil habit and some by one stroke of the battleaxe of casualty. With bony hand he pounded at the door of hospitals and sickrooms and won all the victories in all the great battlefields of all the five continents. Forward, march! ordered the conqueror of conquerors, and all the generals and commanders-in-chief and all presidents and kings and sul-tans and czars dropped under the feet of his war charger. But one Christmas night his antagonist was born. As most of the plagues and sicknesses and despotisms come out of the east, it was appropriate that the new conqueror should come out of the same quarter. Power is given him to awaken all the fallen of all the centuries and of all lands and marshal them against the black giant. Fields have already been won, but the last day of the world's existence will see the decisive battle. When Christ shall lead forth his two brigades, the brigade of the risen dead and the brigade of the

death shall be swallowed up in vic-The old braggart that threatened the conquest and demolition of the planet has lost his throne, has lost his sceptre, has lost his palace, has lost his prestige, and the one word written over all the gates of mausoleum and catacombe and necropolis, on cenotaph and sacrophagus, on the lonely khan of the Arctic explorer, and on the catafalque of great cathedral, written in capitals of azalia and calla lily, written in musical cadence, written in doxplogy of great assemblages, written on the sculptured door of the family vault, is "Victory." Coronal word, emban-pered word, apocalyptic word, chief word of triumphal arch under which

celestial host, the black giant will fall

back and the brigade from the riven

sepulchres will take him from beneath

and the brigade of descending immor-

tals will take him from above, and

conquerors return. ROUT OF THE KING OF TERRORS Victory! Word shouted at Culloden and Balaklava and Blenheim, at Me-giddo and Solferno, at Marathon, where the Athenians drove back the Medes: at Poitiers, where Charles Martel broke the ranks of the Sarcens; at Salams, where Themistocles in the great sea fight confounded the Persians, and at door of the eastern cavern of chiseled rock where Christ came out king of terror and put him back in the niche from which the celestial Con-queror had just emerged. Aha! When the jaws of the eastern mausolem took down the black giant "death was swallowed up in victory." I proclaim

the abolition of death.

The old antagonist is driven back into mythology with all the lore about Stygian ferry and Charon with oar and Melrose abbey and Kenilworth castle are no more in ruins than is the do with death than we have with the

dent's levee. We stop at such cloakroom and leave in charge of a servant our overcoat, our overshoes, our outward apparel, that we may not be im peded in the brilliant round of the drawing room. Well, my friends, when About 1,870 Easter mornings have we go out of this world we are going wakened the earth. In France for to a King's banquet and to a reception of monarchs, and at the door of the tomb we leave the cloaks of fiesh and the wrappings with which we meet the storms of this world. At the close of an earthly reception, under the brush and broom of the porter, the coat and hat may be handed to us better than when we resigned it, and the cloak of humanity will generally be returned to us improved and brightened and puri-

You and I do not want our bodies re turned as they are now. We want to get rid of all their weaknesses and all their slowness of locomotion. We want them put through a chemistry of soil and heat and cold and changing seasons, out of which God will reconstruct them as much better than they are now as the body of the roslest and healthlest child that bounds over the lawn in Central Park is better than the sickest patient in Bellevue hospital. But as to our soul, we will cross right over, not waiting for obesequies, inradiated. How welcome she is when, dependent of oblivary, into a state in after a harsh winter and late spring, every way better, with wider room and velocities beyond computation, the dulcome out of the north instead of the the very best spirits in their very best mood, in the very parlor of the universe the four walls burnished and paneled and pictured and glorified with all the splendors that the infinite God in all the ages has been able to inven Victory!

THE URN OR THE TOMB. This review, of course, makes it of but little importance whether we are emated or sepultured. If the latter is dust to dust, the former is ashes to ashes. If any prefer incineration, let them have it without cavil or protest The world may become so crowded that cremation may be universally adopted by law as well as by general consent. Many of the mightlest and bes spirits have gone through this process, Phousands and tens of thousands of God's children have been cremated-P. P. Bliss and wife, the evangelistic singers, cremated by accident on Ashtabula bridge; John Rodgers, cremated by persecution; Latimer and Ridley, cremated at Oxford; Pothinus and Blandina, a slave, and Alexander, a physician, and their comrades cremate at the order of Marcus Aurelius: at least a hundred thousand of Christ's disciples cremated, and there can be no doubt about the resurrection of their bodies. If the world last as much longer as it has thus far, there perhaps may be no room for the large acreage set apart for resting places but there is plenty of room yet, and the race need not pass the bridge of fire until it comes to it. The most of us le structure called the re rection body. You will have it; I will have it.

I say to you today, as Paul said to Agrippa, "Why should it be thought a thing incredible with you that God should raise the dead?" That far up cloud; higher than the hawk flies higher than the eagle flies, what is it made of? Drops of water from a river other drops from a lake, still other drops from a stagnant pool, but now embodied in a cloud and kindled by the sun. If God can make such a lustrous cloud out of water drops, many of them soiled and impure and fetched from miles away, can he not transport the fragments of a human body from the earth and out of them build radiant body? Cannot God, who owns all the material out of which bones muscle and flesh are made, set them up again if they have fallen? If a manufacturer of telescopes drops a telescope on the floor and it breaks, can he not mend it again so that you can see through it? And if God drops the human eye into the dust, the eye which he originally fashioned, can he not restore it? Aye, if the manufacturer of the telescope, by the use of a new glass and a change of material, can make a better instrument than that which was originally constructed and actually improve it, do you not think the fashioner of the human eye may improve its sight and multiply natural eye by the thousandfold additional forces of the resurrection eye? eye?

EVERY DAY RESURRECTION.

"Why should it be thought with you an incredible thing that God should raise the dead?" Things al laround us suggest it. Out of what grew all these flowers? Out of the mold and the earth. Resurrected! Resurrected! The radiant butterfly-where did it come from? The loathsome caterpillar. That albatross that smites the tempest with its wings-where did it come from? A senseless shell. Near Bergerac, France, in a Celtic tomb under a block, were found flower seeds that had been buried 2,000 years. The explorer took the flower seed and planted it, and garlands? Do your wonder we cele-it came up. It bloomed in bluebell and brate it with the most consecrated heliotrope. Two thousands years ago he found in a mummy pit in Egypt net and with doxologies that beat these garden peas that had been buried there arches with the billows of sound as the 3,000 years ago. He brought them out and on the 4th of June, 1844, he planted them, and in 30 days they sprang up. Buried 3,000 years yet resurrected! "Why should it be thought a thing incredible with you that God should

raise the dead?" Where did all this silk come fromthe silk that adorns your persons and your homes? In the hollow of a staff a Greek missionary brought from China to Europe the progenitors of the warrior: "Let me hear no more those worms that now supply the silk about the resurrection. There can be markets of many nations. The pagno resurrection. I have slain thoueantry of bannered host and the luxurious articles of commercial emporium blazing out from the silkworms. And than those whose crimes have never sepulcher. We shall have no more to who shall be surprised if out of this

and feebler and then stopped. They is death? What have we to do with have taken no food. They want none. death? As your reunited body and They lie dormant and insensible, but soon the south wind will blow the re-surrection trumpet, and the air and the earth will be full of them. Do not you the emptied graves, they will be think that God can do as much for our bodies as he does for the wasps and the spiders and the snails? This morning at half past four o'clock there was a resurrection. Out of the night the day. In a few weeks there will be a resurrection in all our gardens. Why not some day a resurrection amid graves?

Ever and anon there are instances of men and women entranced. A trance is death followed by resurrection after a few days; total suspensian of mental power and voluntary action. Rev. William Tennent, a great evangelist of the last generation, of whom Dr. Archi-bald Alexander, a man far from being sentimental, wrote in most eulogistic terms-Rev. William Tennent se to die. His spirit apparently left the body. People came in day after day and said, "He is dead, he is dead." Bu the soul that fied returned, and Will Tennent lived to write what he had seen while his soul was gone

EXCURSION INTO UNKNOWN

It may be found sometime that what is called suspended animation or comatose state is brief death, giving the soul excursion into the next world, from which it comes back, a furlough of a few hours granted from the conflict of life to which it must return. Do not this waking up of men from trance and this waking up of insects from winter lifelessness and this waking up of grains buried 3,000 years ago make it easier for you to believe that your body and mine after the vacation of the grave shall rouse and rally, though there be 3,000 years between our last breath and the sounding of the archangelic reveille? Physiologisis tell us that while the most of our bodies are built with such wonderful economy that we can spare nothing, and the loss of a finger is a hinderment, and the injury of a toe joint makes us lame, still that we have two or three ss physical apparatuses, and no anatomist or physiologist has ever been able to tell what they are good for. They may be the foundation of the rerection body, worth nothing to us in this state to be indispensably valuable in the next state. The Jewish rabbis and the scientists of our day have found out that there are two or three superfluities of body that are something gloriously suggestive of another state.

I called at my friend's house one summer day. I found the yard all piled up with the rubbish of carpent er's and mason's work. The door was off. The plumbers had torn up the floor. The roof was being lifted in cupola. All the pictures were gone, and the paper hangers were doing their work. All the modern improv were being introduced into that wwelling. There was not a room in the be best proven by giving it a trial. house fit to live in at the time, although a month before when I visited hat house everything was so beauti ful I could not have suggested an improvement. My friend had gone with his family to the Holy Land, expecting to come back at the end of six months, when the building was to be done. And, oh, what was his joy whe at the end of six months he returned and found the old house had been enlarged and improved and glorified. That is your body. It looks well now -all the rooms filled with health, and we could hardly make a suggestion. But after a while your soul will go to the Holy Land, and while you are gone the old house of your tabernacle will be entirely reconstructed from "cellar to attic, and every nerve, muscle and bone and tissue and artery must be hauled over, and the old structure will be burnished and adorned and all the improvements of heaven introduced, and you will move into it on resurrec tion day. "For we know that if our earthly house of this tabernacle were dissolved we have a building of God, a house not made with hands, eternal in the heavens." Oh, what a day when body and soul meet again! They are very fond of each other. Did your body have a pain and your soul not pity it, or your body have a joy and your soul not re-echo it, or changing the question did your soul ever have any trouble and your body not sym pathize with it, growing wan and weak under the depressing influence? Or did your soul ever have a gladness but your body celebrated it with kindled eye and cheek and elastic step? Surely God never intended two such good

friends to be very long separated THE FINAL VICTORY.

And so when the world's last Easte morning shall come the soul will descend, crying, "Where is my body?" And the body will ascend, saying Where is my soul?" And the Lord of the resurrection will bring them together, and it will be a perfect soul nn a perfect body, introduced by a perfect Christ into a perfect heaven Victory! Do you wonder that on Easter day we swathe our churches with brate it with the most consecrated voice of song that we can invite, with buried yet resurrected! A traveler says the deftest fingers on organ and corsea smites the basalt at Giant's Causeway? Only the bad disapprove of the resurrection. A cruel heathen warrior heard Mr. Moffatt, the missionary, preach about the resurrection and he said to the missionary, "Will my father rise in the last day?" "Yes," said the missionary. "Will all the dead in battle rise?" said the cruel chieftain. "Yes," said the missionary. Then said sands in battle. Will they rise?" Ah, there will be more to rise on that day been repented of will want to see! But insignificant earthly body, this insigni- for all others who allowed Christ to cloakroom at a governor's or presi- ficant earthly life, our bodies unfold be their pardon and their life and their

MAN ASSESSMENT OF MANY PROPERTY.

arrection it will be a day of viceternities? Put silver into diluted inter and it dissolves. Is the silver gone forever? No. Put in some pieces of copper, and the silver reappears. If one force dissolves, another force organizes.

"Why should it be thought a thing incredible with you that God should raise the dead?" The insects flew and the worms crawled last autumn feebler and feebler and them stored. They forever and forever and forever. Where the emptled graves, they will be the abandoned sepulchres, with rough ground tossed on each side of them, and slabs will lie uneven on the rent hillocks, and there will be fallen monu ments and cenotaphs and then for the first time you will appreciate the full exhilaration of the text. "Death is swallowed up in victory

Nervous Dyspepsia A Disease Very Common to the American People, But Now Quickly Remedied

A SURE CURE.

In a case of Nervous Dyspepsia loctor sees two things first that the digestion is deranged, and second, that condition.

If abreast of the times, and in ouch with the latest discoveries the doctor is sure to advise Ferrozone, which is now universally prescribed in cases of acute Indigestion and Dyspepsia.

Ferrozone is prepared specially for diseases of the stomach and bowels, and as a sure cure for Nervous Dyspepsia has proved itself a thousand. times to be superior to all others. Where Ferrozone is taken after each neal, it is impossible for Dyspepsia or Indigestion to exist. It digests the food before it has had time to ferment in the stomach, and by its regular use one is enabled to eat and drink anything at any time, without fear of bad

results. Ferrozone relieves that distres headache, and burning feeling in the stomach peculiar to dyspepsia. It regulates the action of the bowels, kidneys and liver; strengthens the nerves and makes the sad looking, dejected dyspeptic feel like a new man in

wenty-four hours. The general manager of a Toronto Manufacturing Company who used Ferrozone with very marked results, says: "The strain of conducting a large business brought on a siege of Nervous Indigestion about a year ago. which I endeavored in vain to shake off. Doctors told me only a complet rest would cure me, but not being able to spare the time, I used Ferrozone instead. It perfectly restored my good health in a short time. I have confidence in the merits of Ferrozone and am pleased to recommend it."

What Ferrozone can do for you can be best proven by giving it a trial. and sells it; price 50c. a box, or three by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont. Sold and recommended by A. Chipman Smith & Co.
