ORTHOPAEDIC SHOES. The making of orthopaedic shoes The making of orthopaedic snoes has become a business of volume as well as importance since the war, and a many soldiers who have returned unrable to follow their previous trades will be trained in this skilled branch of shoemaking in the Military Hospitals Commission's vocational training

tals Commission's vocational training classes.

Fitting shoes to feet which are not mates and making them appear so is an art, and the number of men demanding such attention will be larger than shoemakers ever dreamed of before the war. Many wounds which men sustain cause foot difficulties which require special shoes if the men are to be comfortable, and to fit these feet with suitable shoes will be the business of a large number of returned soldiers.

AN !TALIAN SINGER.

And Her Last Song

There are popular songs from operas endeared to the hearts of the American people associated with famous singers. The names of "Norma" will always be associated with famous singers. The names of "Norma" will always be associated with figurial crisis, the Italian prima donna, born in 1810. When only sixteen she appeared in opera at Bologna, and won the hearts of the audience by her sweetness and wonderful compass of voice. It was her heartfelt rendition of "Norma" that has left its impress on musical history. She sang in the United States during the years preceding the Civil War, and even divided honors with Jenny Lind as the most popular singer of her time. She dided in 1869, and it is said the last song she sang was the famous selection from "Norma" upon which her reputation was made.

Several of Grisi's favorites are in cluded in "Heart Songs"—the musical library of song, now being placed with its readers by this paper. The

Why Nine People Out of Ten Have Acid Stomach and Indigestion

Acids in Stomach that Sour and Ferment Your Food Should be Neutralized With a Little Magnesia to End Indigestion.

"While there are many forms of stomach trouble," says a physician with has made a special study of stomach disorders, "I believe that fully 90 per cent. of these cases are traceable to the excessive secretion of hydrochloric acid in the stomach with consequent food fermentation, gas and delayed digestion."

The stomach needs a certain amount of acid for proper digestion but many people have an unnatural tendency to secrete more acid than their stomach requires. This excess acid makes all the trouble.
