ROCKWOOD CLUB ENTERTAINMENT

Large Attendance in St. Paul's Sunday School Room Last Evening Who Enjoyed Three Act Comedy.

The entertainment given last night in St. Paul's Sunday School room, under the auspices of the Rockwood Comfort Club, proved to be a big success. This Club has been for the past four and a half years making comfort and sending them overseas to the boys from Wright street, and it is their intention to round out their labors by erecting a memorial to the Wright street boys, and the proceeds of last night's entertainment are for that object.

Maxwell - a car made of more brains than metal. SO much material and so much labor go into every car. Have you ever stopped to consider the brain power that goes into a car? Take the Maxwell, and note such men as these employed in its development: 1. The originator of quantity production in the automobile business... 2. One of the two leading production men on the continent... 3. One of the two leading metallurgists on the continent... 4. One of the leading foundry engineers on the continent... 5. Probably the leading cost man on the continent... 6. A road testing engineer who has driven a car further than any living man... 7. An accountant who keeps a daily balance in a business that exceeds \$50,000,000 a year. These are but seven of more than thirty men of exceptional capacity who team together in the operation of the Maxwell business. The career of any one of these men furnishes a great human story. The result is evident in the Maxwell of today - a car with a lineage of 300,000 before it. All designed and built on the original chassis program. It is a car that grows better day by day. Because more brains than metal are put into it. MAXWELL MOTOR CO. OF CANADA, Limited, WINDSOR, Ont. \$1,275 (c.o.b. Windsor, Ont.) Motor Car and Equipment Co., St. John, N. B. Showrooms: Cor. Relieve Your Rheumatism For 25c. NR does it by improving digestion, assimilation and elimination - the logical way. NR Today - Relief or No Pay. There are three vital processes of human existence - the digestion of food, the extraction of nourishment from it and the elimination of the waste. Let anything interfere with these processes - let them be interrupted or improperly carried on - and sickness of some kind follows. Poor digestion and assimilation means failure to derive full nourishment from the food that in turn often means impoverished blood, weakness, anemia, etc. Poor elimination means an accumulation of waste matter which poisons the body, lowers vitality, decreases the power of resistance to disease and leads to the development of many serious ills. Rheumatism - due to some interference with the process of elimination, failure to get rid of certain body poisons - cannot be expected to yield to any medicine that fails to correct the condition responsible for it.
