 Ottawa

Sir

being requested by your Agent Mr J W Deryn to accompany him to Kincardine Brantford and Toronto for the purpose of selecting a sawmill suitable to meet the requirements of the Cape Croker Indians and requested their lowest prices for same which no doubt will be submitted to you for approval I must say that the Waterous Mill is the best as the others are of the old fashioned type and made of cast iron where the Waterous is head blocks & track are made of steel and their Shingle Machine is much better it is a selfacting machine it is worth \$275 where the others are only worth \$95 I must say that the Waterous Mill would be the most suitable mill for the Indians of Cape Croker

Yours respectfully
 Thomas Kelly
