Copperas.....	3.10	3.25
Br. Gum, bags.....		

THE TWO WINSTON CHURCHILLS.

The American Churchill is 42 years old and the British 39. The American was educated at Annapolis for the navy, while the Briton was educated for the English navy at Sandhurst. Both were newspapermen. Both have written books and both have been politicians. The American Winston Churchill ran for Governor of New Hampshire and was a member of the Legislature. The English Winston Churchill was once Home Secretary, and is now First Lord of the Admiralty—the highest naval post in the British Ministry. The American made a start for Uncle Sam's navy, in which he never actually served. The Englishman is the head and front of the world's greatest navy, in which he never served a day. Perhaps the analogy which might interest each of them personally more than any other is this: Each is the father of one boy and one girl.—Philadelphia Ledger.

LONDON ASTONISHES BOSTON.

Somebody who has carefully gone over the twenty-four pages of a London paper with its references to geography in mind reports that he found 1,447 places named, of which 622 are in England, 64 in Scotland, 20 in Ireland, 263 Continental Europe, 163 in Asia and Australasia, 110 in Africa, and 37 in South America. The astonishing thing about the record—considering that it was a London paper—is that there was news from 159 places in North America—(Boston Globe.)

MEXICO.

Mexico consists of twenty-seven confederated states, and the total area of the country is 763,000 square miles. Mexico is, therefore, almost three times the size of the state of Texas. The country has a coast line of 6,000 miles—1,600 on the Atlantic and 4,200 on the Pacific. In natural resources Mexico is one of the most favored countries on earth, especially in mineral wealth. The people of Mexico are its chief drawback, the greater part being Indians, far below the Indian of North America in intelligence and character.
