

GOSSIP.

I shall pass through this world but once; any good thing, therefore, that I can do, or any kindness that I can show to any human being, let me do it now. Let me not defer it or regret it, for I shall not pass this way again.

In writing to the "Farmer's Advocate" of his trip to British Columbia during last summer Prof. F. T. Shutt, Chemist Dominion Experimental Farm, says: "My tour in B. C. this year was possibly the most satisfactory I have ever made to any province in the Dominion. The itinerary was carefully planned and arranged. It was at a time of the year when one could see and study the soils and crops at their best. It took me over a number of typical areas, and it gave me an opportunity of meeting the men working the land, and discussing with them their failures and successes." During his visit Prof. Shutt visited and spoke at several points on Vancouver Island, and in addition to the principal towns in the Okanagan Valley, between Enderby and Summerland, he addressed meetings at Chilliwack, Agassiz, Kamloops and Nicola.

MARKET HORSES THAT SELL.

George M. Rommel, of the United States Department of Agriculture, says: "Stand by the auction ring in any great horse market, and observe closely the horses that fail to bring prices sufficient to cover cost of production. In the great majority of cases trotting blood predominates if any breeding at all is noticeable. Ask the dealer what is the breeding, if any, of most of the large numbers of unclassified horses on the market, and his answer will be: 'Trotting and coach blood.' This is not because draft blood is more valuable or that the blood of the light breeds is not wanted, for the great cry of the market at present is that good drivers and saddlers are extremely scarce. It is because performance and style are much more difficult to acquire in breeding than size and weight. The high-class roadster, coacher or saddler is by far the most difficult horse to produce that the market calls for. In addition to careful plans of breeding and high individual excellence in the resulting progeny, a course of handling, manning and training must be pursued before the horse will figure as a really marketable animal. These facts must be thoroughly understood if a man would breed light horses for the market.

The Body is an Electric Storage System

Electricity is now recognized to be one of the essentials as well as one of the mysteries of life. Every one contains electricity, and its dominance determines to a great extent the vitality, the magnetic force, the health and strength of the individual; especially is this true of the nerves. Nerves are the wires on which this electric fluid is run.

THE PROOF—Have you ever felt yourself tingle at the close approach of an electric storm? Ever feel an unaccountable oppression preceding lightning, and note that whereas the approach of

lightning frightens some, others, the strong, the high-strung, are apt to be still further exalted by it.

THE REASON—They are already charged with electricity; lightning to them has no terrors. It's the weak who are sighing for electric force, whose magnetism is all but palsied; they droop as does a parched flower before the coming of rain.

Lucky for them if the lightning playing in the air could yield to them some of its vitalizing force, though this cannot be. A more gentle way is needed.

IF YOU SUFFER—if you lack energy, vitality, power—if your system has acquired through weakness of the nerves any Nervous Disorder, Rheumatism, or Complaints peculiar to either sex; if your appetite is poor, your nerves shaky, if you have pains in the back, or head, or kidneys; if you get dizzy spells or feel faint; if you sleep badly—you should wear Dr. MacDonald's Electric Belt. It will gently and surely supply the electricity to lead you to health.

Free Trial for 90 Days

Not a penny down, simply drop me a postal with your name, and I will forward you, at once, one of my latest Improved High-Grade Electric Belts Free. You can use it three months, then pay me if cured, and the price will be only half what others ask for their inferior belts. If not cured, you return the Belt to me at my expense and Your Word Will Decide. I am willing to trust you entirely, knowing that I have the best and most perfect Belt ever invented, and nine men in ten always pay when cured.

I WILL TRUST YOU.

This modern Belt is the only one that generates a powerful therapeutic current of electricity without soaking the battery in vinegar as all other belts do, and it is guaranteed never to burn. It is a certain and positive cure in all cases of Rheumatism, Varicocele, Dyspepsia, Losses, Weak Back, Nervousness, Kidney, Liver and Stomach Troubles and weakness brought on by abuse and excess.

I WILL GIVE FREE

to each person writing me one copy of my beautiful illustrated Medical Book, which should be read by all men and women. Drop me a postal and I will send it to you FREE in sealed wrapper. If you are weak in any way, delay no longer, but write to-day for my splendid book and Belt free. Write to-day.

DR. J. Q. MACDONALD, 8 Bleury St., Montreal, Que.

GOSSIP.

PERCENTAGE OF FOALS.

Among horse breeders, a proportion of anything over 70 per cent. of foals to the number of services given by a stallion is usually regarded as a highly-satisfactory performance. In other words, a sire is considered to have done his work extra well if seventy out of every hundred mares served by him produce foals. As a rule, however, the actual percentage of foals is considerably lower than this, and perhaps a good average proportion may be said to be from 50 to 60 per cent. In this connection it is interesting to observe a statement which has been presented to the Hunters' Improvement Society showing the percentage of foals got by nine stallions registered under the 1903 scheme of the Society. From this return it appeared that the first prize of £20 had been won by the hunter-bred stallion, Privado, who had to his credit the very fine record of 77.14 per cent. of foals, and the second prize of £10 went to Clarendon, whose proportion of foals to services amounted to 75 per cent. In all, the nine stallions included in the scheme served 402 mares, of which 285 foaled, thus representing a percentage of 58.45.—[Ag. Gazette (British).

FARM TELEPHONES PAY.

A cattle buyer drove into the yard of a farmer about fifty miles from Chicago the other day and made an offer for all the cattle and pigs on hand, delivery to be made at once. The offer seemed a good one, but before closing the farmer said he would speak to his wife. Going to the house he asked his wife to call up a Chicago commission house by telephone, says a writer in the Chicago Tribune. In less than two minutes he was in communication with Chicago, and was informed of a rise in prices and advised what a good offer would be at that moment. Within five minutes he closed a deal with the buyer at prices which paid him \$300 more than the first offer.

At a neighbor's the threshing gang was hard at work. Twenty-five men and a huge machine were making quick work of the big barley stacks. All at once a sharp report was heard; there was a stoppage, and investigation showed an important part of the machine broken. No similar part was at hand, and it was doubtful if it could be obtained in the nearest town, seven miles away. Perhaps it would be necessary to send to the manufacturer. There was just one chance that it might be obtained in Elgin. Naturally the first thing to get at was the telephone. The exchange, seven miles away, was called, and within a minute over the twenty-mile line to Elgin the mishap was discussed with the dealer in that city. The train left Elgin in fifteen minutes with the missing piece aboard.

In an hour and a half it had reached the nearest railway station, and before dinner was over it had arrived, was put in place, and again the wheels were whirring and the barley running into sacks. If no telephone had been at hand, there would certainly have been twenty-four hours' delay.

Thousands of instances of the above character go to show every day that the telephone is indispensable in the house of an up-to-date farmer. Few people in Chicago realize that there are more than five thousand telephones in farmhouses within fifty miles of that city. The farmer, with all his great freedom of operations and his opportunities in broad acres and smiling fields, is just as closely in touch with the facilities of the great city as if he were next door to it. In the farmhouse the telephone begins to get busy at five o'clock in the morning. At dinner time calls of many kinds go back and forth over the line, but it is in the evening, after supper that neighbor meets neighbor, discussing the crops and all matters of mutual interest. Housewives gossip of family affairs, and a community of interest is had, not only over all the country, but all over as much of the country as may be desired. When the farmer goes to bed he does not feel that he is out of the world, nor have sorry dreams of his isolation. If the metropolis is the comet he is hitched on to the tail with the very decided advantage that he is not close enough to get burned, and he can let go if he wants to. The rural mail delivery has done much for the farmer, but the telephone is doing more.—[The World.

1,800,000 People

Have Asked Us to Buy Them a 50c. Bottle of Liquozone.

We offer to buy the first bottle of Liquozone, and give it free to each sick one who asks for it. And we have spent over one million dollars to announce and fulfill this offer. Our object has been to let Liquozone itself show what it can do. A test is better than testimonials, better than argument. In one year 1,800,000 people have accepted this offer. They have told others what Liquozone does, and the others told others. The result is that millions now use it. It is more widely employed than any medicine ever was—more widely prescribed by the better physicians. And your own neighbors—wherever you are—can tell you of people whom Liquozone has cured.

Not Medicine.

Liquozone is not made by compounding drugs, nor is there alcohol in it. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research.

The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it can

not kill. The reason is that germs are vegetables; and Liquozone—like an excess of oxygen—is deadly to vegetal matter.

There lies the great value of Liquozone. It is the only way known to kill germs in the body without killing the tissues too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact that gives Liquozone its worth to humanity. And that worth is so great that, after testing the product for two years, through physicians and hospitals, we paid \$100,000 for the American rights.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help nature overcome the germs, and such results are indirect and uncertain. Liquozone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

| Goitre—Gout | Varicocele |
| Gonorrhœa—Gleet | Women's Diseases |

All diseases that begin with fever—all inflammation—all catarrh—all contagious diseases—all the results of impure or poisoned blood.

In nervous debility Liquozone acts as a vitalizer, accomplishing what no drugs can do.

50c. Bottle Free.

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquozone is, and what it can do. In justice to yourself, please accept it to-day, for it places you under no obligation whatever.

Liquozone costs 50c. and \$1.

CUT OUT THIS COUPON.

for this offer may not appear again. Fill out the blanks and mail it to the Liquid Ozone Co., 458-464 Wabash Ave., Chicago.

My disease is.....

I have never tried Liquozone, but if you will supply me a 50c. bottle free I will take it.
