Church will be at 3 p.m. old To-day," are derived from the Netherlands, "and the two great elements Mr. Russell Hartley is visiting which have contributed to make America what it is are, one, the civilization of ancient Rome with its genius for government and its instinct for justice and equal rights; the other, the strong, wild blood of the Germanic race with its passion for individual freedom which has given its nerve, strength and en-ergy to modern Europe." In Holland, Mr. Edwards adds, the feudal

system took feeble root In the Holland of the present time separated from Belgium since 1830 -there is a population of 6,500,000 compressed into an area of 12,500 square miles. The people are hardy and thrifty, and made capable by long battles against the sea, which centuries ago engulfed a thousand villages when the Zuyder Zee was formed. There is little prospect that Holland will be brought into the war, but if she is, there is a well-trained army, estimated at a half million, keyed up by constant vigilance during the past four years.

One feature which marks tea curing in Japan is the proverbial cleaniness which is characteristic of the Japanese people. The rules of sanitation are strictly observed by the tea growers of Japan. Not only the nealth and sanitation of workers are strictly examined by local tea asso-ciations, but also the process of curing is inspected with great care. Japanese teas have never been artifi-cially colored as have been teas from ome other countries.

Make Your Vegetable Garden A Family Afrair

The best way to insure the success of your vegetable garden is to get every member of the family interested in it.

Don't put the whole burden upon father and mother. Any child over the age of ten years can, and usually will be glad to help, if his interest is encouraged; and even younger children may be shown how to help.

The way one family cultivated a very successful vegetable garden last year was as follows:

The husband and wife planned the garden. The man spaded up the soil and manured it as he went along.

Then he and his wife and their two eldest children raked it all over thoroughly and put in other fertilizer. In this way they got the ground into good condition.

The man planted the potatoes, the corn, the tomatoes and the cab-

The woman attended to the beans, peas, green onions, spinach, radish and lettuce.

The children looked after the late onions, parsnips, beets and carrots. And they all helped one another with the hoeing.

What was the result?

There grew up in that family a friendly rivalry and an interest in the garden such as no person would have believed possible had the experiment not been tried.

The family had plenty of salad vegetables during the summer. They preserved sufficient tomatoes, beans and pickles to last all through the Winter and they took off enough potatoes, beets, carrots, parsnips and onions to carry them through until March of this year.

What this family did your family should be able to do. The way they went about cultivating their garden is described in a booklet entitled "A Vegetable Garden for Every Home." This book has been prepared by the Ontario Department of Agriculture for distribution to any householder who will send for a copy. It is full of helpful, practical suggestions, including plans for various sized gardens. You can get a copy free by filling out and mailing the coupon below.

Organization of Resources Committee, Parliament Buildings, Toronto Dear Sirs:

Please send me a copy of your booklet "A Vegetable Garden for Every Home.
