OW, damp or swampy lands in a warm, humid climate produce tea of rank, rapid growth, coarse in texture, woody fibred, rudely flavoredmakes a cup heavy, murky in color, rough-tasting —it is poor tea.

But the Indian and Ceylon teas used to make the Red Rose brand are grown on the high lands India and the mountain sides of Ceylon.

These teas are grown in clear dry sunshine, they mature slowly, the leaves of the Ceylon teas are tender, delicate, finely flavored, but not strong.

The Indian teas thus grown are full bodied, richly flavored, smooth in texture, strong.

Such Indian and Ceylon teas combined in Red Rose Tea produce a cup of a rich rosy brown, strong and smooth-all the richness and strength of Indian, all the delicacy and fragrance of Ceylon teas-that "rich, fruity flavor" which belongs alone to Red Tea-more qualities of tea excellence than any Indian or brand of Ceylon alone can possess.

A Transformation. An American man-of-war's man, ashore at Gravesend, near London, awoke the other morning to find him-self attired in the uniform of a British soldier. No sooner had he wandered out into the street than a picket stopped him and told him to button up his tunic or he would be taken to barracks. He sought refuge in a police station, where it was discovered that a deserter had changed clothes with him while he slept.
