provements being applicable to "Tongue
Boots," and consisting mainly in form-
ing the leg of a single piece of special
pattern, with the seam in front.

ROBERT CHURCH

ADVERTISEMENTS.

CAUTION.

The PILLS Purify the Blood, correct all
disorders of the Liver, Stomach Kid-
neys and Bowls, and are invaluable in
all complaints incidental to Females.
The OINTMENT is the only reliable re-
medy for Bad Legs, Old Wounds, Sores,
and Ulcers, of however long standing.
For Bronchitis, Diphtheria Coughs,
Colds, Gout, Rheumatism, and all Skin
Diseases it is no equal.

BEWARE OF AMERICAN COUNTERFEITS

I most respectfully take leave to call
the attention of the Public generally to
the fact, that certain Houses in New
York are sending to many parts of the
globe SPURIOUS IMITATIONS of
my Pills and Ointment. These frauds
bears on their labels some address in
New York.

I do not allow my medicines to be
sold in any part of the United States,
I have no Agents there. My Medi-
cines are only made by us, at 533 Ox-
ford Street London.

In the books of directions affixed to
the spurious make is a caution, warning
the Public against being deceived by
counterfeits. Do not be misled by this
audacious trick, as they are the coun-
terfeits they pretend to denounce.

These counterfeits are purchased by
unprincipled Vendors at one half the
price of my Pills and Ointment, and are
sold to you as my genuine medicines.

I most earnestly appeal to that sense
of justice which I feel sure I may ven-
ture upon asking from all honorable
persons, to assist me, and the Public, as
far as may lie in their power, in de-
nouncing this shameful fraud.

Each Pot and Box of the Genuine
Medicines, bears the British Govern-
ment Stamp, with the words "HOL-
LOWAY'S PILLS AND OINTMENT, LONDON
engraved thereon. On the label is the
address, 533, OXFORD STREET, LONDON,
where alone they are manufactured
Holloway's Pills and Ointment bearing
any other address are counterfeits.

The Trade Marks of these Medicines
are registered in Ottawa. Hence, any
one throughout the British Possessions,
who may keep the American Counter-
feits for sale, will be prosecuted.

Signed THOS HOLLOWAY,
533, Oxford Street, London.

NEWS PER MAIL.

A YEARS EXPERIENCE IN THE NORTH-WEST.

The following extract from a private
letter from Mr. Joseph Tees, an old
Montrealer, who is carving out a new
home for himself in the North-West,
is a lesson you will think me rather
forgetful to my promise to you; well you
know the old saying, "Better late than
never." I am happy to be able to tell
you that I am well, and like the country
as a whole and my firm in particular.
My family came here in March; they
are well. I need not tell you I was glad
to see them. I don't think I was ever
designed for either a hermit or bachelor.
This living alone, cooking, baking wash-
ing, &c.—may do for those who like it,
but I confess I resigned the whole with-
out a sigh of regret. After I came
here my wife and myself built a small
but comfortable house. We were kept
busy in the winter chopping fence-rails,
house-logs and fire-wood, and on very
cold days we stopped in doors and made
furniture. It is quite an advantage to
be able to turn your hand to anything in
a new country. I made two sets of bow-
saws and two sets of harrows, besides
what furniture we needed to make our
little house comfortable. We commen-
ced our spring work on the 4th of May,
which was a month ten days later than
average. We got in seven acres of wheat,
four of oats, two of barley, one and a
quarter of potatoes, and three-quarter
of garden stuff—cabbages, lettuce, onions,
parsnips, beets, beans, peas, radishes,
cucumbers, and tomatoes &c. They
are all up and looking well. We have
been using for over a week past lettuce,
onions, and radish here; and will have
peas and beans in less than another week.
The soil is beautiful, and very easily work-
ed. We hope to get broken next year
about fifteen or twenty acres, which will
give us thirty-five acres of crop another
year. There is not a stump or a stone
to trouble us in tilling and it is really
wonderful how rapid vegetation is.
From all I can see and hear I was very
fortunate in my choice of a location, for
I believe this is the garden of the pro-
vince. We have a fine class of settlers,
most of them from Ontario, with a fair
sprinkling of Montrealers. They all like
it and are doing well; in fact, I don't
see any reason why any one with pre-
servation and industry could not in a few
years be comfortable. The farm adjoining
mine has been laid out in a town.
There is a hotel, a store, a blacksmith's
shop and two dwellings erected, and
every prospect of a great mill being built
there by a Methodist Minister, and
four miles off a Presbyterian. There are
lots of wild fowls—geese, ducks and
prairie chickens, and they are a great
blessing, as the only meat we can get in
summer is pork, and the fowls make a
good change. The crops around here
were very abundant last year, wheat
averaging about thirty bushels to the
acre, barley sixty, oats seventy. The
potatoes are the best and most pro-
ductive I ever saw. There is but little
fruit, except strawberries, but I see no
reason why most kinds you have would
not grow here. You would be surprised
and delighted with the number, beauty
and variety of the wild flowers. The
prairie is dotted all over with them, some
of them being equal to those that are
cultivated.

In conclusion, I would say that I have
seen no reason to regret that I came and
located here, as I really think it would
be hard to beat it as a farming country.
I was sorry that I happened to be away
when "Rusticus" passed. He was quite
near my place. I would have liked to
have seen him.

Pembina Crossing, July 2, 1880.

A LETTER FROM BENNETT,

COUNTERFEITERS CAUGHT.

A Boston paper of Monday has the
following:—
Detectives, Pratt and G. T. Bayley
of the district of the police accomplish-
ed a good job when they arrested Arthur
W. Richardson, for counterfeiting money
on banks in St. John, N. B., at
Pembroke, this state in June last. Rich-
ardson is 26 years old, and for some time
past has written several wild cat stories
for country papers, as well as cutting and
drawing on wood, the photographs of sev-
eral illustrious country gentlemen, who
wished to have their beauty displayed
before their admiring constituents. He is
natural genius in the art of carving and
engraving, but shittless otherwise. It
appears that about a year ago he got ac-
quainted with a gang of counterfeiters
from the provinces, the leader of whom
was one Quinn, and whose lieutenant
or right-hand was George Lefurgy, a
Canadian of French extraction. Rich-
ardson soon became a member of the
gang, and entered heartily into a plan
whereby counterfeit bill on the Union

Bank Prince Edward Island, Merchant's
Bank of Halifax, should be printed in
this vicinity for circulation in the Dom-
inion and in the county towns in the
States. Lefurgy was detained to assist
Richardson in the work, and, between
the pair, certain engravers in this city
were induced to make plates for the
counterfeiters. The original plates were
made in pieces, each by a different firm,
who were led to believe by the rogues
that the plates were to be used in the
printing of business and advertising doc-
uments on hand-bills to be circulated about
the streets. In this way a plate to be us-
ed to counterfeit \$10 bills on the Merch-
ant's Bank was made in different blocks.
One firm made the large figures '10'
and word 'TEN' in block letters, to be
used on the face of the bill, while an-
other did the fancy engraving for the
balance of the front-piece. The back
was engraved by one firm, in three pieces,
and the whole was finally put together
by a man well known to the police of this
city, and who is thought to be the equal
of any engraver in the country. The
plate of the Prince Edward Island Bank
was for the printing of \$2 bills, and was
gotten up in the same manner as the ten
dollar plate, but by different engraver.
After a small press had been purchased
Lefurgy and Richardson went to work at
the latter's house in Pembroke, and
soon began to turn out bills on both
banks. The bills were fair samples of
the genuine, and they had no trouble
in palming off several on the innocent
travellers in the vicinity, while the
rest of the gang were well supplied with
the spurious, which was used with effect
in this city and in the provinces. One
of the bills passed in Pembroke was
found to be a counterfeit, and the de-
tectives above mentioned soon traced it
as coming from Richardson or his
Canadian confederate. The officer's
suspicion, unluckily, became known
to the Frenchman, and he made a hasty
flight to the provinces. Richardson also
became scared, and to cover his tracks,
about the same time threw \$3000
of counterfeit \$10 bills into a stove, and
burned them, and also destroyed the
plate used in manufacturing the \$2 bills
on the Prince Edward Island Bank. He
also destroyed the front-piece, it is now
supposed, of the plates used for the
\$10's; but took the back and the blocks
bearing the figures '10' and the word
'TEN', and buried them in Hanson.
He was arrested, and pleaded not guilty at
Plymouth. Unfortunately for him,
Lefurgy, after leaving Pembroke, at-
tempted to pass a large amount of the
spurious bills on the Dominion, whose
authorities had been notified of his do-
ings here. He was arrested at St. John,
\$500 in counterfeit money on both banks
was found on him. A short time since
he was convicted and sentenced for life
for his work. Detective Pratt went to
see him, and, from information he ob-
tained, got positive evidence against
Richardson, and as a result Richardson
completely broke down at the June term
of the court at Plymouth, pleaded guilty,
and is now awaiting sentence. He
confessed his guilt to the detectives,
and gave information which on Friday
last, led to the recovery of that portion
of the \$10 plate which he had buried
at Hanson. Detective Pratt and Bay-
ley found the spot from a description
of a couple of trees, near where the
plate had been placed, on the farm of
Richardson's father. The 'stuff' was
found in a wooden box 6x8 inches and
5 inches deep, the same being covered
with zinc to protect the contents from
dampness. The detectives have also
come into possession of other informa-
tion, relative to the identity and trans-
actions of the whole gang whose arrest,
with one or more engravers employed
by them, may be soon expected. The
Dominion authorities are also at work
upon the case.

HOLYOKE'S ELECTRIC LIGHT.

Holyoke, Mass, is to be the scene of a
novel and extensive experiment in the
use of the electric light. A Boston man
who was at first going to put his plans
into effect in his own city, has decided to
try them at Holyoke on an account of
cheap power. To make the experiment
which he will attempt, will require 150
horse power, or over two mill powers, or
enough to run a paper mill. A tower
75 feet high will be built and surround-
ed by a immense lantern of such power
as to put all former electric lights com-
pletely into the shade. The inventor
will put the tower and apparatus up at
his own expense, but he hopes, to succeed
so well that the city will adopt his sys-
tem. He is extremely enthusiastic and
 sanguine as to the result of his experi-
ment, and his expectations go far beyond
the achievements of any previous elec-
trician. He says that with seven such
towers as he intends to build he can
make the city as light as day, both in
doors and out. His idea is that by fill-
ing the atmosphere above the city with
light he will get the same effect that we
do from the sun and its reflected light,
and that the shadows will be no darker
