FREDERICTON, SEPTEMBER 1, 1890.

THE VICTORIA ELECTION.

The result of the election in Victoria is disappointing, and we venture to think, is to be regretted in the interest of the county itself, which has for the present lost the services of a very capable and highly resign in this direction that the future settlemembers in the legislature having the business capabilities which Mr. Baird unor six years he held a seat in the house, his personal influence and the esteem in which he was regarded on all sides, have Mr. Baird's defeat on many grounds, we do not regard the event as having any political significance, either as indicating the feeling of the people of Victoria county toward the government, or as have done nothing else than to assist this materially effecting the relative strength of the government and opposition party. The contest was very largely a personal one between Messrs. Baird and Porter, and with the exception of the feeling industriously worked up against the local government on account of the dominion fishery regulations, which prohibit spearing and netting, and the four rod reservation, there was no evidence of even the slightest antagonism to the government. Mr. Baird was elected in January last by a very small majority of nineteen votes, and the present result follows upon a transfer of fourteen votes from Baird to Porter; certainly not a stampede in any sense from either Baird or the government in a total of 1700 votes in the county.

great change of public sentiment hostile to the government since January last. Nothing could be more absurd. It may be there is such a change as the office and patronage seekers declare, but we have not vet had any evidence of it and a difference of fourteen votes in 1700 is not sufficient to alarm anybody. The truth is our opposition friends are booming this victory for a vast deal more than it is worth. To judge of the actual value of the so called make up the local politics of the province. revulsion in public sentiment, make a little calculation, and it will be found that it would just take twenty-eight years to enjoys a scandal as a crow does carrion, change the government majority in York county, in the last election, to a minority. By the time that number of years shall have rolled round, the Gleaner will have been forgotten and Mr. Gregory will have is the only culprit named, although we

Mr. Gregory went to Victoria also. It is true he holds no recognized public position and can get no constituency; but he does hold a brief to abuse and slander the attorney general, and at all hazards pull him and his government down. It is other door in the city was closed to him, Mr. Blair's was open. The malignant bitpast favors are to be forgotten in the frenzy of his present hate. Of all the opposition speakers who invaded the county, Messrs. Gregory and Atkinson were the only persons who had the hardinhood to bring up and repeat the Leary dock charges. Thus we have the outside and the inside parents of the accusation rehashing the exploded story where they thought the people could not have heard the facts. As for Mr. Gregory who folly assumes every man against whom he has a feeling to be depraved, we are not suspressed. His life work now is to hound his benefactor; but Dr. Atkinson, we would suppose, had some little character to lose. Dr. Atkinson we would suppose, had some little character to lose. Dr. Atkinson would willingly have signed the committee's report last winter wholly exonerating the attorney general if the report had not contained a censure upon him for making the charge and notwithstanding Mr. Hanington, creatures who have not been added that the committee's report last winter wholly exonerating the attorney general if the report had not contained a censure upon him for making the charge and notwithstanding Mr. Hanington, creatures who have not been added by the position as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not such as a feeling to be depraved, we are not s eral had come so entirely clear out of the investigation, he (Dr. Atkinson) as well as

their member had put forward to secure | farmers in New Brunswick. this subsidy, and an inference might fairly be drawn that the people were more anxious to punish Mr. Baird for some Andrews Beacon: trifling shortcoming on his part, as their President Harrison, of the New Bruns

much the people of the Tobique river themselves deserve to be taken at their word, we are well assured no such consideration will influence the action of the government; and that having decided to ask the legislature to promote this railway upon its merits and with the conviction that the interest of the whole province justify the undertaking, there will be no retracing of its steps. Any person who has traversed the Tobique country must have been impressed with the magnifit cent possibilities there awaiting development. To say the soil is easily cultivable and fertile is to indulge in meagre praise of the great valley. There is probably nothing so rich or beautiful in any part of our fair dominion, as the broad meadows slopes and intervales of this magnificent valley and the uplands on either side are as level and fertile as the intervales. It is ment of the province must be directed, and so long as there are thousands of acres of surpassingly fertile soil within its they should pass beyond our borders in search of suitable lands upon which to settle and make their homes. There is only one way in which this section of the province can be or will be brought within reach of the settler, and that is by building the railway already projected important work it will earn the grateful acknowledgments of every enlightened The election is now over, and a by no means too scrupulous body of opponents of the government, whose only inpeople in Victoria county; but the gov-

spiration is a thirst for office, has succeeded for the present in deluding the ernment is not thereby exonerated from carrying out the enlightened policy upon which it has embarked. We wish to see the efforts the government have heretofore unsuccessfully made to come to some understanding with the N. B. railway company, with regard to the settlement of the company's lands, renewed as soon as these lands pass into the hands of the C. P. R. company; and we hope pany may be possible so that the great farming belt, forty miles wide, running back from the St. John river on its eastern bank, may be penetrated with roads and opened up for settlement. This is a more important question for this country than the petty squabbles, personal bitternesses and scramble for office, which go to
