### The Tale of Perfect Time in a Watch

From Mainspring to Hairspring, between them lies the  
secret.  
The Mainspring is the power which it transmits to  
the active parts of the watch. The Hairspring has the  
control and regulates the motion. The fitting is most  
important; it weighs a 100th part of a hair. Its perform-  
ance is directly enough to influence its performance,  
so wonderful is the adjustment. The friction  
from accumulated dirt, lack of oil, etc., destroy them  
from accumulating. Do not let your watch run to ruin  
from neglect. Remember our business is the care of  
watches, and our opinion costs nothing.

### Watch and Jewellery Repairs.

Send your Watch and Jewellery  
Repairs by Mail or Express and  
get the best Repair service in
