Will Challenge Elections.

DE VALERA DECLARES REGISTRATION DEFECTIVE.

DUBLIN, (Associated Press)—Eamon De Valera will challenge the validity of the forthcoming Irish elections on the ground that the register of voters is defective. Both at the Ball sessions and in correspondence with President Griffith he has contended that the register is stale, including many names that ought to be removed and omitting many names that ought to be included. His correspondence has demanded the immediate preparation of an up-to-date register but the demand was resisted on the ground that it would be certain to delay the elections which the Free Staters desire to hold at the earliest possible moment. It is admitted that owing to the conditions of conflict that prevailed in Ireland last year the ordinary work of revising the register was not uniformly performed. According to Mr. De Valera the errors affect tens of thousands of names. In the few districts where revision was carefully done the changes made amount roughly to about 16 percent.

ACCURATE ENOUGH FOR PURPOSE

The deficiency concerns two classes in whom Mr. De Valera is specially interested. These are the young men who have come of age in the qualifying period and who are not, under the existing register, entitled to vote, and women under the age of thirty, who reached that age during the qualifying period but are not yet on the register. The Republicans attach importance to the woman's vote, which they believe to be favorable to them. The reply of President Griffith, while conceding that the register is not ideal, argues that it is quite as accurate as the register on which elections were carried out last year, and he charges that Mr. De Valera's insistence on a new register might delay the elections for 12 months. Mr. De Valera rejoins that the register is not so accurate as the one for the latter was at least uniform and the one now in force was corrected for some districts but not for others. He disputes the right of the Free Staters to go to the country on it and is said to be making plans to contest the elections if the prevailing government persists in defying him.

Does Your Roof Leak?

Don't expect your roof to remain rain proof for ever. A \$5.00 bill spent on your roof now may be "the stitch in time which saves nine." Apply Special Coating Tar and keep your roof in good condition.

There are dozens of men down to the Millia Building day after day looking for work, give one of them a job, fix your roof before the really warm weather comes, you may not be able to get a man then.

If your roof is in very bad condition, very leaky, it will require a carpenter to make a good job of it, but if it only leaks in spots or only after heavy rain, you can have it easily fixed.

1st—Have all cracks and seams filled with Elastigum, everybody knows about Lasty-Gum, you use it like putty; a five pound pail costs \$1.50 and it positively stops leaks.

2nd—Then coat the entire roof surface with Special Coating Tar, this coating may be put on with a tar brush say at 10 o'clock when your roof has been warmed by the sun. Special Coating Tar costs \$3.50 for a five gallon can.

If the felt on your roof is worn out in spots, patch these spots with pieces of felt coated on the underside with Lasty-Gum, then coat the entire roof with Special Coating Tar and your roof will be good for several years.

Cut out this advertisement and pin it up in your kitchen. When you hire a man to fix your roof, read this for him and see that he does the job right.

When you hire a man to fix your roof tell him to wear rubbers (lend him an old pair if he hasn't any), this will prevent him from putting nail holes in the weak spots on your roof.

Get your roof fixed before you start housecleaning. If your roof hasn't been coated for 3 or 4 years do it now. Don't wait until it leaks, you will save money by doing it now. If you coat your roof every 3 or 4 years it will last as long as your house. You need not use sand with Special Coating Tar.

If your roof requires a new COVERING, we can sell you Vulcanite Roofing at \$5.00 per roll, complete with nails and cement ready to lay on your roof. Vulcanite is the best of its kind. Price was \$7.00 last year. We have a few rolls of slightly damaged felt to sell at \$2.50 and \$3.50 per roll. Come down and take your choice.
