The Judgment of the World

Clothes don't make the man, but they make all of him that people see in business hours.

Naturally, people read a man's character in his clothes, because that's what they see the most.

As long as appearances count, make them count for you instead of against you.

As far as right appearances go, Fit-Reform Suits and Overcoats are assets for every man who wears them.

TWO FISHERMEN ARE DROWNED

Father and Son Lost Life in Storm Last Week.

St. John, N. B., Nov. 29.—A Bathurst N. B. despatch says that Maxine Lambert and his son, Augustine of Pookesdie Island, who went out fishing several days ago, are missing, and as their boat has been found capsized, it is thought they were drowned. While they were fishing a heavy northwest gale with snow sprang up. The father was aged 65, and the son 24.

WINTER FEEDING OF YOUNG CATTLE

(Experimental Farms Note.)

There is no time that gain can be made more profitably with young stock than the period from six months to two years of age. The tendency very often, however, is to let the stock "rough" it during this time particular. The stock too often passes the winter without having made any appreciable gain, the farmer depending upon the pasturage during the summer to put the animal into saleable condition. The result of such a practice is that lighter steers are obtained, or heifers are delayed in maturity with corresponding loss to the raiser.

In order to carry young stock to best advantage during the winter months, roots or succulent feeds of some kind should be provided. Such feeds will take the place of hay and grain, thereby lessening the cost of wintering, and at the same time make it possible for the animal to make the best use of such dry feeds because of aiding in the digestion of both the roughage and meal given.

Young stock cannot make gain without protein feeds of some kind. This may be supplied by feeding plenty of clover hay. The importance of using good clover hay for young stock cannot be too strongly urged. The practice too often is to feed the young stock the poorest hay, whereas the opposite should be the rule if best results are to be obtained.

Of the grains, wheat bran, crushed oats and oil meal are the best. These are mixed in the proportion of two parts each of the bran and oats to one part of the oil meal. It is risky to feed cottonseed to young stock, particularly to those under one year of age.

With roots, or ensilage together with clover hay, a good growing ration is possible without grain feeds. If roots or ensilage are available a poor quality of hay or good straw may be fed along with some grain to furnish the protein requirements, and good growing conditions thereby maintained.

Good feeding is more important following the housing of the stock in the fall than at any other time. During the early winter is when particular attention should be given to the feeding of young stock, as at this time they respond more readily to good treatment and if any skimping in feed is to be practised let it be during the latter part of the winter at which time stock seems to do with less feed than earlier in the winter when the days are shorter and the temperature lower.

The placing of young stock upon a dry ration after coming from the pasture in the fall is very likely to be attended with stomach troubles, and if the supply of succulent feed is limited let these be fed in moderation at this time to avoid too great a change in food. A gradual change to the dry feed as the winter passes will prove to be less risky.

Care should be exercised in feeding a meal mixture, particularly if no succulent feeds are given, as very often a desire to bring on an unthrifty animal quickly may, if too heavy feeding is practised, result in increasing the unthrifty condition through impaired digestion.

At the Kentville Station, five yearling heifers fed 30 pounds of roots, 8 pounds of hay and 3 pounds of meal as stated above per day during November and December and no grain for the following five months made an average gain during this period of 225 pounds and an average gain for the year of 304 pounds.

Five fed the above ration during the seven months made an average gain of 275 pounds, and a gain for the year of 350 pounds. It should be stated that the summer pastures were not what one would wish, but they were fairly average upland pastures.

The importance of well ventilated, warm, well lighted stables with plenty of good water and opportunity for exercise, with dry quarters and plenty of bedding material should not be lost sight of in planning to make most profitable gains from young stock.

Experimental Station, Kentville, N. S.

10 CENT "CASCARETS" FOR LIVER AND BOWELS

Cure Stic Headache, Constipation, Biliousness, Sour Stomach, Bad Breath—Cascarets.

No one how bad your liver, stomach or bowels; how much your head aches; how miserable you are from constipation, indigestion, biliousness and sleepless hours—you always get relief with Cascarets. They immediately cleanse and regulate the stomach, remove the sour, fermenting food and foul gases; take the excess bile from the liver and carry off the concentrated waste matter and poison from the intestines and bowels. A 10-cent box from your druggist will keep your liver and bowels clean; stomach sweet and head clear for a week. They work while you sleep.

A Quick Relief for Headache

A headache is frequently caused by badly digested food; the gases and acids resulting therefrom are absorbed by the blood which in turn irritates the nerves and causes painful symptoms called headache, neuralgia, rheumatism, etc. \$5 to \$20 worth of Mather's Syrup will correct faulty digestion and afford relief.

IF YOUR CHILD IS CROSS, FEVERISH, CONSTIPATED

Look, Mother! If tongue is coated, cleanse little bowels with "California Syrup of Figs."

Mothers can rest easy after giving "California Syrup of Figs," because in a few hours all the clogged-up waste, sour bile and fermenting food gently moves out of the bowels, and you have a well-playful child again.

Ask your druggist for a bottle of "California Syrup of Figs," which contains directions for babies, children of all ages and for grown-ups.

REACHED PICTOU BOTTOM DAMAGED

S. S. South American Was Bound to Dalhousie, N. B. for Cargo.

PICTOU, N. S., Nov. 27.—With her bottom badly damaged, for she is taking water, the steamer South American, length 261 feet, beam 43.15 feet, oil burner, Capt. William Fraser, arrived in Pictou yesterday. She was only recently launched at Bridgeburg, Ont. and registered at Montreal. She left Montreal Nov. 14 on her maiden trip, bound to Dalhousie to load for New York. Midnight Nov. 17, in a blinding blizzard, she struck on a lee shore at Little Capes, about thirty-five miles northwest of Gaspe. The wrecking steamer Lord Strathcona came to her assistance, but after several attempts failed to float her. On Nov. 24 she came off under her own power. The Lord Strathcona returned and escorted her to Pictou, towing her part of the way here. An examination is being made by divers, and if found seaworthy, she will probably proceed to Halifax after taking on fuel oil here. The South American is owned by the American Metal Transport Co., New York.

GRANDMOTHERS' DANCE.

Sackville Post: A St. John correspondent writes: While a campaign against dancing is being launched in Montreal, the dance craze is gathering strength, in St. John, and this week a new cabaret, the most pretentious of its kind in the city, was opened, while plans are being discussed for the opening of another large dance hall. St. John folks were a bit behind other parts of the continent either in their enthusiasm for modern dances, or in the opportunity to indulge in them, but they are now making up for lost time. A private class recently organized included in its members eleven grandmothers, and the other members of the class own—Sackville Post.
