# ANNUAL REPORT OF WOMAN'S AUXILIARY

Dalhousie Society Report Progress of a Good Year and Finances are in Good Condition

The Dalhousie Branch of the W. A. to Missions, take pleasure in presenting their eighth Annual Report to the rector and vestry of St. Mary's Church. In regard to financial matters, on April 1914, there was a balance still on hand of \$25.43. The receipts for the year, to April 1915, amounted to \$178.00. From this amount the following payments have been made: \$45.00 for electric wiring the church, \$25.00 to Mr. W. I. Smith, Vestry Clerk and the Branch still continues to pay the salary of organist at \$40.00 per annum.

In regard to outside work, a splendid box of Red Cross Work, for the soldiers, was forwarded to St. John's Church W. A. St. John in November last, and at Xmas a bale of clothing etc., value about \$15.00, was sent to the "Shinvaug Home", Algonia.

As in former years various pledges and appeals amounting to \$23.00 have been forwarded to the Diocesan Board, for assisting in the Missionary work of the Church. We must not forget our "Little Helpers" of the Babies' Branch, who this year contributed \$3.11 for work among children in the Foreign Field.

During the year 45 meetings were held at the Rectory, where the ladies were always kindly and hospitably received by Mrs. Coleman, Honorary president of the Branch. We cannot close this report without expressing, on behalf of the members, the deep sympathy felt for our highly esteemed President, Mrs. Barberie, in the bereavement sustained by her since our last Annual Report, also our deepest regret at the loss sustained by the Church and Parish, in the death of Mr. Arthur H. Hilyard, for some years Church warden, always a most generous and valued helper in all good works.

May we all be more devoted and earnest during the coming year.

Signed: Mrs. James Wallace, Corresp. Sec. Miss K. M. Bateman, Rec. Sec.

# CANADA'S PART IN THE WORLD WAR

British Navy Keeps Trade Routes Open for Canada's Wheat. The Railways Work

The present conflict in Europe has demonstrated beyond the possibility of doubt that the maintenance of Britain's superiority at sea, and the expansion of the wheat areas in British Dominions, have been linked together as basic factors in the consideration of plans for Imperial offense and defence. The lawmakers in London, as a matter of policy, have allowed nothing to interfere with the building up of an all-powerful navy, and they have steadfastly ignored the protests of Englishmen who have contended that Great Britain would be in an impossible position if a war should develop with a powerful maritime power. There were numerous men in England who believed that in the event of an important European struggle involving Great

Britain: "the hunger of London would dictate terms of peace." But the Admiralty were convinced that the sea power of Britain would keep all the routes open for foodstuffs. The lands in the British Isles which might have been devoted to the growth of more wheat were left as before, and the investors of Britain by placing their funds in the bonds of railways in Canada, in South Africa, in Australia and in New Zealand, where vast stretches of fertile country remained to be opened up, encouraged the production of a steady supply of foodstuffs which might be called upon in case of emergency. The under-water craft many have failed to throttle the shipping of Great Britain. Her ships come and go almost as they please. And the resources of wheat lands, in themselves many times the area of the British Isles are available for the need of the people of Britain.

In facilitating the expansion of the various railway companies in the Dominion during the last thirty years, the crazy successive governments, federal and provincial, have enabled Canada to wake up the burden of a greater production in this year of the Empire's peril. Canada is measuring up to her advertised destiny as the "Granary of the Empire", or, more emphatic still, "Bread Basket of the World". The prophecies of leaders of thought for three decades are on the verge of fulfillment. The large exportable surplus of the wheat fields in Canada will go to feed a fair production of the dependent millions of England, and probably, the war-harassed Belgians as well. The railway lines which have been constructed east and west and north and south throughout the country have made her present position possible. Without these essential traffic arteries the Dominion would have been merely a helpless spectator, while the greatest war in history rumbled through to a conclusion. Canada's most important contribution to the cause of Empire is in wheat and flour and bread.

The bulk of the supplies of Canadian wheat for export are drawn each year from the wheat fields of the prairie provinces. The total supply may be computed by a study of the carryings of the railways. During the crop year 1913-14, the Canadian Northern alone handled from the territory served by its western lines, 47,295,000 bushels. Estimating the increase this year at 20 per cent., the C. N. R. should haul out approximately 56,750,000 bushels of wheat from the provinces lying between the Great Lakes and the Rocky Mountains. That quantity of wheat, converted successively into flour, and into standard loaves of bread, would feed Greater London, with its estimated population of 7,252,963, for more than four and a half years.

According to the millers, a barrel of flour, 196 pounds, is made from 4½ bushels of wheat, and, according to the bakers, 187 standard loaves of 24 ounces each, are made from one barrel
