ADVANCE OF RADICALISM

PROSPECTS OF A GREAT CHANGE IN THE IMPERIAL HOUSE.

The Tories and Whigs to Retire-Retreat of Conservatism Before Democracy-Rettrement of Mr. Gladstone.

LONDON, March 21 .- Both liberal and seized by a chill while conducting rehearsal; conservative political agents are manifestly preparing for the general election in vember next. They almost unanimously concur in reporting that of the present members of the house of commons almost half will decline to stand for re-election. If this calculation has a slight chillness thereafter, feels unproves accurate, the next parliament will well for a few days, and unexpectedly dies! be the product of one of the most thorough political changes ever witnessed in Eng-sician one morning stating that he feels land. A majority of those members of the house who, is is thought, will decline rehouse who, it is thought, will decline re-newals of candidacy are the older Tories blitics because of advancing age and increasing physical disability, but they will as observed by the profound discontant will be so because of profound discontant will be so be so because of the profound discontant will be so because of th and Whige. Singular as it may appear, the bulk of these will not retire from active do so because of profound discontent at

the progress of democracy in Great Britain.
It cannot be gainsaid that the most energetic and most effective political missionaries in her majesty's dominions for several years past have been radicals or democrats. of weather, prevails more among men than women, more among the apparently healthy than among the feeble.

Pneumonia, we are told, is invited by a certain condition of the system, indicated if one has occasional chills and fever, a tendency to colds in the throat and lungs, rhematic and neuralgic pains, extreme tired feelings, short breath and pleuritic attaches in the side, loss of appetite, back ache, nervous unrest, scalding sensations, politica," and from their own standpoint matters will get worse. Political philosophers see plainly if ever there is to be real and established democracy in England its advent will be much has ened by the very disposition shown by these tories and whigs to run away and avoid it. All indications show plainly that there is going on in England a steady retreat of conservatism before democracy.

the tory leadership in the commons to Sir Stafford Northcote.

Stafford Northcote.

Mr. Gladstone is tired of active political leadership. It seems to be generally believed that he will withdraw from the prime ministry and from the commens at the end of the present session. His family and his close personal friends, it is said, all concur in urging him to take this step. It is known that Mr. Gladstone has resembly very often expressed a desire to resign the leadership of the liberal party.

Some of the premier's relatives and family friends are arging him to retire into the house of lords, where he can continue to some of lords, where he can continue to some continue to take this step. It is known to military and effectually successed by water.

A Lovely Complexion. -"What a lovely complexion," we often hear persons say. "I wonder what she does for it?" In every case the purity and real loveliness of the complexion depends upon the blood. Those who have sallow, blotchy faces may make their skin smooth and healthy by taking enough of Dr. Pierce's "Golden Medical Discovery" to drive out the humors lurking in the system.

Orthon Directs of the Dominion. Gazette contains the usual statement of exports and imports. The aggregate value ot goods entered for consumption during the month of February, exclusive of betri-betrial Columbia, was \$6,832,807, as compared with \$7,275,450 in February of last year. The duty collected was \$83,000 ore than last year. For the eight months of the year the imports were \$65,988,560, as compared with \$69,742,857 in the corresponding period of the previous year. The exports for last month were \$3,142. 394, against \$3,044,000 in February, 1884. For the eight months ending February, 1885, the total value of exports was \$56,310,709, as compared with an export of \$57,009 081 in a like period last year, a decline of half a million dollars.

An accident on the N. Y. C. BUFFALO, March 22 .- On the Niagara Falls branch of the New York Central yesperday a train broke in two and the conductor neglected to flag a train following close ornshed into the former. The engine was completely wrecked, as were fifteen loaded sars, which were set on fire. Six of them contained dressed beef and general merthandise. Fireman Lawrence Khebertahz of Rochester dislocated his shoulder in jumping. The accident occurred at Orange-port, four miles east of Lockport. Loss,

—West Toronto in the star system.

-West Toronto Junction is within a few minutes of the Union station by the trains of either the Ontario and Quebes and the Grand Trunk or the Northern. Real estate in the neighborhood has steadlly risen in value and promises to advance still more rapidly. Some of the cest lots in West Teronto are to be had from George Clarke, 295 Yonge street. "I have suffered severely with corns, and was unable to get relief from treatment of any kind until I was recommended to try Holloway's Corn Cure. After applying it for a few days I was enabled to remove the corn, root and branch—no pain whatever, and no inconvenience in using it. I can heartily recommend it to all suffering from corns."

"PNEUMONIA."

Way Not Call It by Its Right Name? Many a strong-built man leaves home today, before night he may have a chill, and in a few has he will be dead! This is the way the dreaded pneumonia takes people off. The list of notable men who are its victims is appalling !

to run away and avoid it. All indications show plainly that there is going on in England a steady retreat of conservatism before democracy.

The whole tenor of reports from provincial centres is to the eff ct that the next acw parliament will be radically changed in character, that the number of anistowill be greatly lessened, and the number of sommercial men, traders and members of local bourgeois in the house be astonishingly augmented. Tory agents, in view of the necessity of making a timely recognition of the inevitable, have advised their leaders to adopt an electoral program based on democratic lines.

Lord Churchill, the young and erratic tory member of the commons, who in a fit of political disgust with the clumsy conservatism of his colleagues, abruptly stated on a tour of India, has been asked by cable to return to London as speedily as possible to consult with Lord Salisbury, leader of the tory peers, and with Sir Michael Hicks Beach, reported successor is the tory leadership in the commons to Sir Estefacy Northcote.

accompanying kidney disorder is very far advanced, recovery is impossible, for the

experience of thousands of honorable men worthy his favor.

When a physician says his patient has either bright's disease or inneumonia, he confesses his inability to cure, and in a measure he considers his responsibility ended. In many instances, indeed, persons are reported as dying of pneumonia, heart disease, apoplexy and convulsions, when the real cause of death and so known by the physician is this kidney consumption. Thousands of people have it without knowing it and perish of it because their physicians will not tell them the facts! The same fate awaits every one who will not exercise his judgment in such a matter and be true to himself, his family and to society.

This is none the less startling when it is remembered that not five per cent. of the patients presenting themselves to the regular practitioner are benefitted, while the patient medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presente of living parasites in the tissues, Mr. Dixon at once adapted his cere to their extermination: this accomplished, the catairth is practically cured, and the permanency is unquestioned, as consequently of the permanency is unquestioned, as consequently him four years ago are cured still. No one clee has ever attempted to cure caternh in this manner, and no other treatment has ever cured catairth. The application of the remedy is simple and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment.
