

CHLOROFORM AND ETHER SULPHURIC.

Pure. Lyman's S.G. 1.49

Pure. Lyman's S.G. 0.725

FOR ANÆSTHETICAL PURPOSES.

(The above have been manufactured by our firm for over forty years, and are being used by leading Surgeons and Physicians in Canada.)

The late **Dr. J. H. McCollum** said of our Chloroform, "that during the nearly five years that I held the position of Medical Superintendent of the *Toronto General Hospital*, the Chloroform manufactured by **The Lyman Bros. & Co., Limited**, was administered to about one thousand annually, and in no case had we fatality from it. *I have also used it for thirteen years in private practice.*"

Dr. T. G. Johnston, Sarnia, says: "For the last six or seven years I have used no other Chloroform than that manufactured by **The Lyman Bros. & Co., Limited**, both in surgical and obstetrical practice, and have had, and still have, every reason to be thoroughly satisfied with it."

We Claim the
Following
Advantages

- 1st. Its Comparative Cheapness.
- 2nd. The Stage of Excitement is not Nearly as Great as with Other Makes.
- 3rd. The After-Effects are not so Pronounced.
- 4th. No Offensive Odor During Administration.

Dr. C. O'Reilly, Medical Superintendent of the *Toronto General Hospital*, says of our Ether Sulphuric: "During the last several years the Ether manufactured by **The Lyman Bros. & Co., Limited**, has been extensively used for anæsthetical purposes in *Toronto General Hospital*, and no accident has taken place from its administration."

Dr. James F. W. Ross says: "I have overcome my former prejudice against Ether, but **The Lyman Bros. & Co., Limited**, are now supplying an article put up in $\frac{1}{4}$ and $\frac{1}{2}$ lb. tins equal to any in the market. I have used it frequently, and have seen it used by others during the last twelve months for operations of all degrees of severity. The after-effects are no greater than after Squibb's or any other pure Ether."

We claim for this Absolute Purity and Comparative Cheapness. When ordering Specify **LYMAN BROS.**

The Lyman Bros. & Co., Limited. - - **Toronto.**

"Canada Lancet" joins in highest recommendations.

IN BURNS

Carron Oil is wholly wanting in germ-destroying properties.

Creosote, Alcohol, Picric Acid and Iodoform have their advocates and their proper uses. They have their drawbacks and under most circumstances are objectionable.

Creolin is only useful in burns of the first degree; in those of the second it is not as beneficial as Bicarbonate of Soda.

In burns of the third degree all the above are useless. Unguentine has healed such where there were large open surfaces without a scar, for which at first skin-grafting was thought to be the only hope.

WAUGH says: "One cardinal principle should be remembered in treating burns—keep out the air and its accompanying micro-organisms."

Unguentine does this, as it forms at once a thin film which totally excludes the atmosphere, and it is indicated in **ALL** cases of burns.

FORMULA: Alum, Carbolic Acid, and Ichthyol with Petroleum base.

Clinical Reports, Sample, and Biography of Sir Astley Cooper, the Originator of the Formula, sent upon request
