THE PATENT SPIRAL SPRING RING PESSARY.

The engraving below shows the manner of manufacturing the Ring Pessary. In a spiral spring of brass wire about eight coils of thin rounded whalebone are inserted, which is bound loosely by the spiral spring, thus allowing the coils of whalebone to revolve around themselves, giving, as will readily be seen, more elasticity than they would were they bound tightly by a soft wire of any material, the ends of the spring are then screwed together, and the whole covered with soft rubber of exceedingly smooth surface. We manufacture in the above manner the Bow Pessary, Albert Smith's and all other shapes. Manufactured only by
