

author's First Latin Book, published fifteen years since, on the basis of Dr. Arnold's works, owed its origin. For the favor with which it was received, and for the generous interest with which it has so long been regarded, the author desires here to express his sincere thanks to the numerous classical instructors whose fidelity in its use has contributed so largely to its success. In the conviction, however, that it has now done its appointed work, he begs leave to offer them the present volume as its successor.

The great objection to most First Latin Books, that, however excellent they may be in themselves, they are not especially adapted to any particular Grammar, and that they accordingly fill the memory of the pupil with rules and statements which must, as far as possible, be unlearned as soon as he passes to his Grammar, is entirely obviated in this volume. All the grammatical portions of it, even to the numbering of the articles, are introduced in the exact form and language of the author's Grammar. Indeed, the paradigms are not only the same as in the Grammar, but also occupy the same place on the page; so that even the local associations which the beginner so readily forms with the pages of his first book may be transferred directly to the Grammar.

This work is intended to be complete in itself. It comprises a distinct outline of Latin Grammar, Exercises for Double Translation, Suggestions to the Learner, Notes and Vocabularies. As an Introduction to the author's Grammar, Reader and Latin Composition, it discusses and illustrates precisely those points which are deemed most essential as a preparation for the course of study presented in those works.

PROVIDENCE, R.I., June, 1866.
