A grand new lot of handsome Wraps Shawls in Knit Silk and Wool makes novelty patterns, splendid value.

Mail orders for samples or goods promptly executed.

JOHN CATTO & SON

King-street—Opposite Penton, Toronto.

THEATRICAL MERGER MEANS LOCAL CHANGE

Klaw-Erlanger and Shuberts Agree—Princess to Become a Vaudeville Theatre.

NEW YORK, April 28.—Announcement was made last night that the Klaw & Erlanger and the Shubert theatrical interests have been merged under the name of the United States Amusement Co.

AFFECTS TORONTO. Lol Solman, one of the four owners of the Royal Alexandra Theatre, said last night the end of the fight between the "trust" and the independents, known as the Shubert aggregation, meant better shows here for the public.

The new King-street theatre is owned by R. A. Smith, Cawthra, Mulock, S. Hines and Mr. Solman. The Princess, which has been used for vaudeville, they may try it out there this summer, but I do not think they would use the Princess all summer for vaudeville, as it has no cooking plant.

The Royal Alexandra is protected by contract against being used for anything but first-class productions, but if they decided to run summer vaudeville here there could be no objection to using the theatre for this purpose.

"We have simply a booking contract with the Shuberts and have twenty-five weeks filled ahead and have twenty-five weeks filled ahead."

"I foresee that the Erlanger and Shubert forces would join, and we are fully protected."

"The new theatre here cost \$500,000, without the land, and there is no finer in America."

BACCALAUREATE SERMON.

Victoria College Graduating Class Addressed by Rev. Geo. Jackson.

A large congregation filled Sherbourne-street Methodist Church yesterday for the preaching of the baccalaureate sermon by the pastor, Rev. George Jackson, B.A., to the students of Victoria College.

By experiments it was shown that this imagination or reproduction was not under the control of the so-called laws of association (contiguity and similarity), but that it was controlled by the task set, the direction in which the changes in consciousness were occurring. It was shown that this was a distinctly purposive or teleological control, as distinguished from the ordinary mechanical control.

"The Secret of the Life Beautiful." The text (Kings 1, 19-20) dealt with the place and adornment of the pillars of the temple. The preacher used it as symbolic of the relations of beauty to religion, and to life. He labored to dispel the idea that religion is of necessity conservative and antagonistic to art and science.

Nominations at the Canadian Institute.

Dr. Albert H. Abbott lectured at the Canadian Institute on Saturday night on "The Psychology of the Future."

The lecture pointed out that one of the greatest difficulties which the psychologist had had to meet at the present time is the attitude of those who persist in attempting to deduce the facts of consciousness from certain hypotheses of the dependence of such facts on the brain, on the one hand, and on the soul, on the other.

The former attempt had led to spiritualistic psychology. From the standpoint of method, both such attempts were wrong, and hence the experimental method of investigating mental facts, stood opposed equally to these two, and, indeed, to all such attempts to reach the facts by pure deduction.

The first step in the investigation must be to notice the very important part which past experience played in the form of memory or imagination in the experience of the present. Our facts perceived at any moment, gave us only colors, sounds, tastes, odors, sensations of temperature, pressure, etc., but all of these, together with what we do not constitute what we experience as an object.

It was illustrated by experience of various kinds, the determination, therefore, of the conditions under which this added factor, the imagination or similarity, arises in the present experience, comes to be the problem.

By experiments it was shown that this imagination or reproduction was not under the control of the so-called laws of association (contiguity and similarity), but that it was controlled by the task set, the direction in which the changes in consciousness were occurring. It was shown that this was a distinctly purposive or teleological control, as distinguished from the ordinary mechanical control.

THE WEATHER

Metropolitan Office, Toronto, April 28.—(8 p.m.)—The weather to-day has been fair throughout the Dominion, with higher temperatures in most localities. A disturbance now over the Upper Mississippi Valley is likely to cause unsettled weather in the lake region.

Minimum and maximum temperatures: Dawson, 26-40; Fort Simpson, 22-30; Victoria, 22-42; Vancouver, 28-40; Barkerville, 18-48; Calgary, 6-41; Edmonton, 10-38; Prince Albert, 10-38; Winnipeg, 22-36; Port Arthur, 20-36; Pelly Sound, 36-49; Toronto, 34-62; Ottawa, 32-64; Montreal, 38-62; Quebec, 32-60; Halifax, 30-42.

Probabilities. Lower Lakes and Georgian Bay—Easterly winds and showers, followed by northerly winds and colder at night.

Ottawa and Upper St. Lawrence—Easterly winds, becoming unsettled, with showers.

Lower St. Lawrence and Gulf—Northerly winds; fair and cooler.

Maritime—Southerly to easterly winds; fair; not much change in temperature.

Lake Superior—Northerly winds; fair and cool.

Manitoba, Saskatchewan and Alberta—Fair, with rising temperature.

Canadian Pacific Cobalt Development Company

THE ORES ARE HERE

971 Acres of Rich Mining Lands in the Very Heart of Cobalt District—Immense Opportunities Await Wide-Awake Investors—Remarkable Success of the First Issue of Treasury Stock at 12 1-2 Cents a Share—Stock Will Positively Advance in Price in Short Time—Properties Strongly Endorsed by Reputable Mining Engineers.

971 ACRES OF MINING LANDS, in the very heart of the richest Cobalt district, 27 claims in all. Surrounded by mining properties which have already made their owners and stockholders rich men. Not one of these noted properties offered as promising prospects as the lands of the CANADIAN PACIFIC COBALT DEVELOPMENT COMPANY, LIMITED.

Think of it, Mr. Investor, 971 acres, 27 properties, which have already been passed upon by the most trustworthy engineers in Cobalt, and who state upon their reputation as responsible mining engineers, that "Every one of the 27 claims should prove valuable mining properties if systematically developed."

It is emphatically demonstrated that the people, rich and middle classes, have the utmost confidence in this great mining proposition and realize its immense importance as a sure investment. Without the shadow of a doubt fortunes are going to be made by those who are quick enough to buy stock at 12 1-2 cents. Remember.

Only 500,000 Shares Treasury Stock is Offered at 12 1-2 Cents a Share, and You Should Buy Now.

The advance in price is coming. It's but a short period off. The low rate of shares gives the large buyer the chance to purchase and does not keep out the man of moderate means. It distributes the stock widely—which is best for all concerned.

Authorized Capital \$3,500,000. Par Value of Shares \$1.00. Fully Paid and Non-Assessable.

PROSPECTUS AND MAP WILL BE SENT ON REQUEST.

SCARBORO BEACH READY FOR THE HOLIDAY CROWD

New Park Will Have Its Wealth of Amusement in Operation by the 24th.

The Scarborough Beach Amusement Park will be ready for a grand opening on May 24. This is the definite assurance from the engineer in charge.

On Saturday the management entertained a party of Toronto newspapermen, and took them on a tour of inspection. People who have not seen the grounds during the last two weeks can have no idea of the progress which has been made.

The army of workmen have taken the millions of feet of lumber and constructed some of the most huge and novel devices heretofore to change spare petrol cash into concrete amusement to suit both young and old.

Scene is the largest in America, and travelers by it will be whisked out of the bright daylight after their mad whirl on the undulating track, into a veritable Aladdin's cave of delight, where jewels shimmer from hidden lights and painted nymphs disport themselves in the blue depths of painted moods and pools.

A similar subterranean maze thru which the public will float in boats is of such interminable length and so full of awe-inspiring novelties that many of the newspapermen contemplated their past lives and thought seriously of retracing their way back before they finally came over the ramps and into the sunlight again. Other novelties so startling as to beggar description are under way.

Speaking of the main attractions and the large cafe, which covers an area of about 300 feet by 100 feet, with a double deck and spacious verandahs.

The management intend to make this a main feature of the park so that within a few weeks it will be possible to step onto a steamer as if from a steamship service along Yonge-street, to the amusement park.

It will be inaugurated between the park and city, or into the passing street car and spend a day of delight at Toronto's finest amusement park.

Fred Richardson, on behalf of the board of directors, said that it was the intention of
