

FOSTERER OF RECIPROCIETY

Lord Pauncefoot Does Not Despair of Effecting a Scheme Between Canada and United States.

JOINT HIGH COMMISSION TO MEET

Will Bring Back a Nicaraguan Treaty That Will Be Acceptable to All.

London, July 17.—Lord Pauncefoot, in an interview, says: It seems altogether likely that the British Chamber of Commerce has petitioned for reciprocity with Canada. This I regard as a most hopeful sign. It will be one of my aims when I return to the United States to foster this desire for a closer commercial relationship between the Dominion and the United States.

"In spite of the attitude of Canada towards Newfoundland and in spite of the trade difficulty of both Canada and Newfoundland in dealing with the United States, I by no means despair of effecting some sort of reciprocity scheme, which, in plain and amicably settled, and the West Indian treaties have been arranged, will bring Great Britain and the United States even to a better basis of common understanding than exists to-day."

Referring to the Nicaragua Canal, he said that when he returned to the United States in October he hoped to take a treaty that would meet the views of President McKinley and the British Cabinet.

When asked if the Joint Commission was likely to sit again in Washington, he replied: "Yes, I think that it will, although this will not occur until after my return. The Joint Commission has thrashed out many points of difference between Canada and the United States, and the inability to agree as to the Alaska boundary and the death of Lord Herschell appeared, perhaps, to nullify the commission's labors."

HARVEST ABOUT AUG. 10.

Reports Show That Wheat Crop in Heavy Excess of Requirements.

Winnipeg, July 17.—(Special).—Mr. McNicoll remains here till after the exhibition. The C. P. R. is making enormous preparations for the coming harvest. No mechanic who applies for work at the shops is refused. The ordinary rate of about 45¢ is at present increased by nearly 100, and the company wants more mechanical superintendents than returned from a trip to Calgary. He says the crops are simply enormous. Wheat is growing in parts where it has never been known before, and the crop is not heavy here and light there, but heavy everywhere. Magnificent samples of growing wheat have been received from Newpawa and Franklin districts by the Ogilvie Milling Co. The heads average over five inches in length, and are very heavy. From the samples sent, the average would be in the neighborhood of 45 bushels to the acre. The wheat is in such advanced condition that it will be ready for harvesting, if the weather continues about Aug. 10.
