

## Don't Spend All You Earn

It's a good thing for a man to sit down and figure out just how his money goes; and then how money grows when he begins to save systematically. Cents, quarters and half dollars take wings when they are used for unnecessary things—but they grow rapidly when properly cared for. \$1. opens a Savings Account in this Bank. Deposits of \$1. are welcome and interest is paid on them.

## VOTERS' LISTS, 1921

Municipality of the Village of New-  
bury in the County of Middlesex

Notice is hereby given that I have transmitted or delivered to the persons mentioned in Section 9 of The Ontario Voters' Lists Act the copies required by the said section to be so transmitted or delivered of the list made pursuant to said act, of all persons appearing by the last revised assessment roll of the said municipality to be entitled to vote in the said municipality at elections for members of the Legislative Assembly and at municipal elections, and that the said list was first posted up at my office in Newbury on the ninth day of August, 1921, and remains there for inspection.  
And I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law.

ANNIE LAURIE TUCKER,  
Clerk of the said Municipality.

## TOWN AND VICINITY

Miss Phemia Harris has resigned her position as assistant in Glencoe post office.

Will Moss, Leslie Reeves, Harold Loosenmore and Will Stuart are camping at Tyrconnell.

The katydids and treefrogs have begun turning up in the last few weeks ahead of the usual time.

Poplar Hill and Appin baseball teams will play a game at Appin on Friday evening, commencing at 5 o'clock.

After August 1st municipal clerks must make a monthly report of all fires to the Department of Insurance at Ottawa.

"I look for an early autumn," remarked an old weather sharp today. "The other night I heard the call of the katydid, and that always means a near frost. There will be frost in side of 30 days, mark my word. The summer is about gone. Early summer and early fall you'll usually find."

Prisoners recently discharged from the Middlesex county jail say that the hair of "Jack" Williams, one of the men charged with the murder of Russell Campbell at Melbourne in April last, is turning white, and that he is constantly drawing maps of the bank at Melbourne and the scene of the tragedy.

Wabash trains were forced to detour by way of London Monday owing to a derailment a mile east of Glencoe. Grand Trunk and London & Port Stanley Railway lines were utilized by the trains from 11.50 o'clock in the morning until 7 o'clock in the evening. Six freight cars were off the track and badly wrecked.

The Diamond Jubilee of Kintyre Presbyterian church will be celebrated on August 14 and 15. On Sunday Rev. Alex. McGillivray of Toronto will preach. Services will be held in English at 11 a.m. and 7.30 p.m., and in Gaelic at 3 p.m. On Monday evening there will be a social and reunion, for which an attractive program is announced.

Over 400 people attended a barn raising at J. B. McKillop's, near Wal-

lacetown, a few days ago. All went well and the ladies provided a splen-

did supper at tables spread on the lawn. People were present from all over Dunwich and the surrounding townships and counties, some being there from Duart, Morpeth, Strathroy, Tait's Corners and Turin.

Glencoe's main street is all torn up. The contractors for the street paving began operations on Monday morning with a large force of men and teams. Frank Abbott leading off with a grubbing plow attached to his powerful tractor. The work is being done almost entirely by local labor. For a few weeks the public will have to put up with a little inconvenience, but the improvement will more than compensate for this.

A number of the teachers of Glencoe and vicinity took advantage of the summer course in agriculture given at Guelph. They completed the course on August 5th and report it enjoyable as well as profitable. Misses Ada Reynolds and Margaret Coulthard have completed Part II. of the elementary course, and Misses Jessie McAlpine, Ellen McKellar and Elizabeth Leitch and Ernest McKellar have completed Part I.

## Decayed Shell Fish.

In most of the bays indenting the shores of Prince Edward Island are found extensive deposits of mussel mud, so called locally, being organic remains of countless generations of oysters, mussels, clams, and other shell fish. The shells, usually more or less intact, are found embedded in dense deposits of a mud-like substance, and this combination is a fertilizer of high value and potency. It supplies lime and organic matter besides small quantities of phosphorus and alkalies. An ordinary dressing of it has a very marked beneficial effect on the poor and most exhausted soils. The shells decay slowly year by year, throwing off a film of fertilizing materials. The deposits around Prince Edward Island vary from 5 feet to 25 feet in depth. They are taken up by dredging machines, worked from rafts in summer or from the ice in winter.

## Clean Threshing Saves Wheat.

Members of the farm bureau of Kitchissippi County, Minn., last year saved \$77,000, or about \$500 to each thrashing machine, by using tight-bottom racks, canvas under the feeder, cleaning up when required and after each setting of the machine during the thrashing season. A conservative estimate of the saving by clean thrashing in this county was \$7,500 bushels of wheat, 20,400 bushels of oats, and 10,000 bushels of barley.

## ANOTHER VICTIM OF RHEUMATISM

Entirely Well After Six Weeks' Treatment With "FRUIT-A-TIVES"

MR. AMEDEE GARCEAU

82 Hickory St., Ottawa, Ont.

"I was for many years a victim of that terrible disease, Rheumatism. In 1913, I was laid up for four months with Rheumatism in the joints of the knees, hips and shoulders and was prevented from following my work, that of Electrician.

I tried many remedies and was under the care of a physician; but nothing did me any good. Then I began to take 'Fruit-a-tives' and in a week I was easier, and in six weeks I was so well I went to work again.

I look upon this fruit medicine, 'Fruit-a-tives', as simply marvellous in its cure of Rheumatism, and strongly advise everyone suffering with Rheumatism to give 'Fruit-a-tives' a trial."

AMEDEE GARCEAU.

## FAIRS ADVERTISE YOU

Both the Community and the Exhibitor Get Publicity.

It Pays to Let Others Know That You Have the Goods — Fighting the Hessian Fly—The Silo a Proven Utility.

(Contributed by Ontario Department of Agriculture, Toronto.)

To the general farmer who grows good grain for seed, to the specialist in garden and truck crops, and particularly to the live stock man, the Fall Fair offers an opportunity. It pays to advertise; the Fair is the place where the people see the goods produced, and seeing is believing. Moreover, the papers report the winnings, and through these the exhibition gets a large amount of advertising free which would otherwise cost him a considerable amount of money. Winning in close competitions under a competent judge adds dollars to the value of stock shown and increases the market price of any commodity, as well as giving the exhibitor a standing not only in his own community but over a section of country corresponding to the size and influence of the show at which prizes are won. The Fair is a good place to make sales. Prospective buyers see the good exhibits made and enquire about the breeding stock at home. Stockmen show at Fairs largely to make sales rather than to win prizes, although the latter is a factor in the sales and they are not disappointed as evidenced by the growing interest in the Fall Fair. Showing at the Fair, coupled with a judicious newspaper advertising policy, which should never be neglected, is good business. The two go together and work hand in hand. It pays to let others know of your good stock. Use printers' ink and show at the Fall Fair—Wade Toole, O. A. College, Guelph.

## Fighting the Hessian Fly.

Growers of winter wheat are advised to practice immediate control measures advocated by the Department experts. The following eight cardinal control measures, if rigorously enforced and adhered to by every grain grower, will prevent the introduction and spread of the pest:

Do not sow wheat on stubble if possible to avoid it.

Plough under all infested stubble and ruined wheat where practicable soon after harvest, especially where this does not interfere with the growing of clover, and forage grasses.

Destroy all volunteer wheat by harrowing, disking, ploughing, or otherwise.

Plough all winter wheat land as early and deeply as existing conditions permit, and prepare a thoroughly pulverized and compacted seedbed.

Conserve moisture against a period of drought at seeding time.

Use the best seed procurable.

Keep the soil in good till and, most important of all, sow winter wheat during the fly-free period as advised by local farm advisers or experiment stations.

Work in co-operation with your neighbor in fighting this pest, as community action is essential to insure complete success.

Late sowing is recommended, but not too late sowing, as the latter is as disastrous in its ultimate results as is too early sowing. Uncle Sam's grain-disease doctors say that the safe date in a time of normal rainfall usually coincides, in any one locality, with the preferable time for sowing to bring maximum yield. For example, grain growers in northern Michigan and Ontario are advised to sow after September 1, while the producers of southern Michigan and northern Ohio will escape fly infestation if they plant their grain about September 20.—U. S. Weekly News Letter.

Silo Almost as Useful as Barn.

The silo is rapidly becoming recognized as a necessary part of the farmer's equipment. A farm without a silo, at least in the corn area, is no longer up to date. The rapid adoption of the silo is accounted for by recognition of its advantages.

If corn is cut at the proper stage and put into a good silo, the whole corn plant is eaten.

Silage is more convenient to feed than is any other rough feed commonly used on the farm.

Silage is both palatable and succulent.

The addition of a succulent feed to a ration increases the digestibility of the dry feed eaten.

With a silo it is possible to save corn that might otherwise, owing to immaturity, be largely wasted.

The silo not only provides excellent feed in winter time, but furnishes a means of keeping more for summer use feed of high quality.

## August Farm Hints.

As the grains are harvested the land which is not seeded should, when practicable, be cultivated on the surface so as to germinate the scattered seeds, hold the moisture, and better fit the land for ploughing in the autumn.

Sod land calculated for winter wheat should be ploughed early in the month and harrowed every week or ten days in preparation.

When picking wild flowers do not take the whole plant. Remember leaves and roots are needed to grow again next year.

We hear much these days about planting shrubbery and flowers and establishing good fruit and vegetable gardens on the farm. They all pay in money value as well as added comfort.

## Grow More Fall Wheat

Fall wheat is a safe and profitable money crop.

1. Because a well-rooted, well-topped wheat field rarely fails to come through to a profitable crop.
2. Because
