

End  
 oven  
 cleaning  
 with our  
 30" Baycrest  
 Continuous  
 CLEAN  
 oven  
 only,  
 \$269

Here it is the oven you've been waiting for. No more agonizing over a dirty oven... this model by Baycrest will be presentably clean at all times because of the special coating on the oven walls.

- 4 hour electric timer - reminder to handle your surface cooking
- Automatic rotisserie for the perfect cooking of meat.
- Four infinite heat plug-out elements
- Full automatic clock-controlled oven and a timed appliance outlet.
- The heat dispersal in the surface elements is even at each setting. Simmer does not mean just the inner ring heats.

**CONTINUOUS CLEAN OVEN:**

The oven in this Baycrest range will be presentably clean at all times. There is no intense heat required for the cleaning process; the continuous clean oven burns off, oxidizes or vaporizes the soil whenever the oven heats during a normal cooking procedure. No special controls - no special attachments. The cleaning is actually done by a special coating on the oven walls.

**INFINITE HEAT PLUG-OUT ELEMENTS:**

Each element covers a porcelain drip bowl - should any spill occur, simply unplug the element to clean the bowl.

**CLOCK-CONTROLLED OVEN:**

This means you can use the oven to cook a meal while you are for the afternoon. Just set the START dial for the time you want the oven to start cooking, and the STOP dial for the time cooking should be completed.
