

partment.

er would, do at home. He pointed out that he could not get his children to do the necessary in his own garden. Then could the teacher succeed in getting the same children to work in the garden in school. The teacher had this wisdom by asking if he had the object to her having part of the garden plowed and attempting the work. He would not go so far as that, but kind enough to warn the teacher that the whole thing was sure to be a

school garden was plowed and the pupils did the work and was eager for the time to come when work was to be done whether planting or weeding. No difficulty got pupils to leave their tasks so interesting as even grammar, or arithmetic, in order to work in the garden and learn about weeds, transplanting, etc.

school was located on one of the roads and those who passed by noted improvement, no papers about;—the Progress Club attended to it. There were flower beds in front of the school garden at the side.

Next year a fence was built in front of the school garden and the teacher did not ask for it; new ones were built at the suggestion of the teacher. These closets were kept clean—the Progress Club to that.

Secretary, however, was game and cross. He is now one of those who are sparkles and whose face takes a kindly look when he sees a motor in front of the school to admire the improvements.

At the same school they frequently get a meal at noon made partly from the product of the garden. The result certainly improved both inside

Others How You Do It!

are teachers in almost every state who have been outstandingly in some particular branch of agricultural work. Perhaps it was in connection with the school garden conducting a special fair at the school. We know of one teacher who took her pupils to the farm of a leading live stock and there taught her in another instance a teacher at a school long enough for the to go out to the road and guess the weight of a load of hogs that was the shipping point. When the hogs returned he announced the weight. These are only a few and we want teachers, who take an interest in agriculture, to write a letter to this Department and state the benefit of their experiences.

endar appeared in Nature's last week telling just when to return.

parents in the section to take part in the school garden, and in the grounds. When this is done the results are more

how the school grounds can be improved and what should be planted at till spring.

CANADA PAINT INSECTICIDE

Spray, If You Want Good Crops.

C.P. Dry Powdered ARSENATE OF LEAD contains from 31 to 33 per cent Arsenic Oxide, and does the work of twice the quantity of the paste material.

It kills the orchard pests every time—destroys all leaf-eating insects—is easy to use—stays in suspension longer—is more economical to ship—and keeps its strength indefinitely.

PARIS GREEN for Potato bugs—C.P. Arsenate of Lime (KALCKILL)—C.P. BUG-O-CIDE are insecticides that give results every time.

Ask your dealer for the C.P. brands and write us for our Spraying Booklet.

Turn Waste Into Power

A motor with poor piston rings is like a steaming teakettle—it lets power escape unused. A loss at every stroke of the piston. Stop this drain—convert your waste into power. Install a full set of

McQUAY-NORRIS LEAK-PROOF PISTON RINGS

Increase Power—Decrease Carbon Save Gas

The rings with a record of eight years successful performance behind them. Power producers because they create uniform pressure all around the cylinder wall, leaving no place for the power to slip past.

Wherever you are you can get McQuay-Norris LEAK-PROOF Piston Rings to fit any car, truck and tractor. Jobbers and supply houses in over 300 distributing points carry complete stocks of standard sizes and over-sizes, backed by a factory stock of 2,000 unusual sizes. The rings are ready, awaiting your order.

Send for Free Booklet
"To Have and to Hold Power"—a simple, clear explanation of piston rings, their construction and operation.

Manufactured by
McQuay-Norris Mfg. Co., St. Louis, U. S. A.
Manufactured in Canada by
W. H. Bamfield & Sons, Ltd., 374 Pope Ave., Toronto.

McQUAY-NORRIS Super-Ring RINGS

A special ring for engines that pump oil. Used in top groove only of pistons to control excess oil, with McQuay-Norris LEAK-PROOF Piston Rings in lower grooves to insure maximum compression and fuel economy.

Most Accurate Ever Invented

Are you content to go on in the old-fashioned way using all your available farm help planting by hand, limiting your acreage because of labor scarcity, and keeping your help away from other pressing work in busy season?

Get an O-K Canadian Dial Planter and get your planting done accurately without seed waste and in a fraction of the usual time.

The O-K Canadian is the only planter that has the endless cup seed dropping device. It does not pick or bruise the seed. It is noted for being the most accurate system yet invented.

From the roomy steel hopper the seed is picked up by cups and deposited on revolving dial plate. This makes it simple to make any corrections necessary. Absolutely one piece of seed goes to each hill, thus making your seed go farther. Five years' tests demonstrate accuracy close to 100 per cent.

The O-K Canadian has equipment for correct depositing of fertilizer. Furrows are opened by two shoes. The first opens a trench to receive the fertilizer. The second shoe opens the furrow deeper, mixing fertilizer thoroughly with earth, thus protecting seed when dropped. This is correct and necessary for proper fertilizer results.

You certainly ought to get full particulars about the O-K Canadian, the machine that will enable you to put in more acreage into this profitable crop at low cost. Write to-night for free literature giving full particulars of O-K Canadian Planters and Diggers.

O-K Canadian Potato Planter

Canadian Potato Machinery
