"GALT" SHINGLES

This ingenious and yet
simple and easy-fitting con-
struction makes a "Galt"
Shingle roof absolutely weath-
er-tight. It prevents wind
from driving rain or snow up
and out of the top end of side
lock, as so often happens with
ordinary metal shingles. There
is not even the smallest open-
ing—this cannot be truthfully
claimed for any other steel
shingle.

The material is the Best British
Galvanized Steel embossed in
a bold Gothic Tile pattern—"a
thing of beauty and of joy for-
ever." Catalog "B-3" gives com-
plete details of this newest and
best shingle.

GEO. DAVIS & SONS, ALTON, ONT.

SHORTHORNS AND LEICESTERS.—Present of-
fering: Eight choice bred one and two year
old heifers, also bull calves. Choice shearing rams
and ram and ewe lambs. Show material. Write:
W. A. Douglas, Tuscarora, Ont. Caledonia
Station.

A HIGH-CLASS YOUNG FOR SALE, sired by
Shorthorn Cow imp. Ben Lomond;
also a heifer calf of
good quality. Prices
reasonable. **Stewart M. Graham, Port Perry,**
Ontario.

Soft snaps are seldom productive of
hard cash, and short hours generally
make long days.

QUESTIONS AND ANSWERS.

Miscellaneous.

WHERE TO GET FERTILIZER.

Could you tell me, through the columns
of your valuable paper, where I could
get land fertilizer? **W. C.**

Ans.—Consult the advertising columns
of "The Farmer's Advocate," issues of
last spring.

DOG HAS WORMS.

Have a pure-bred collie pup, about 7
weeks or 2 months. The last two days
is passing worms about eight at a time,
three to five inches long, white and stiff.
R. J. C.

Ans.—Dog is suffering from worms.
Fast for 12 hours, then administer 1
dram areca nut. Repeat treatment in a
week if necessary.

CLIPPING NEW-SEEDED ALFALFA.

I seeded down a field of alfalfa, which
is a good catch, and very strong. Would
it be safe to pasture it a little, or would
it be better to clip it, and when should it
be clipped, now, or a little later? Should
it be clipped short with the mower, or
should I raise the cutting-bar off the
ground a few inches?

SUBSCRIBER.

Ans.—Pasturing a newly-seeded alfalfa
field, while not always disastrous, is at-
tended with considerable risk of injury,
and sometimes of outright winter-killing,
hence we should advise clipping now,
with the mower-bar tilted well up.

DRYING A COW.

A four-year-old Holstein cow, thin in
condition and due to freshen October 23,
is now giving 34 pounds of milk per day.
How long is it advisable to have this cow
go dry, and what means should be taken
to dry her up? **FARMER.**

Ans.—If sure she is in calf, endeavor to
dry her off two months before date of
freshening, but if you fail to succeed be-
fore she commences to "spring bag," give
up the attempt forthwith, and milk her
right through. Would advise stabling the
cow at once, feeding on timothy hay or
straw, if necessary, milking her out not
quite clean, then, when the flow is
checked, milking only once a day, and
then, when deemed safe, once every other
day, or irregularly and partially, till she
is dried off.

INSECTS UNDER DEAD BARK.

I am sending you, under separate cover,
a piece of bark from one of my apple
trees. What is the disease? What the
remedy, if any? Also, can I prevent
other trees from becoming affected the
same way? **W. L. A.**

Ans.—This condition of the bark is the
result of one or other causes that cannot
be positively named without further in-
formation. The circulation of digested
sap is cut off above, and the thin-growing
layer under the outer bark dies and be-
comes the medium for the growth of the
several organisms that we find on the
sample sent. Is the effect on several
trees, or on one only? May the dis-
eased part have been exposed to excessive
sun heat by severe pruning? Are there
signs of insect-burrowing above the dying
bark? **J. D.**

MAYWEED—BURDOCK.

1. Please identify weed enclosed and
give best way to get rid of it. One
field is covered with it, and some all
through neighborhood.

G. M. J.

2. How can I kill burdocks; have cut
for years, and they grow up again?

J. D. McC.

Ans.—1. The weed presented is stinking
Mayweed; also called dog fennel. It is
an annual or winter annual. The seeds
do not live long. Eradicate by sowing
clean seed and preventing plants from go-
ing to seed; clean up waste places about
farmyard and sow with clean grass seed.

2. Burdock can be killed by cutting be-
low the crown or spudding out in wet
weather. A handful of salt applied after
cutting in hot, dry weather, will kill it.
Seed waste places where it grows to
grass, and keep burdock out until grass
is well established.

A Model Kitchen

With our forefathers the hearthstone was the centre of the
home—the special sphere and pride of the housewife. Here all her
talents as a home maker found full expression. Here before the great
hearth—whose flue kept the air as pure and clean as the fresh scoured
tiles—she prepared the great white loaves—the delicious flakey brown
pastry—the roasts whose juicy tenderness made her simplest meal
a feast—

Have a kitchen *you can always be proud of*—always clean and
sweet—always free from stuffy, smelly air—always cool.

Have *meals you can always be proud of*—everything just
browned to a turn—never over-cooked—never under-cooked—always
just right.

The Wonderful Oxford Economizer

guarantees such a kitchen—such meals—always.

The Oxford Economizer sucks all the foul air from the room
just like the old-fashioned chimney, leaving it sweet and pure.

It gives you an even, steadier fire than ever before known.

It insures the best results in cooking always.

It saves you at least 20% of your coal bill in real dollars
and cents.

It is the most remarkable device ever found on a cook stove.

Yet this is only one of the special features found only in

Gurney-Oxford Stoves and Ranges

There are many others, each one of which will save you
time, money and inconvenience. Send us the enclosed coupon,
mentioning whether you are interested in a steel or an
iron range and let us send you our book on how to save
time and money in *your* kitchen.

PEREMPTORY SALE of SHORTHORNS

Owing to the destruction by lightning of
our barns and stabling, together with the
season's crop of feed, we will sell by auction,
without reserve, at our farm, 3 miles from Lon-
desboro, G.T.R., 5 miles from Blyth, C.P.R.

Thursday, Sept. 15

**30 HEAD OF REGISTERED
SHORTHORNS**

6 young bulls and 24 females of superior
milking strains, including cows which have
produced over 50 lbs. milk daily, and over 16
lbs. butter in a week. 12 cows and several heifers are forward in calf to the Dryden-bred bull,
Lavender Lorne = 68706=.

Owing to the limited time of notice no catalogue will be published, but cattle will be sold on
their registration certificates.

Sale to commence at 1.30 p. m. Noon trains at Londesboro and Blyth will be met, the
latter by Perdue's Livery.

Terms:—6 months' credit on bankable paper. Discount at rate of 6 per cent. per annum for
cash. All will be sold to highest bidder.

WM. GRAINGER & SON, LONDESBORO, ONT.

ORCHARD GROVE HEREFORDS

Young bulls and one- and two-year-old heifers, of show-ring quality and most fashionable
breeding; thick-fleshed, smooth and even.
