B. E. BULL & SON,

BRAMPTON, ONTARIO

HASSARD'S HORSES

I have just landed a fresh importation consisting of Clydesdale and Hackney stallions and Clydesdale fillies, direct from Scotland. The stallions are sired by such notable sires as Lord Fauntleroy, Revelants, Baron of Buchlyvie, Sir Everest and Prince Thomas; these stallions range from 2 years to 6 years old and are horses with lots of size and extra quality. The fillies are two and three years old and are sired by such horses as Prince Alexander, Benedict, Prince Attractive, Prince Maryfield and others. These are good big fillies with a lot of quality—the kind to take to the show ring. In fact, it is said by those who have already seen them that they are the best bunch that has ever come to the province. I have 18 more fillies coming that will reach Deloraine by November the 15th; further particulars of them later. Come and see me or write. I am always ready for business with small profits.

F. J. HASSARD, V. S., DELORAIN, MAN.

ESTABLISHED AT LICHETER, ENGLAND, IN 1800.

BLATCHFORD'S CALF MEAL

Resembles new milk as nearly as possible in chemical composition. Used throughout the world. Halves the cost of raising calves. Prevents scouring. Rapidly matures them. Send for pamphlet "How to Raise Calves Cheaply and Successfully Without Milk."

SHEPHERD PONIES

Sixteen ponies recently imported for sale. Breeding and quality of the very best. My prices are very reasonable.

W. M. S. CURRIE, Medicine Hat, Alta.

the end of the incubator that the chicks obtain access to the nursery, leaving a small hole next to the door large enough to admit a chicken. Hang a heavy cloth across the door, admitting as little light as possible. Very few chicks will find their way to the nursery when the cloth is across the door. After several chicks are dry remove a small portion of the curtain at the end where the screening is placed. The chicks that are dry being stronger will immediately make their way to the light and fall into the nursery. When they are all in the nursery, close the curtain. If desired, a little light may be admitted at opposite end of the machine to draw the chicks from nursery entrance. Try this plan this season; it may save you many chickens. When the hatch seems to be nearing a close, take any eggs that are left and place them under a hen, if you have any sitting, as they will seldom hatch, and the last chickens are always the weak ones, crooked beak, etc. If they hatch under the hens be very careful in placing them in the brooder with the rest as a few lice will soon breed. The chicks have enough to bear without lice.

Remove the tray and leave the chicks in the incubator for forty-eight hours, keeping the temperature between 90 and 100 degrees. After the chicks have been removed, clean the droppings out before they become dried. We have tried both hot-air and hot-water incubators, and find little difference in the results. The hot-water has the advantage of being easier to regulate, as it will not become cool as quickly as the hot air. In purchasing be careful in your selection, as there are good and bad of both kinds.

**SMALL FRUITS ON THE FARM**

This week's Topics for Discussion take up a question that should be studied and acted upon by every farmer in the Canadian West. Why should we go without fresh fruit or buy inferior fruits at exorbitant prices? Some have claimed that small fruits will not survive the rigors of a Western Canada winter. Experience in all parts have shown that such is not the case. With a reasonable shelter belt, well-prepared soil, precautions in late summer to check growth of the bushes in the fall and to provide some growth or a mulch that not only will serve as a protection but aid in holding the snow that falls, there is no reason why all should not have small fruits enough for home use and some to sell.

Our cash awards have been made in the order in which the letters appear.

RASPBERRIES AND OTHER BUSHES

EDITOR FARMER'S ADVOCATE:

Gooseberries and currants may be set out and handled alike, save for the fact that gloves are more requisite in handling gooseberries. For raspberries a slightly different method should be employed for the best results.

Preparation of soil: Select a clean piece of land, summer-fallow preferred. Have the land sloping just a little toward the northeast if possible. The next best slope would be toward the east, or southeast. A slope to the west is not usually desirable, as it leaves the fruit exposed to our hottest sun and winds. Avoid planting the fruit close to a slough. It may do well for a time, but if a wet spring comes the bushes will all be drowned. No water should stand long about them, though it does not hurt them to be flooded for a few days.

The best time for setting out small fruits is in the spring, as soon as possible after the ground is well thawed

Kill the Ticks

Ticks are not only distressing to the animal but injure the fleece, and can be speedily destroyed with one part of

**Dr. Hess Dip
and Disinfectant**

to 80 parts of water. This preparation not only kills the ticks, but destroys the poisonous germs of disease. Dr. Hess Dip and Disinfectant is also excellent for disinfecting barns, cow stables, hog pens, chicken yards, sinks, drains, cellars, cess-pools, etc.

It also kills lice, mites, sheep ticks, fleas and all parasitic skin diseases, such as sheep scab, mange, eczema, etc.

One of Dr. Hess Dip and Disinfectant to 70 parts of water meets the United States Government requirements for official dipping.

If your dealer cannot supply you, we will. Write for circular.

Have de Grace, Md., Dec. 7, 1901.

Troy Chemical Co., Binghamton, N. Y.

During 1901 I had two horses go wrong, one with a "bone spavin"; she was dead lame. The other with two "leg spavins" and a big knee.

After reading your advertisement week after week I had Mr. Falley order for me one bottle of "Save-the-Horse," which I thought I would just simply try. I used it on both cases, following your directions. I gave them both good work until I had consumed the one bottle only, which took just two months. And today I shall say just one year has elapsed since the treatment, that they both are as sound as a new dollar and neither one has taken a lame step since. EDWARD T. WELSH

\$5.00 Send for copy, booklet & letters from business men & trainers on every kind of case. Permanently cures Spavin, Thoroughpin, Ringbone, Heel Bone, Curb, Splint, Capped Hock, Windpuff, Shoe Blisters, Injured Tendon & all Lameness. No scar or loss of hair. Horse works as usual. Dealer:—
