which appeared in the Herald and Pilot of vesterday, signed by the Chairman and Secretary of the Montreal and Vermont Junction Railway, and addressed to the members of the Provisional Committee, well worth the attention of our readers. We learn that this line of road, which connects with the Burlington and Rutland Railroad at Highgate, Vermont, and with the Missisquoi Valley, Stan-atead, and Passumpsic Railroad, at St. Armands, will place Montreal in a direct Railway communication with the New England States and Hudson Valley thereby bringing to this city the influ ence, assistance, and traffic of over 1500 miles of Railway, that have cost American enterprize \$45,000,000. Parliament granted a charter in 1849, and an accurate survey was made in 1850. The line from Montreal to Highgate is 41 miles long, and from St. Johns 241 miles, and the cost will only be about £4,000 per mile. The line crosses the River Richelieu at the foot of Navigation, between St. Johns and St. Athanase, and thus obviates the necessity for bridging the navigable waters of Lake Champlain. This is a most important point in favor of this line, because the commerce of the Lake is one of very great consequence, both to Canada and the State of New York; and though now only in its infancy, so far as Canad is concerned, is rapidly increasing. A comparative statement of distances given, by which it is proved that 20 per

time, are saved by the Montreal and ermont line, between the former place and Burlington, and that the adoption of this route will save 25 cents on the freight of each barrel of flour. One of the great advantages of this line are, that it opens up a rich and densely populated country; and that the inhabitants of this part of the Province are fully sensible of the advantages to be derived from its construction, is evidenced by the fact, that the merchants and farmers in the County of Missisquoi, St. Athanase, and St. Johns, have stepped forward and spiritedly offered to

raise a sum equal to that which shall be

raised in Montreal, towards this line.

cent. in distance, and 50 per cent.

The citizens of Montreal are asked for £25,000—a sum sufficient to construct the sums derived from other quarters will be sufficient to put the line into operation in one year, thereby securing to Montreal, forever, the possession of the commerce of the St. Lawrence, and the maintenance of her present position as the great northern point for the transhipment of the produce of the Western facts speak for themselves; it remains to be seen whether there is sufficient public spirit to adopt the suggestion of Messrs. Pierce and Seymour.

We have received the British American Medical and Physical Journal for April. It contains the usual amount of original and extracted matter entirely on professional subjects.

We understand that a new Periodical is about to appear in Montreal, entitled the Provincial Journal of Literature, Science, and Ast-Reviews, Criticisms, and Belles Lettres.

We believe that a journal devoted to the Church of England will shortly make its appearance in this city, edited by a Clergyman, and under the sanction of the Lord Bishop.

The facts, so far as Team gather them; seem to warrant the conclusion that the contest will be mainly between McKenzin and Brown. These two are the siderable figure before the electors; they have ore to say than the others, and are, in fact, the brewdest men of the lot. It is not the first time that Mr. Boulton has run for Haldimand; to him a defeat will be nothing new. At the last elec-tion, McKimon polled but 48 votes. Mr. Case is no speaker, and is not creating a very terrible excitement. The same may be said of Turner. There remain Brown and McKenzie. The forme has in his favor the Warden of the County, but I do not attach much importance to that fact, especially as Wetenhall was beaten in Halton in spite of the combined exertions of the Warden of the day, and of the ex-Warden, in his favor. Nor is the Globe at all confident of Mr. Brown's success. Last week Mr. Brown gave notice that he should address the electors at Dunnville at a certain hour. When the time arrived, the electors assembled and earried a resolution that Mr. Brown should not be heard as candidate, on the ground that he had come uninvited; that he

previously been made to prevent McKenzie but after a good deal of discussion, and almost riot, it failed: For some days past a city journal has been giving currency to a rumor that there is some intention, on the part of Government, to close the Canals against American vessels. Telegraphic despatches have been received from the other side enquiring of the Government whether there were any truth in the rumored intention. The answer s said to have been, that the Government had not come to a decision on the matter. A deputation of gentlemen, connected with the commercial nterests of Oswego, has been in this city a day or two, to learn the intentions of the Government n regard to the closing of the Canals against American vessels; but the result of their enquiries has not transpired. I have also heard a statemen that the persons in charge of the Canal, leading into Burlington Bay, have been notified not to
