

## Municipal Council

## WEEKLY MEETING.

The Weekly Meeting of the Council held yesterday afternoon, 15th, was presided over by Mayor Smith, and the following members were present: Messrs. Callier, Ryan and Dwyer.

The Minutes of the last meeting were read and confirmed, after which a communication from Messrs. Dowling and Limited, asking that some arrangement be made in the arrangement for the watering of ships, was received. The case of ships being supplied with water at Murray's premises, was brought up by Mr. Ryan, and it was decided that the hydrant on the wharf, causing them considerable inconvenience and delay owing to the interfering with traffic in the loading and unloading of ships at their premises. The Engineer was asked to see what can be done.

Mr. Frank Penney, Beaumont St., Mr. Way, Atlantic Ave., wrote requests to the streets and also the alteration in house numbering. Both matters will receive attention.

Mr. J. Guy wrote complaining of the sanitary condition of stables, Dean's Avenue, and asking that some action be taken to have the nuisance removed. The Department of Health was written on the matter, and asked to report.

Mr. L. M. Knight complained of the condition of Goodview Street, which he said was both a danger and a nuisance to the public. The Engineer will make enquiries with regard to same. Mr. Bros. & Co. Ltd., informed the Council of their intention to construct a walk on the western side of John's Street, and asked if in that event the Council would be prepared to contribute towards the cost of same. The Council is unable to accede to their request.

The application of A. E. Hickman for permission to erect advertising boards at certain places in the city was deferred until further information is obtained as to the location, etc.

Mr. Arthur Stevenson submitted for the erection of a garage, Cook St., and asked that the electric power be provided, ventilation be provided in the building. Permit may be given in application to the office of the Engineer.

The City Engineer reported generally on the work of the Roads, Water and Sewerage Departments. He stated that water and sewer main extensions on both Hamilton Avenue and Rockport Roads were now nearing completion; also that the electric and telephone poles, as well as gas, Loblach Road, were being laid to the new line of street.

Several applications for the position of Plumbing Inspector were read and placed on file. The application of Mr. M. House to erect a one-story dwelling, Lower Bait Road, was refused.

The Medical Officer of Health reported four new cases of Typhoid fever in the city during the past week. With reading of reports of the Sanitary Supervisor, Waterworks Inspector, etc., and granting of requisitions from several departments, the meeting terminated.

## Another View of C. H. E. Syllabus

The Evening Telegram has been kind enough to give Mr. "Teacher" in your issue of the 11th, wishes to know what others think of the new C.H.E. Syllabus. For my part I do not see any harm in it, nor can I quite agree with him that History, Geography and Mathematics are the most difficult subjects. Geometry may be trying but certainly Geography can be made very interesting.

He (or she) further says what is the use of a pass without a diploma? Now that is the good of a diploma without a pass? A scrap pass may give a diploma but it takes solid knowledge to gain distinction and honors. My sympathy is certainly with "Teacher," but am inclined not to fault with the C.H.E. but with the conditions such as 30, 40 or even 50 pupils in sole charge. Schools of different classes, with Primary, Preparatory and sometimes Intermediate divisions, all in charge of one solitary teacher!

But to kick against the C. H. E. for irresponsibly raising the educational level does not appear to be fair; because if a candidate for the C. H. E. examinations be unable to score 30 or 40% in a subject then he knows very little about that subject.

Yours in sincerity,

T. M. SMITH.

## Shipping
