

## WESTERN ONTARIO.

**BRANT.**  
The rate of taxation for Paris has been fixed at 17 mills.

The construction of the new drill hall in Brantford will soon be proceeded with.

Paris Town Council has voted \$100 to the St. John's N.B. relief fund.

At Brantford on Tuesday Engineer O'Brien, of the Grand Trunk Railway, was arrested on a charge of manslaughter, in compliance with the verdict of the jury in the case of the lady Davis, killed at Onondaga on July 6. O'Brien was in charge of his train when arrested. Bail was found, \$500 on himself and two sureties of \$250 each. He will come up for trial at the next competent court.

At a special meeting of the Brantford Collegiate Institute board of trustees, A. W. Merrill, of Onondaga, was given the position of senior English master at a salary of \$1,000 per year, and Thomas Standing appointed junior teacher of mathematics at a salary of \$750.

Capt. White, architect for the Militia Department, met the officers of the Dufferin Rifles in Brantford the other night with regard to the erection of a new drill hall. It was announced that the Government had decided not to build the hall, but would contribute the \$10,000 which Parliament had voted if the officers would undertake the work. This was agreed to. It is probable the work will be begun almost immediately.

Mrs. Owen Hitchcock attacked the show bills which disgraced the dead walls of Brantford in her recent campaign under the auspices of the Royal Templars.

The mayor, who was in the chair, immediately pronounced that the indecent posters should be torn down or covered up.

**ESSEX.**  
The case of Rev. J. L. Ryckman and Mrs. Hall, in which the latter accused the young pastor of using language to her unbecomingly, was heard at the County Court Tuesday morning, and the colored population was well represented. Magistrate Bartlett said he thought the matter should be settled before coming to trial, and it was finally decided that the preacher pay the costs and the plaintiff withdraw the charge, which was done.

The will of the late Arthur Lidwell, of Pelee Island, has been probated. Personalty, \$8,576; realty, \$2,500.

The boy Jones, who so suddenly disappeared from Edgar's Mills a short time ago, has not yet been heard of.

**ELGIN.**  
Amasa Wood, St. Thomas, has uncollected, donated \$50 for the St. John's sufferers.

On Saturday about 125 persons gathered at the farm of Wm. K. Buchner, a little east of Courtland, the occasion being the annual reunion of members of the Cohoe family. Four generations were represented in Mr. Buchner's family, the old gentleman being now in his 82nd year, while Mrs. Buchner is 73, and both are hale and hearty. Wm. Cohoe, of Norwich, is another who has passed the fourscore mark, and many of those present have lived more than the allotted threescore and ten years.

**HURON.**  
The meeting of the Huron Medical Association at Sarnia on Tuesday was largely attended by members of the profession from all parts of the country. In addition to the contributions to the programme by local members of the profession, an interesting paper on "Electrolysis in Practice," by Dr. C. R. Dickson, of Toronto, and another on "Epilepsy," by Dr. J. Ferguson, of Toronto, were highly appreciated. Arrangements were made for an annual picnic for Huron medical men and their families at Bayfield during the first week in August. The graduates of the University of Medicine and Pharmacy were also present to support the candidature of Dr. Wright, Atkins, McFarlane and Cameron at the coming election to the senate of the Provincial University.

**HURON.**  
What might have proved a fatal accident to the little two-year-old child of John Hurd, Bayfield, turned out to be a very painful misfortune. The child got hold of a knife, and was running across the field with it when he fell. The blade struck his mouth and pierced deeply into the roof, causing an ugly gash. A doctor was called in and dressed the wound.

While the two sons of Joseph Abel, Seaforth, were out amusing themselves the other day and making use of what is known as an air gun, the ball struck a tree and, glancing off, hitting Abel in the eye, injuring it severely. It is not known yet whether the eye can be saved.

**KENT.**  
The Erie and Huron extension to the Rondeau piers will be fully completed by Aug. 15.

Electric street cars and light combined are now being talked of for Chatham.

The Chatham chief of police has received a letter from a Terre Haute, Ind., attorney asking information of one Jackson Brown, a colored preacher, supposed to be in that vicinity.

The Kingston correspondent writes: Mr. Kemp's little daughter Ella, aged 10, had her leg broken by a vicious cow Saturday. The limb has been set and the child is doing well. Kemp is a farmer on con. 11.

**LAMBTON.**  
Keyser postoffice is the last and most of the mail now comes to Arkona.

Walnut cheese factory shipped 162 boxes of June cheese on Thursday.

On Tuesday at Watford Gus Brown's little boy and girl were sitting in a road cart in front of Howard's Hardware store, when a bicycle passed the horse and both children were thrown out on the street. The little girl had her thigh bone broken in two places, but the little boy escaped with a few bruises.

**MIDDLESEX.**  
The next meeting of the township council of McGillicuddy will be held Aug. 1.

Dr. W. J. Weeks, of Thorndale, who was thrown from his buggy one day last week, sustained a severe fracture of the leg below the knee. The doctor is worshipping master of Mount Oliver Lodge, A. F. and A. M., and the representative to the Grand Lodge, and naturally feels much disappointed at being forced to forego that attendance.

Rev. Mr. Brown the newly appointed pastor of the Delaware parish, entered upon the discharge of his pastoral duties Sunday last, preaching in the Burwell Memorial Church at 3 p.m. On entering the church the choir, consisting of the Rely family, sang the very appropriate hymn entitled "The Pastor's Welcome." The congregation have already formed a very favorable opinion of the reverend gentleman.

**OXFORD.**  
Farmers in the vicinity of Swainsburg are beginning to disapp. as was the most promising crop of wheat for years.

The continued wet weather has caused it to grow so fast that it has gone down and will not be able to come up again, in some places it will not properly ripen.

One Darby, near the station, was with a patient on a stretcher, and was with a patient on a stretcher, and was with a patient on a stretcher.

His shoulder was badly injured.

## A NEW VERSION OF THE FLOOD.

The most interesting scientific article in the quaterlies is the first paper in the Edinburgh for April on the "Ice Age in North America." The writer tells in a vivid and graphic way the story of a great catastrophe, the noisiness of which to our present time is not realized by the majority of ordinary men.

**AN ICE FLOOD.**  
It is not more than 10,000 years ago since the whole of North America and Northern Europe emerged from beneath a deluge of ice, which seems to have slain out the aboriginal inhabitants as remorselessly as Noah's flood. The Edinburgh reviewer says:

"The chipped flint implement-makers perished with their contemporaries, the mammoth, the woolly rhinoceros, and the sable-toothed tiger, and left the globe to be re-peopled by the polished stone-working or Neolithic progenitors of its actual inhabitants. The gap between the two races is conspicuous, and has not yet been archaeologically bridged. A catastrophe is indicated, and a catastrophe by water. This is the conclusion of science; how singularly it harmonizes with the biblical narrative is almost superfluous to point out."

**THE ANTELOPE WORLD.**  
The destruction of the Antelopes which lived before the Ice Age set in was accomplished much further back; the date 6000 B. C. represents the end of the Ice Age, not its beginning. How it was that ice submerged the world no one really knows, but a great deal of valuable information has been obtained by the geological research of the present century. Before the devastating deluge of ice set in—

—trees reigned without interruption, in north temperate and polar regions, throughout the vast expanse of tertiary time. Palms and cycads then sprang up in the room of oaks and beeches in England; turtles and crocodiles haunted English rivers and estuaries; lions, elephants and hyenas roamed at large over English dry land. Anthropoid apes lived in Germany and France; figs and cinnamon trees flourished in Dantzig; in Greenland, up to 70° of latitude, magnolias bloomed, and vines ripened their fruit; while in Spitzbergen, and even in Grinnell Land, within little more than eight degrees of the pole, swamp-ypresses and walnuts, cedars, limes, planes and poplars grew freely."

For some reason or other the temperature gradually fell and great glaciers forming in the northern regions, the highlands of Canada and the Arctic Circles, submerged Northern Europe and reduced Canada and half of the United States to a present condition of Greenland. Those who see glaciers to-day can form little idea of the enormous possibilities of semi-fluid ice. Only in Alaska, where the Muir glacier empties itself into the Muir inlet at the rate of 70 feet a day, can we form any idea of the glacial as a destructive agency. This glacier empties 200,000,000 cubic feet of ice into the sea every day, that is to say 45,000 tons of ice fall into the water every minute in avalanches with detonations which sound like the booming of a cannonade. The very same tremble as if of the sea, and the foam with the continual discharge of fresh icebergs.

**TRACES OF THE ICE FLOOD.**  
"From observations upon living glaciers," says Dr. Wright, "and from the known nature of ice, we may learn to recognize the traces of a glacier as readily and unmistakably as we would the familiar footprints of an animal." By the effects of ice, rounded rocks are smoothed and polished, and rounded and mammillated. They are, moreover, striated.

"These may be called glacial bryoglyphs; glacial deposits are equally distinctive. They are of three principal kinds—ground moraine, terminal moraine and erratic boulders.

The highest and most registered on the mountains which once breasted its flow. They serve, in Dr. Wright's phrase, as 'glaciotypes.' Thus it has been learned that the ice was a mile thick in New England and a couple of thousand feet in Pennsylvania. Epoch in the United States can scarcely, then, be placed earlier than 6000 B. C. For it was, we repeat, the withdrawal of the ice that set the chronometer of the falls in motion.

"The Falls of Niagara, indeed, constitute in themselves, in Dr. Wright's apt phrase, 'a glacial chronometer.' It was this tremendous agency of glacial action that gave us Northwest America as we know it at present."

"The inexhaustible fertility of the far West is an endowment from vanished glaciers."

The world to-day is very different from what it was in the old times. The mountains stand higher and the glaciers forming on their slopes crumpled the earth in beneath their weight. The earth crust was not strong enough to bear the weight of its ice armor. About 6,000,000 square miles were covered with ice varying in thickness from a mile to a mile, taking it only at half a mile in height the weight per square mile was no less than two thousand million of tons—

"And the whole of this enormous mass being extracted from the ocean, its displacement effect in producing change of level was doubled. The ice-cumbered land accordingly went down, like an overladen ship, until it was awash with the waves, and sea shells were deposited along coast fringes above the drift. Then, as the ice melted, recovery ensued."

The whole article is full of interesting and suggestive reading, and is an excellent example of a popular presentation of the results of scientific research.

The lady managers of the World's Fair are collecting statistics of all the women's organizations of the world.

A famous woman in London recently went through the ordeal of having a dress made on her own figure. She stood for three hours while the dressmakers wrought 50 yards of rare old lace, that could not be cut into a gown for a soiree, at the close of which every stitch had been carefully cut and picked out before the lady could disrobe.

A cremated body leaves a residuum of only eight ounces on an average.

The Thomson-Houston Electric Company has over a thousand patents on electrical apparatus.

Mr. J. R. Allen, upholsterer, Toronto, sends the following: "For six or seven years my wife suffered with Rheumatism, Gout, and Neuralgia, and was treated by two physicians and any number of medicines without getting any relief, until we got a bottle of Northrop & Lyman's Vegetable Discovery. This was the first relief she got, and before long she was cured. We are now enjoying perfect health beyond our expectation."

Hymer—Rather a thankless task, isn't it, writing poetry for the papers? Rymer—Thankless! No, indeed—thanks are about the only return I get.

Don't try to fight your friend's battles.

## TRAGIC SEQUEL TO A WEDDING.

**An Intruder Thrown Down Stairs and Almost Instantly Killed.**

CHICAGO, Ill., July 20.—While a wedding ceremony was in progress at the house of John McHenry, at the corner of State and Forty-ninth streets Monday night, a woman's scream for help stopped the festivities and several men rushed forward to learn the cause of the disturbance. The sounds were traced to the house of Jacob Ewald on State street. Mr. Ewald, who was attending the wedding, and Adam Sarmella, hastened into the former's house and there found Mrs. Ewald in a front room upstairs, where she had been followed by an unknown man.

Ewald broke open the door, which had been locked from the inside, and followed by Sarmella, hastened in and seized his wife's assailant by the throat. He dragged him to the head of the stairs and threw him down the entire length. The man lay motionless at the foot. He was unconscious, and died a few minutes later. His skull had been fractured. Ewald and Sarmella surrendered to the police.

Mrs. Ewald said that while her husband was at the wedding the man had entered her house and attempted to assault her.

**A FATAL FLASH.**  
Lightning Sets a Schoolhouse on Fire—The Teachers Paralyzed.

Augusta, Ga., July 20.—The colored school in Brickman village was struck by lightning yesterday. The school contained about 50 pupils and two teachers. The whole number sat paralyzed and unable to save themselves from danger. People rushed to the burning building and began to drag out the pupils, the great majority of whom had been rendered unconscious by the stroke. One of the teachers, Miss Butler, will die. Sydney Steinfeld and George Turner were killed outright. Two other pupils cannot live many hours.

**VANDERBILT'S CLOSE CALL.**  
His Carriage Very Nearly Smashed by

MANCHESTER-BY-SEA, July 20.—Cornelius Vanderbilt was as near death Sunday morning as a man cares to be. He and Rev. Dr. Green were on their way to Emanuel Church, where Dr. Green was to preach, and were close to the Sunset Hotel, Railroad crossing when a wrecking train dashed around a curve.

There was no time to stop the horses, so the coachman applied the whip, and the carriage just cleared the track as the engine thundered past. No harm was done, but the escape was a narrow one.

**Retaliation Against Canada.**  
WASHINGTON, July 20.—Mr. Blount, of Georgia, to-day reported to the House the Bill introduced by Mr. Curtis authorizing the President to close the St. Marys Falls Canal to all Canadian vessels or levy a tax of \$2 to \$5 a ton on them if it is shown that American vessels are discriminated against in passing through Canadian canals and in the imposition of duties.

The best friend, the most agreeable of all companions is a simple, frank man, without any high pretensions to any oppressive greatness; one who loves life and understands the use of it obliging alike at all hours; whose all is a golden temper, and steadfast as an anchor. For such a one we gladly exchange the greatest genius, the most brilliant wit, the profoundest thinker.

—[Lessing.]

A German scientist holds that all diamonds come from meteors.

A German biologist says that the two sides of the face are never alike.

The life of a steel rail is about eighteen years.

**COOK'S Cotton Root Compound.**  
A recent discovery by a noted physician, successfully used monthly by thousands of ladies, is the only perfectly safe and reliable remedy for all the ills of the female system. It is a simple, safe, and reliable remedy for all the ills of the female system. It is a simple, safe, and reliable remedy for all the ills of the female system.

offer inferior medicines in place of this. Ask for Cook's Cotton Root Compound. It is a simple, safe, and reliable remedy for all the ills of the female system. It is a simple, safe, and reliable remedy for all the ills of the female system.

## R.R.R.R. RADWAY'S READY RELIEF.

The Cheapest and Best Medicine for Family Use in the World.

**NEVER FAILS TO RELIEVE PAIN.**

It surpasses all other remedies in the world in its power which it possesses of curing RHEUMATISM AND NEURALGIA.

The application of the READY RELIEF to the part or parts where the difficulty or pain exists will afford ease and comfort.

INTERIALLY, a half to a teaspoonful of Ready Relief in a glass of water, in a few minutes, cures Headache, Stomach, Nausea, Vomiting, Heartburn, Nervousness, Sleeplessness, Sick Headache, Flatulency and all internal pains.

**A CURE FOR ALL Summer Complaints, Dysentery, Diarrhoea, CHOLERA MORBUS.**

A half to a teaspoonful of Ready Relief in a half tumbler of water, repeated as often as the discharge continues, and a flannel saturated with Ready Relief placed over the stomach and bowels will afford immediate relief and soon effect a cure.

**Malaria in its Various Forms Cured and Prevented.**

There is not a remedial agent in the world that will cure Fever, Ague, and all other Malarial diseases, so quickly as Radway's Ready Relief.

Price, 25c. per bottle. Sold by druggists.

**RADWAY'S R PILLS,**

An Excellent and Mild Cathartic. Mildly Laxative or Strongly Purgative, according to the dose.

For the cure of all disorders of the Stomach, Liver, Bowels, Headache, Stomach, Nausea, Vomiting, Heartburn, Nervousness, Sleeplessness, Sick Headache, Flatulency and all internal pains.

PERFECT DIGESTION will be accomplished by taking RADWAY'S PILLS. By doing so, the Headache, Dyspepsia, Foul Stomach, Bileousness will be avoided, and the food that is eaten contributes its nourishing properties for the support of the natural waste of the body.

**DYSPEPSIA**  
DR. RADWAY'S PILLS are a cure for this complaint. They restore strength to the system and enable it to perform its functions. The symptoms of Dyspepsia disappear, and with them the liability of the system to contract the disease.

Observe the following symptoms resulting from diseases of the digestive organs: Constipation, Headache, Dyspepsia, Foul Stomach, Bileousness, Nausea, Vomiting, Heartburn, Nervousness, Sleeplessness, Sick Headache, Flatulency and all internal pains.

A few doses of RADWAY'S PILLS will free the system of all the above mentioned disorders. Send a letter stamp to Dr. Radway & Co., 412 St. James street, Montreal, Canada.

Send information worth thousands will be sent to you.

**BE SURE TO GET "RADWAY'S."**
