CANADA Portland CEMENT

SOME men ask for so many bags of "cement"—

Others, more careful, say they want "Portland Cement"—

But the man who does the best work insists upon getting "Canada" Portland Cement—

And he looks to see that every bag bears this label

Write the Canada Cement Information Bureau, Montreal, for a free copy of "What the Farmer Can Do With Concrete."

There is a Canada Cement dealer in your neighborhood. If you do not know him, write for his name.

It Couldn't Be Done

Somebody said that it couldn't be done, but he with a chuckle replied: That "maybe it couldn't," but he would be one.

Who wouldn't say so till he'd tried. So he buckled right in, with a trace of a grin.

On his face. If he worried he hid it. He started to sing as he tackled the thing That couldn't be done—and he did it.

Someday scoffed: "Oh, you'll never do that—"

At least no one ever has done it! But he took off his coat and he took off his hat, And the first thing we knew he begun

it.

With a lift of his chin and a bit of a grin, Without any doubting or quiddit, He started to sing as he tackled the thing That couldn't be done—and he did it.

There are thousands who will tell you it cannot be done, There are thousands who prophesy failure. There are thousands to point out to you one by one, The dangers that wait to assail you. But just buckle in with a bit of a grin, Then take off your coat and go to it. Just start in to sing as you tackle the thing That "cannot be done"—and you'll do it.

This Woman Knows How D. D. D. Cures Skin Trouble!

(This letter is just received:)

"Toronto, I am the mother of twelve children. I took a bad leg at the birth of my last child. I was laid up five weeks, with a doctor attending me who does nothing but treat this kind of skin disease. Six weeks ago I heard of D. D. D. As I used to tear my leg at night until it was a bleeding mass I applied a bottle of D. D. D. I can't tell you the ease it gave me. I never used to sleep with the pain. Many a time I nearly fell with dizziness from want of sleep. Now my leg is completely healed up, thanks to the blessed D. D. D. I never expected

a cure. I only got D. D. D. to take the terrible itch away. But by degrees I saw the big sore getting smaller. I have a thankful heart today.

Mrs. Stitt, 202 N. Weston Rd., West Toronto.

The cures of D. D. D. are past belief. All druggists have this soothing, cooling wash and also the efficient D. D. D. Skin Soap.

Come to us and we will sell you the first full size bottle on the guarantee that it will stop the itch at once or your money refunded.

T. B. Taylor & Son, Druggists, Watford.

D. D. D. Prescription—for 15 Years—the Standard Skin Remedy

Children Out at Night

Many resolutions have been passed by benevolent and philanthropic organizations, many sermons delivered, many editorials written by leading newspapers and magazines, many personal suggestions made, that the law dealing with children on the streets and in parks after dark should be more stringent. At the recent session of the Ontario Legislature these numerous requests have been met and the amended law is as follows:

CHILDREN'S PROTECTION ACT

Sec. 17.—(1) No child [under sixteen] shall loiter in any public place after 9 o'clock in the evening, or be there unless accompanied by his parent or guardian or an adult appointed by the parent or guardian to accompany such child.

(2) A child found in a public place after the hour named in subsection 1 unless so accompanied may be warned to go home by any constable or probation officer of a Children's Aid Society, and if after such warning the child is found loitering in a public place such child may be taken by the constable or officer to his home, or to the Children's Shelter.

(3) A parent who permits his child to violate this section shall for the first offence incur a penalty of \$1 without costs, and for a second offence \$2, and for a third, or any subsequent offence, \$5. 8 Edw. VII. c. 59, s. 19, amended.

Sec. 2. (k) "Public Place" shall mean a street, highway, or lane, whether a thoroughfare, or not, and a tavern or other place of public resort, and, generally, any place to which the public have or are permitted to have access.

Shiloh

The family remedy for Coughs and Colds. Small dose. Small bottle. Best since 1870.

Trade in Watford and you go home satisfied.

FEEDING GRAIN TO COWS ON PASTURE

The question is frequently asked whether it is economical to feed grain to cows during the pasture season. writes E. V. Ellington in Orange Judd Farmer. On this question there is a considerable difference of opinion. Judging by the direct results in milk production from feeding grain to cows on succulent and abundant pasture, there seems to be no profit in such a procedure. While there may be some increase in milk yields, the increased yields do not in all instances pay for the grain consumed.

The pastures in the early spring are immature, and the grass contains a high percentage of water and a low percentage of dry matter, and the high producing cow does not secure sufficient nutrients to furnish the needs of the body and maintain a large production of milk. For a cow of this type—that is, one that produces one to two pounds of butter fat daily, a grain ra-

Photo by Kansas Agricultural college.

The Owl's Design, here pictured, a pure bred Jersey cow owned by the Kansas State Agricultural college, is the first Jersey in Kansas to make over 700 pounds of butter in a year. She completed her record on the 17th of March and made during the year 14,000 pounds of milk and 650 pounds of butter fat, which is equivalent to 758 pounds of butter. The milk record classes The Owl's Design among the first seven Jersey cows of the world. Only six have made more than this amount, according to R. M. Gow of the American Jersey Cattle club.

tion should supplement the pasture and she should be allowed all the leguminous hays that she will consume.

The cow that is producing an average quantity of milk—say from twenty-five to thirty pounds of milk of average quality—will produce but little more when fed grain to supplement good pasture and for economy of production should not be so fed. Experimentation has proved that an additional pound of milk was secured for each pound of grain fed, but it was observed that cows that received grain during the pasture season gave 10 per cent better returns after the grazing period was over than did those that received no grain. In other words, there was an increase in weight in the lot that were fed grain which resulted in the laying up of a considerable amount of surplus nutrients on their body which was utilized in future production.

Weaning the Pigs.

Some people seem anxious to wean the pigs. I do not believe a person should be in too much of a hurry about this, however, says a correspondent of the Kansas Farmer. As a matter of fact, there is no feed quite so good as their own mother's milk. There is a limit, of course, for the length of time she can provide this food. If the sow is to raise two litters each year we must not expect her to care for each litter as long a time as when she raises only one.

If she is holding up fairly well in flesh I would not hesitate to leave the pigs with her nine or ten weeks. When you start to wean the pigs do not take the whole litter away at once. This will not only prevent the sow worrying, but it will probably avoid trouble with her udder. Take away the two hardest youngsters first, and then, after a day or two, remove one or two more. Keep this up until the whole litter has been taken away.

Removal of Shoe Boils.

To remove a shoe boil, if you cannot employ a graduate veterinarian, says the Farm Journal, proceed as follows: Put a twitch on the horse's nose and have one fore foot held up by an attendant. Make a single loop knot or noose on a length of piano wire. Put the loop over the shoe bolt and pull tight so as to make the tumor have as narrow a neck as possible. Now cut off the shoe bolt by means of a redhot butted shaped iron or cut it off with a sharp scalpel and at once stop the bleeding by cauterization with a thermo cautery or redhot iron. This leaves a large, flat wound, but it is surprising how quickly it heals and what a small blemish (scar) it leaves if simply wetted a number of times a day with a lotion composed of one ounce of sugar of lead and six drams of sulphate of zinc shaken up in a pint of water.
