This dainty lingerie gown is featured in white embroidered net and lace. A frill of net on the skirt falls over a drop

FOR AFTERNOONS.

of net ribbon trimmed. A simple bodice is chiefly of the embroidery with V neck, elbow sleeves and deep satin girdle. The parasol is black and white taffeta.

**LET THE CHILDREN DIG.**

Nothing Pleases Small Ones Better Than a Garden Patch.

If you live out of town or spend your summers there, let your children study nature first hand in their own gardens. Nothing will teach them more quickly of trees, flowers, birds and vegetables than the planning and developing of a small garden.

Of course each child can personally manage only a very small garden. This can be in the form of a bed or in the form of certain possessions at various places in the big family garden. For instance, you might give into one child's keeping a climbing rose over a summer house, a dwarf evergreen in the far corner of the shrubbery border, a row of beans (a short one) in the vegetable garden and a little patch of flowers in the flower border. In this way the child has a chance unconsciously to study trees, flowers and vegetables.

If possible, make the child interested in all the details of garden growth. If the child can sketch let him sketch leaves and flowers and roots, seeds and seed pods and all the other parts of the plants he works with. Let him keep a little notebook for his sketches. Without doubt they will prove so interesting as he collects them that they will form the nucleus of an interesting lot of sketches, which he will refer to even when winter has made gardening impossible.

Buy a bird house or two for the child's garden. By watching the chance inhabitants who occupy it from year to year he will become familiar with birds, for his interest in one pair will lead to an interest in all birds.

Perhaps an interesting book or two will stimulate the child's desire to garden. There are children's bird books and gardening books and simple guides of all sorts. Then there are botany books, fascinating when mastered in the open, but rather dry work to most children indoors.

Let the child have possession of the fruits of his garden—vegetables, flowers or fruits, whatever they are. It is a mistake to give a child anything, even a raspberry bush, unless the gift is free and complete.

**Collars Make Blouses.**

Do you know how to "trim up" the plain blouse and make it become your individual style? Get a collar in white chiffon or sheerest organdie which in turning back covers the nape and the sides of the neck, runs flatly across the shoulders and straight down over the bust, forming a slender "V" opening below the throat. This collar is bordered with pin tucked self material, straight on its outer edge and widely scalloped along the fine, embroidery outlined inner edge. Another blouse dominating collar has a tapering, narrow turnover coming high against all

 Druggists and Stores everywhere

save the front of the neck and widened by an extremely broad frilling of the plaited material a-four hemmed. In crepe de chine this second collar is extremely practical as well as dainty.

**Toddler's Apron.**

A charming little work or play apron is made of soft pink linen with a yoke, sleeve bands and hem of white. The little apron buttons at the back of the yoke and is cut with flaring lines, so that it spreads wide at the hem. There is a cross stitched design of Little Bo-peep and a couple of her wee lambs. The same apron could be made in blue and white, with any other Mother Goose character or animal or flower in the cross stitch.

**American Chop Suey.**

Two pounds of veal from the shoulder or leg will be required for the chop suey. Cut into cubes and fry lightly in a little butter. Add a tiny bit of onion, two bananas cut in cubes and a small can of button mushrooms sliced. Season highly with salt and pepper and add half a teaspoonful of curry powder. When the bananas and mushrooms are brown cover with cold water and simmer for twenty minutes; thicken slightly and serve. The bananas may be omitted and celery substituted if desired.

Faultless in Preparation.—Unlike any other stomach regulator, *Parmelee's Vegetable Pills* are the result of long study of vegetable compounds calculated to stimulate the stomachic functions and maintain them at the normal condition. Years of use have proved their faultless character and established their excellent reputation. And this reputation they have maintained for years and will continue to maintain, for these pills must always stand at the head of the list of standard preparations.

**Could Not Control It.**

Husband—Do you see Dashaway over there? Wife—Yes. Husband—He has named his automobile after his wife. Wife—How funny! Husband—Funny! Not at all. When he got it he found he could not control it.

**Building and Burning.**

Bacon—You know Rome wasn't built in a day. Egbert—No. There seems to have been a lot of "fiddlin'" then too. —Yonkers Statesman.

There are no chagrins so venomous as the chagrin of the idle, no pangs so stinging as the satieties of pleasure.—Washin.

**Prince as Chairman**

The Prince of Wales made a speech some years ago at the laying of the foundation stone of a church in South London on the property of the Duchy of Cornwall. But his appearance as chairman of the Statutory Committee for Naval and Military Pensioners is a much more important stage in his career. His Royal Highness is expected to take his seat in the House of Lords some time this year, being of the same age as his grandfather, Edward VII., when he took his seat in the Lords for the first time.

**Causes and Effects.**

If man was to judge of causes by their effects there would be no small causes in the universe. In a nature where everything is connected, where everything acts and reacts, moves and changes, composes and decomposes, forms and destroys, there is not an atom which does not play an important and necessary part; there is not an imperceptible particle, however minute, which, placed in convenient circumstances, does not operate the most prodigious effects. If man was in a capacity to follow the eternal chain, to pursue the concatenated links that connect with their causes all the effects he witnesses \* \* \* he would find that they are true atoms which nature employs to move the moral world.—Hobach.

The Last Asthma Attack may really be the last one if prompt measures are taken. Dr. J. D. Kellogg's Asthma Remedy will safeguard you. It will penetrate to the smallest bronchial passage and bring about a healthy condition. It always relieves and its continued use often effects a permanent cure. Why not get this long-famous remedy to-day and commence its use? Inhaled as smoke or vapor it is equally effective.

**Don't**

**Agricultural Education**

That the policy of the Federal Government in providing a subsidy of ten million dollars, spread over a period of ten years, towards furthering agricultural education in the different provinces, is bearing good fruit is abundantly proven by the second annual report of the Commissioner of Agriculture. This report is for the year ending March 31st, 1915, and tells in detail how the money has been applied. It shows that while much remains to be done before the work is perfected in rural schools a great deal has been achieved. Teachers have had to be trained and for this purpose, short courses have been held in connection with all the agricultural colleges, generally in the summer vacation, and the attendance has everywhere been satisfactory. Funds for this purpose came out of grants made by the Dominion under the Act. New buildings have been erected, old buildings enlarged, schools better equipped, higher salaried and more experienced instructors engaged, teachers specially trained, college extension work greatly extended, boys and girls' competitions encouraged, the district representative system widened and developed, demonstration methods increased in number and improved in scope and character, and women's

work at home and abroad aided institutionally and otherwise. In short, there is not a branch of agricultural education or of home economics in any of the provinces that has not been beneficially influenced by the operation of the act in providing more funds than would otherwise have been available for these activities. The provinces having been left free to use the grants, which have increased from \$700,000 in 1914 to \$900,000 in 1915, and will be \$1,000,000 each of the succeeding six years as they thought fit within the purposes intended, the applications have not always been identical, but in the Report every item in detail is set forth. The story of every province is told, furnishing interesting reading for every well-wisher of the agricultural industry and every member of the farming community. A letter to the Publications Branch of the Department of Agriculture, Ottawa, will bring the Report free of all charge.

It Makes New Friends Every Day.—Not a day goes by that Dr. Thomas Electric Oil does not widen the circle of its friends. Orders for it come from the most unlikely places in the west and far north, for its fame has travelled far.—It deserves this attention, for no oil has done so much humanity. Its moderate cost makes it easy to get.

A sailor who goes to sleep in his watch is not necessarily a very small man.
