

PEDLAR'S "GEORGE" SHINGLES

LIGHTNING - PROOF

These shingles lock on all four sides, forming practically a one-piece roof of heavily galvanized steel, which when properly grounded, causes lightning strokes to be evenly and harmlessly distributed. Proof also against fire,

wind, rain or snow, and will not rust or decay, but will last a lifetime without need of repair. See your dealer or

The Holstein Friesian—Continued from page 582

portant item to the credit side of the farmer's balance sheet. No kind or quality of veal is in such great demand as that of the Holstein-Friesian breed and its grades. Veal is also an important source of revenue to the dairymen of North Holland and Friesland. They supply vast quantities to the English markets. Cows of this breed make an excellent quality of beef. Whatever the breed, in no country does a dairy herd last longer than from six to ten years; age, accidents and failures to breed constantly deplete it. If the cow thus dropped out cannot be profitably turned to beef, the capital in the herd is totally lost every period of from six to ten years. Cows of this breed put on flesh rapidly when dry and their beef commands a high price. Over and above all labor and cost of keep, the average Holstein cow will show a nice profit on the butterfat she produces,

while the skim milk will not only rear her own calf but a couple of litters of pigs besides.

Owners and breeders of Holsteins base their claims for the superiority of the breed over all other dairy breeds mainly on the following points: that she is a large vigorous cow, full of energy and abounding in vitality; that her physical organization is such that she is able to turn to the best advantage the roughage of the farm, converting the same into merchantable products; that she yields large quantities of most excellent milk, fit for any and all uses and especially well fitted for shipping purposes; that heredity is so firmly established through her long lineage that she is able to perpetuate herself through the production of strong, healthy calves; and that, when for any reason her usefulness in the dairy is at an end, she fattens readily and makes excellent beef.
