

And No Discharge

Bang the hammer of a loaded Iver Johnson against the table; throw the revolver around as carelessly as you would a handkerchief; handle it as roughly as you may, and there can be positively no discharge—don't do this with *any other make of revolver* if you value your life.

IVER JOHNSON

REVOLVERS

are the *only* revolvers absolutely safe from accidental discharge—as *safe in the home as the kitchen stove*. The reason lies in the fact that the hammer *never* touches the firing pin, and the firing pin never comes in contact with the cartridge except when the trigger is pulled *all the way back*.

OUR BOOKLET, "SHOTS," mailed free with our descriptive catalogue, *proves* these claims and describes Iver Johnsons with complete illustrations. May we send it to you?
