

THE LESTER B. PEARSON BUILDING 1973

A summary of technical information made available in response to requests from within Canada and from abroad concerning the development of the building program, the character of the structure, its space content and uses. The article was prepared by Mr. Noel Adams from his recollections as coordinator of requirements for the Department of External Affairs with the Department of Public Works, the federal government agency responsible for design and construction of the building. For his participation in this program Mr. Adams received a Merit Award from the Public Service Commission of Canada.
