

LUKUT IS NOT A GIMMICK.
IT IS SIMPLY THE BEST UTILIZATION OF
COMMON MATERIALS, LABOR, TIME AND
TECHNOLOGY TO PRODUCE ADEQUATE
AFFORDABLE SHELTER FOR OUR PEOPLE.

SOIL UNDER "LUKUT" ARE POISONED WITH
1% CHLORDANE, FUMES ONLY OF WHICH
CAN KILL PEOPLE AS IN HYBERABAD -
INDIA, WHAT MORE TERMITES ?

A POLYTHELENE VAPOR BARRIER
IS LAID UNDER THE FLOOR.

DEVELOPED COUNTRIES LIKE USA
AND IN EUROPE USE PLYWOOD FOR
EXTERIORS OF HOUSES SO WHY
DON'T WE ?

THE REASON IS OUR PLYWOOD
FAIL US FEDERAL WATER
RESISTANCE SPECIFICATIONS
ALTHOUGH OUR MARINE PLYWOOD
PASS.
LUKUT THEREFORE USES LOCAL
MARINE PLYWOOD EXTERIOR WALLS

No. 34. Promotional poster on Lukut House.
