The Dyment plater, Dutch Girl, went a mile in 1.48.2.5, starting with the high-pited Temeraire and Simon D. The two inst-named covered the mile in 1.45. The plater would have done much better had she not run out at the first turn, thereby losing six or seven lengths. Several of those at the track were heard to remark that they did not like the way Temeraire worked, but Trainer Johnny Dyment is well satisfied with the way the horse is coming along. He is not what night be called a good work horse, but that he will race well there is no question.

The Seagram horses were out in two divisions. The platers Assemblyman and Sea Wall were in the first lot and Haruko in the second. Only slow work was given them, and many who were at the track expecting to get a line on the Waterloo candidates for the plate were disappointed.

Those out with Montreal were Roddy Finlayson, Neville, Hamilton and Angus of last year's senior team; McInnis and Povey, who played with Sherbrooke; Spooner, an old National player, and Jacobs and Lefebvre, Caughnawaga, Indians.

One well-known trainer was heard to say yesterday morning that before race day three of the Seagram candidates would been seen work the plate course in 2.15 or better. Certain it is, however, that the "Master of Waterloo" has three high-class strings to his bow for this year's guineas.

Department Urged to Circulate Literature—Opportunities in Canada.

A Welsh immigrant, who has been settled in Ontario about a year, has written to the minister of agriculture urging that a vigorous effort be made to divert the stream of Welsh immigration now pouring into the United States to the Dominion of Canada. The writer thinks that his countrymen would have far better opportunities and be far happier in Canada than across the line and he urges the department to circulate a large quantity of immigration literature thruout Wales. This, he suggests, should be printed in the Welsh dialect, and, if the scheme is worked out properly, he is sure that it will result in thousands of Weish people, farmers, quarrymen and miners, who will be a credit to any country, taking up their home in

J. M. Clarke of Tillsonburg is at present representing Ontario in Wales, but as he is ignorant of the language spoken by a large number of the peo-ple, he can hardly be expected to reach the Celtic portion of the population, and it is not unlikely that besides dis-tributing. tributing a considerable quantity of Canadian descriptive literature in the Welsh tongue thruout the pricipality, the government will send a special

agent over.

The Welsh are a thrifts and industrious people and Mr. Sputhworth who has seen something of them, thinks they would make excellent citizens.

EVOLUTION OF IDEAS.

Man's Mental Attitude Towards the Progress of a New Truth. A great philosopher observed that "the truth is always rejected when it comes to a man for the first time." First, he says it is rank heresy. Second, he says it really amounts to nothing, anyhow.

Third, he says—well, we always be-

lieved it feasible, possible and right.
With men the Semi-ready tailoring idea has reached the third stage. has reduced friction, worry and expense for the man who is most particular in his dress. Civilization is an evo-lution. So is Semi-ready tailoring. It is better to-day than it was two years ago, for behind it are men who have the ability to recognize ability.
