MINES AND MINING STOCKS.

Trend of Virtue, Deer Trail, War Eagle, Payne and Other Stocks on Canadian Boards.

IN THE BOUNDARY COUNTRY

Camp McKinney, Greenwood Camp and the West Fork of the Kettle River, B.C.

Deer Trail Consolidated was a trifle easy yesterday on decision of management to hold off dividend. Virtue recovered sharply and War Eagle and Payne inclined upward.

Brandon and Golden Crown Shipping.

Messrs. Greville & Co., Limited, have received word from the Brandon & Golden Crown that the returns from the first three shipments of ore to the Trail smelter gave a little over $4000, or an average of $19.80 per ton. The secretary reports that they are shipping 50 tons of ore per day, which they are taking out of the mine with development work.

The Granby smelter has not yet started and that is why this ore is being shipped to Trail.

Another B. A. C. Flotation.

A prospectus has been received of the floating of the Le Roi No. 2, Limited, in London, England, under the auspices of the London & Globe Financial Corporation and the British America Corporation. The capitalization of the Le Roi No. 2 is £600,000 in shares of a par value of one pound each. The shares were offered at par, and priority of allotment was given to shareholders in the London & Globe Corporation, the B.A.C. and the Le Roi Mining Company. The company's properties are the Josie, Poorman, Annie and Annie fractions, Rockingham and No. 1, formerly the West Le Roi and now known as the "Le Roi No. 2 Group." The group adjoins the Le Roi, War Eagle and Centre Star mines. Considerable development has been done on the Josie and No. 1 properties, the main shaft on each being equipped with an 150 horse power electric hoist, while an air compressor of 600 horse power is now in course of erection on each. The prospectus states that daily shipments of 300 tons, of an average value of $16 a ton, can be made as soon as the air compressor machinery is ready, which will be towards the end of the summer.

IN THE BOUNDARY, B.C.

The Greenwood Region, Camp McKinney and West Fork of the Kettle River.

Greenwood, B. C., June 12.—Mining development in the many camps of the Boundary district is moving along smoothly, and interest now centres in the smelter returns of the mines that have started shipping. This district somehow has generally been spoken of on the outside as capable of producing only low grade ore. True, some of the big mines, whose ore bodies can be defined by the acre, may be classed as being low grade, but there are others that if compared, for instance, with the Rossland mines, are certainly not so. Take for instance the "B.C." in Summit camp. This mine is the most extensive shipper to date in the whole district; some 3000 tons of ore has already been sent to the Trail smelter, and this, too, before the mine was really in a state to maintain a regular output. The correspondent has it on the best of authority that the average return of the ore netted $12 a ton. Again, take the Brandon & Golden Crown mine in Wellington camp, recently added to the shipping ranks, and what does one find from the returns of four or five car loads? The assayer's report of the ore gives it a value of $35 to $40 per ton. Surely this cannot be classed as low grade. Then, too, the ore of the Golden Eagle, in Brown's camp, near Grand Forks, is extremely rich. Superintendent J. H. Fox was in town to-day and informed the correspondent that there was over 300 sacks of ore ready for shipment. Asked its value, he said that the ore from the upper level would run from $70 to $80 to the ton, and that from the lower at 135 feet depth would go $60, mostly in copper values. This surely does not look like low grade ore.

In Deadwood Camp.

A brief despatch recently told of the starting of work on the Marguerite claim in Deadwood camp. The Marguerite is situated near the famous Mother Lode mine and has a splendid surface showing. It has been acquired by a company formed by Andrew Laidlaw of Spokane. The Quebec Copper Company, Limited, of Quebec has acquired all of E. C. Brown's interest in the claim. It is a financially strong organization, and, what is more, the money for the development is right here, the registered office of the company. Superintendent Massam has at present two shifts at work surface prospecting, preparatory to locating a place for sinking. At the head of the company is John T. Ross, a director of the Quebec Bank; the vice-president is John Ritchie, a wealthy wholesaler of the same city. The Board of Directors is composed of other well-known Eastern Canadian financial men. Altogether it is a strong company with a property that has the earmarks of becoming one of the big mines of that camp.

At the Buckhorn.

To-day the writer spent the best part of the forenoon visiting another Deadwood camp mine, the Buckhorn. This property is owned by a company composed of Eastern Township capitalists. W. C. Noble is resident mine manager, and Walter Thomas is superintendent. Equipped with a good steam hoisting plant and air compressor, the mine has been developed to a depth of 200 feet, and as soon as a connection has been made at the 100-foot level to provide ventilation, development at further depth will be prosecuted. Superintendent Thomas hopes to have the mine on a shipping basis within the next two months. At the 100-foot level the crosscut has been run 250 feet in a southerly direction; the last 40 feet is all in ore matter, with stringers of rich chalcopyrite running thru it. It is 103 feet in this drift where men are now making an upraise of 48 feet to connect with an old incline shaft, sunk to a depth of 65 feet. This will provide ample ventilation for further development at depth. At the 200-foot level the east crosscut has been driven 140 feet, and is just in ore. The west crosscut is in 130 feet, and it, too, is in ore. The force at the mine is 16 men, working three eight-hour shifts.

In Camp McKinney.

Interest has again been manifested in Camp McKinney. Superintendent Thomas Graham, when here yesterday with his 106 ounce gold brick, did a considerable amount of missionary work in showing what the development of a property in that camp is capable of doing. The Waterloo has to date produced $4780 in gold bullion, and so far not a pound of concentrates has been sent to the smelter. Work has commenced on the surface in sinking the new main working shaft. It will be a double compartment 4½ x 8 feet in size. As stoping from the 65-foot level is within 15 feet of the surface, little work will be necessary in sinking to make the connection, when the whole distance down to the 65-foot will be timbered in and sinking resumed from that level. A new tramway from the mill will have to be constructed, but once that is completed and the proposed new hoisting plant in place, the mine will be in position to make a good output, the workings being carried down in the centre of a rich pay chute, which is over 100 feet in length. The ore for this distance, the superintendent says, measures from three to five feet in width. In time, with the present economical management, the Waterloo may win a reputation as a gold producer second only to the famous Deadwood, and the shares that now go begging around five cents may be worth fully ten times their present value.

West Fork of the Kettle.

For a new district, the West Fork of the Kettle River is claiming a large share of attention. Daily mining men, engineers and experts are coming and going to the camps strung along the West Fork, which leaves the main Kettle River about nine miles above Rock Creek. The West Fork country, and it is a big one, was discovered two years ago. Last summer the district was thick with prospectors, and during the past winter several properties have been partially developed and prospected with splendid results. Among the heavy owners of claims is A. Branson of this city, who returned to-day from a two weeks' trip, making his headquarters at Beaver City, an embryonic city of the frontier style, in which he, A. J. Wheatley, John Bell and Ralph Smailes are interested. The town site consists of 640 acres of land situate on the river 35 miles above Rock Creek. It boasts of a log store and hotel, and the owners are now arranging for the purchase of a sawmill plant to supply lumber for the various properties nearby, as also for building up the town site. He, too, adds in glowing terms the possibilities of this district becoming a big producer of gold, copper, silver and lead. While in camp he visited a number of the best known properties, including the King Solomon, which is within a mile of Beaver City. He says that this claim has a six-foot ledge of solid quartz, carrying gold values and galena. The Washington and Idaho group is developed to a depth of 130 feet by shaft. It has also two other prospecting shafts opening the ledge to a depth of 30 and 40 feet, respectively. The company owning the properties has purchased a hoisting plant and is now engaged in packing it in. The Rob Roy and Skilly group, owned by Robert Wood, the founder of Greenwood, is also spoken highly of; recent development opened up a ledge carrying well in free gold. This is also true of the Highland Chief, on which the finding of free gold caused a stampede to secure claims surrounding it. The Carmi, five miles above Beaver City, is being developed by a large force; this is another notable property. Before the close of the present year, he says, it is safe to estimate that there will be at least 20 working properties, and by this time next year the development if steadily carried on will show up the West Fork to such an extent that the continuation of the railroad west from Midway will become a necessity, for there will be sufficient tonnage ready for the smelter to warrant it.

Godenrath.

Toronto Mining Exchange.

Morning sales: Golden Star, 500 at 17, 500 at 16¾, 500 at 16½, 500 at 16¼; Olive, 500 at 13; Deer Trail, 500, 500, 500, 500 at 5¾, 500, 500 at 6; Can. G. F. S., 250, 250 at 6; Hammond Reef, 250 at 9½. Total sales, 6250 shares.

Afternoon sales: (W.D.) Jim Blaine, 1000 at 13; Athabasca, 1000, 1000 at 13½; Golden Star, 1000 at 6; Deer Trail, 5000 at 5¾, 500, 500, 500 at 5¾; Hammond Reef, 2000 at 9¼. Total sales, 12,500 shares.

AT OSGOODE HALL.

Toronto Railway Co. Sues the City for $1500 for Alleged Damage to Trolley Motors.

At Osgoode Hall yesterday the Toronto Railway Company issued a writ against the city to get $1500 for damages done to their motor cars. The company claim they suffered loss to that extent thru the neglect of the municipal authorities to keep snow and slush from accumulating on the streets during the winter. In melting, the water ran down the company's tracks, and was swished by wheels of the cars up to the motor works, to the disadvantage of the interior arrangements.

Other Writs Issued.

Several other writs were issued. Donald McLeod of Coldwater wants to collect $1000 each from the Union and Northern Insurance Companies for the destruction of his general store, and Michael Basso is suing Elizabeth Johnston of Mimico to compel her to sell to him No. 692 West Queen-street under an agreement made with her. Thomas D. Plumtree, 952 Yonge-street, is also suing the Toronto Railway Co. to get damages for injuries received by being thrown from a car.

To Declare This Man Dead.

Before Mr. Justice Ferguson a motion was made to have George Robertson, at one time a teamster in Osnabruck Township, declared dead. Robertson has been missing nine years. In 1887 he joined the A.O.U.W., and took out a policy for $2000. The dues on this Mrs. Robertson paid, and now she wants to recover the amount of the policy. The society is willing to pay if Robertson's death is assured. The motion was adjourned indefinitely for further evidence.

The Murray Hill Disaster.

For the death of his parents in the Murray Hill disaster Fred Kern, a 16-year-old Russian, secured a verdict of $1000 against the Grand Trunk Railway. Mr. Justice Ferguson, who tried the case, was yesterday asked to allow $220.60 legal expenses incurred by the plaintiff, but His Lordship deferred action, saying that if he had known of their existence at the trial he would have allowed them, too.

Suit Under a Will.

An application was made for the construction of the will of the late William Lekins, who died in 1894. His will ordered that $200 be paid annually to his widow. The income did not amount to so much, and Mrs. Lekins has since died. The executors of her estate claim the $200 to the time of her death, hence the application. Judgment was reserved.

POLICE COURT RECORD.

Before Magistrate Denison yesterday Edward Clark, Robert Thompson and Edward Jackson, the three young men arrested by Constables McElroy and Tipton, on Saturday night, pleaded guilty to a charge of being disorderly. Thompson and Jackson were fined $1 and costs each, Clarke $10 and costs or 60 days. After the fine was imposed, Clarke withdrew his plea of guilty and said he wanted to give his evidence. The case against him was then adjourned till to-morrow.

Rose Solaway, charged with shoplifting, and Mary Daly, accused of breaking the liquor law, were remanded till Thursday.

William and Mary Crawford and Annie Johnstone, charged with being keepers or frequenters of a disorderly house, will appear again to-day.

These were fined $1 and costs or 30 days for being drunk: John Lee, Elizabeth Murphy and Mary Barnes. John Malone, for injuring property when drunk, was taxed $3 and costs or 30 days.

David Robbins was fined $15 and costs for using for a half-peck measure one that was 1¾ pints short.

James Shields, an old British soldier, charged with vagrancy, was sent to the House of Industry.

William March was given 2 weeks in which to pay a fine of $10 and costs or 30 days for fishing with a net in Ashbridge's Bay.

Wilson Sentenced.

George McClive Wilson, the ex-paying teller of the Merchants' Bank, will spend the next seven years in Kingston Penitentiary. He was sentenced by Deputy Magistrate Kingsford yesterday to three years each on the two charges of embezzling $2000, to which he pleaded guilty, the terms to run concurrently. On the charge of stealing the $10,000 package, he was convicted, and sentenced to four years' imprisonment, the term to commence at the expiration of the other sentences. In sentencing Wilson, Magistrate Kingsford said with reference to the missing $10,000 that it was the prisoner's duty as chief officer of the bank to look after the funds. "This sum reached your hands, and you could give no explanation of its disappearance; no one could take it but by your connivance. On your own merits, and for the sake of your family, I deplore the result. You will be given a sentence that should prove a deterrent to others placed as you were." Wilson took his sentence quietly. He shook hands with his brother, and, after a moment's conversation, went down into the cells.

Canadian Manufacturers Association.

A meeting of the Executive Committee of the Canadian Manufacturers' Association has been called for to-night (Tuesday) at 8 o'clock, in the office of the association. All city members of the association, whether on the executive or not, are invited to be present.

The principal matter for discussion will be arrangements for the annual meeting in the fall. It is proposed to make this convention representative of every manufacturing industry in Canada, and to do this means much work in organization and arrangements. Before the association definitely commits itself to this program it desires to find out whether the city members of the association will aid largely in arrangements for this convention in order that the convenience of visiting manufacturers might be fully looked after.

A large number should be present at the meeting this evening at the Board of Trade to discuss this matter.

Beating the Record.

It used to be said of life insurance that "you had to die to win," but recent years have changed this, and the newer forms of policies combine investment with life insurance. As announced in another column, the Equitable Life Assurance Society has just settled the largest endowment ever paid. This endowmen was on the life of a gentleman in Toronto, who was evidently a believer in endowment insurance, as he took out $400,000 worth in various companies. His policy for $100,000 in the Equitable at its maturity was worth $150,847, which, as beforesaid, is the largest payment ever made to a living policyholder, and makes a strong argument in favor of the form of insurance which makes provision for old age, as well as giving protection to the family.

The Wabash Railroad Company

Is now acknowledged to be the great through car line between the East and the West, the best-appointed and most up-to-date railroad in America.

All Wabash trains have free reclining chair cars, and are solid, wide vestibule from headlight to rear platform.

Passengers leaving Toronto via evening trains reach St. Louis, Mo., next afternoon at 2 p.m., Kansas City 9.30 p.m., far-away Texas and Colorado points next afternoon.

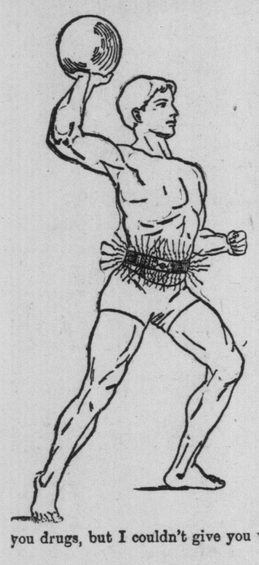
STRENGTH.



Weaknesses of men result usually from a long-continued abuse of Nature's laws. Excesses and indiscretions during the tender years of youth and dissipations in after life produce certain private symptoms, covered in a general way by the term Nervous Debility. In other words, the nerves, glands and organs generally are affected. The treatment MUST, therefore, be one which reaches the entire organism. The above I submit as based upon my experience of 30 years in the treatment of the weaknesses of men. I have here described a condition which drugs can't reach, simply because those which must be employed only stimulate. I use Electricity because it does NOT stimulate. I use it on account of it being a great natural strengthener. It gets way down at the foundation and builds up gradually, but surely, without danger, and the results I promise to be permanent. There would be more profit for me in giving you drugs, but I couldn't give you value for your money.

THE LARGEST

ENDOWMENT EVER PAID.

Fifteen years ago Mr. George Gooderham, of Toronto, took out 15-Year Endowment Policy No. 289,421 for $100,000, in the Equitable Life Assurance Society of the United States, paying an annual premium of $8,382. Now his policy has matured and shows the following results:

1—Cash, . . .	$150,847.
2—Paid-up Assurance,	$210,000.
3—Annuity for Life, .	$ 20,320.

At the **same** time Mr. Gooderham took out a policy of the **same** kind for the **same** amount and with the **same** premium in another company; the cash return on which was **$15,000 less** than on the Equitable policy.

Here is what Mr. Gooderham says of his results:

"I have always been a strong advocate of Endowment Insurance, and about the time I took your policy for $100,000 I placed $400,000 of Endowment policies on my life in eight different companies. Of this amount $310,000 has already matured. I have lived to see the result and to know what it means."

"These results realized by the Equitable are larger and more satisfactory than any result ever realized by me on any of my policies which have matured to date. I may say that they are quite satisfactory, and that no company has ever done so well for me."
