

BIBLE CLASS.

The Bible Class, under the teaching of our esteemed Pastor, continues its work with unabated interest, and, we hope, with increasing spiritual benefit to the young people attending it.

The average attendance for the year has been seventy-five young men and women. The subjects of study have been the International Sunday School Lessons, which have been made very interesting and profitable, and we would be gratified to see a larger number of our young men avail themselves of the benefits to be derived by attending.

It was felt that a good Library was very much needed in connection with the Class, and this year a committee was formed, who have, at an expense of \$180, purchased, and put in good running order, the same. By contributions in the Class, and one or two social gatherings held, they have raised some of this amount, but there is still a balance of \$85 due. Towards this the Committee are going to put forward a special effort, and they hope, before the expiration of their term of office, to be able to report the Class free from debt.

The collections for the seven months in which the class has been held, is \$35, which, the members have decided, should apply on the Library fund. Hence the reason that they cannot apportion their contributions for the past year to the schemes of the Church, as formerly.
