Mr. John Valente Ellis who was brought up in Halifax, on a British dock, and domiciled in money for which the British people were taxed, has the following on the subject of loyalty. In an editorial in the Globe on Saturday...

It is one of the absurdities of this country that every now and then there is an outbreak against some man or men because they are not "loyal." As a rule the persons who start the cry make their own purchase money, or they make it up for their want of wit or capacity to grapple with the problems of the time. Always they trade upon the highest feelings of the people for personal purposes.

It will be seen from this that Mr. Ellis has a very poor opinion not only of loyalty but of human nature. He believes with Sir Robert Wopole that every man has his price, and having no loyalty himself, he thinks that when other men speak of loyalty, they must have been purchased with money. This is a very natural feeling for a man who is generally believed to have for years past been a purchaser with money from a foreign and hostile power, in order to enable him to run a paper hostile to the interests of St. John and of Canada. There is nothing in the career of Ellis to show that he could be faithful to anything but even to the faith in which he was born. He is composed of the material out of which spies and traitors have been made since the beginning of the world. Faithless to his religion and his flag, he might be compared to Judas Iscariot, but for the fact that the latter, after his great crime, experienced remorse and shame, which are sensations which John V. Ellis is incapable of feeling.

MR. ANDERSON'S VISIT. Mr. Anderson's visit to St. John, which was referred to in our local columns on Saturday, has given him an opportunity of seeing our harbor as it really is, and has been described by some enemies of St. John as the press and people of Halifax. Mr. Anderson, in company with several members of the Board of Trade and the Harbor Master, enjoyed a sail in a tugboat from one of the wharves on the east side to Partridge Island, thence up to the suspension bridge and back to the place of starting. Mr. Anderson took Mr. Anderson had an opportunity of noting that St. John harbor is not a horse pond, as pleasantly described by the Halifax press, but a basin three miles in length, if measured from the outer breakwater, or more than two miles in length if measured from the Beacon light. Mr. Anderson had an opportunity of learning that there is a clear channel into St. John harbor, almost perfectly straight, which at its point has less than 25 feet of low water, spring tides, and that this limited depth only prevails for five hundred yards. He would learn that there is upwards of forty feet of water at this shallow point at high water, and that there is never less than 30 feet, except from two hours before low water to two hours flood. Mr. Anderson would see from this that St. John is a harbor for the purposes of ocean steamships a much better harbor than New York, the amount of pilotage involved from the anchorage ground at Partridge Island to a safe berth in the harbor not being more than two miles. Mr. Anderson would further learn that a vessel entered St. John harbor at a low tide, and that it is not a mere rounded bay, but a harbor with a narrow entrance, and that it is a harbor with a narrow entrance, and that it is a harbor with a narrow entrance.

Annexationist Lozley, who was described long ago in The Gazette as the "two-dollar column man," has contrived to make in about forty seven cents of the Halifax Chronicle's money by writing an editorial abusing the Halifax press, according to Lozley is "a foolish St. John paper" because it demands of Parliament that Dominion money shall not be spent in the seashore city of Halifax, which makes local business on Dominion Day. By the time Lozley had his friends get through this business they will find that the foolishness is on their own side of the fence. They have dashed themselves so far as the building of the Short Line is concerned.

The Liberals in this city and county have taken measures to see that as many new names as possible are placed on the Dominion electoral list, the first draft of which is to be made up on the 1st of August. Why are not the Liberal/Conservative leaders, who divide the office and distribute the patronage, taking similar measures to see that the constituency is given away to the enemy as it is the last general election?

Revolutions in France always work the same way, running like the measles through a series of symptoms until they culminate in an outbreak. The Bonaparte movement in Paris has got the length of rioting and insurrection with the police. From this to the erection of barricades and open defiance of the government there is but a little way.

Rumors in regard to the resignation of James G. Blaine are always to be heard because Mr. Blaine is an interesting person, who may be counted on to do almost anything which will likely to increase his popularity. Mr. Blaine may not be contemplating an immediate resignation, but he is not a member of Harrison's Cabinet, but, if the President continues to decline in popularity as he has during the past three months, the man from Maine will certainly not continue his Secretary of State.

The Halifax Herald says:—"Halifax is more prosperous today than at any time prior to 1867. For one dollar of business transacted there are five now. There are two or three firms in Halifax which now import as much annually as was imported by all the merchants of Halifax in 1866. Ask the city who will turn out in the procession on "Labor Day" if consideration be given to the death of their property? Ask the merchants and manufacturers of the city of Halifax who are now extending their trade through the maritime provinces and throughout Western Canada? Ask any thoughtful and intelligent citizen? And they will laugh at the folly of such statements.

If these things are true it is time the Nova Scotia people turned out their present blarney and secession government, and came into line with the rest of the Dominion. Nova Scotia under the Gripps regime is, as Hamlet says—"Like a muffled ear blasting his wholesome brother."

It seems that no notice is to be offered by the owners of the "Mattie Winship," a Gloucester schooner recently seized for preparing to fish within the three-mile limit off the coast of Cape Breton. The Gripps men, such as the Acadia Recorder, accepted the lying statement of the captain that his vessel was not preparing to fish as true, and denounced Capt. Knowlton for making the seizure. Into what hole will they now crawl to hide themselves?

OUR TORONTO LETTER.

The Ontario millers' convention met in this city on Tuesday and adjourned yesterday. About 110 to 120 millers were present. O'Brien, the Howlands, and some other large owners were absent. Sir William Howland was down on the agenda for a paper or a speech on organization, but the paper or speech did not materialize; Sir William was not present in person or by deputy. The motive of the meeting, so far as the active promoters were concerned, was soon disclosed. It was to put pressure on the government and the Conservative party to compel them to advance \$2,000,000 in the receipt of money from a foreign and hostile power, in order to enable him to run a paper hostile to the interests of St. John and of Canada. Dress the Hair

With Ayer's Hair Vigor. Its cleansing, beneficial effects on the scalp, and having perfume commensurate for universal toilet use. It keeps the hair soft and pliant, preserves its color, prevents it from falling out, and if the hair has become weak or thin, promotes a new growth. It restores the original color of my hair, which had turned prematurely grey. I used Ayer's Hair Vigor with extraordinary success. I cheerfully testify to the efficacy of this preparation.—Mrs. F. H. Davidson, Alexandria, Va.

A few years ago I effected the entire loss of my hair from the effects of the scalp disease. My hair was falling out and what remained turned grey. I was induced to try Ayer's Hair Vigor, and to my great surprise it grew again. The result was all I could have desired. A growth of hair soon came out all over my head, and grew to be as soft and heavy as I ever had, and of a natural color, and finally grew to be as thick as my hair when I first used it.—J. H. Pratt, Spoford, Texas.
