

## By the Britannia'

LIVERPOOL, June 4.  
TRADE IN THE MANUFACTURING DISTRICTS.

MASSESTER, TUESDAY.—There was not much animation to day as on the preceding Tuesday; but the market, though more quiet, was perfectly brisk and steady in yarn generally and silk deniers, and in cottons, deniers, which have been previously selling on somewhat better terms than shirtings and printing cloths, have now declined so about the same rate in relation to prime cost. On the whole, the feeling in the market was satisfactory; and if the accounts from India by the hand, which may now be daily expected, should be of a favourable complexion, there will be no want of opportunity looked for. We are sorry to state that a failure to some extent in the coira trade has been announced in this town; this week; but its effects are not likely to be very seriously felt here.

Hanoverian, Tuesday.—The general opinion in this market to day was, that a better feeling prevailed, indicative of a return to something like a healthy state of business'. No great improvement in the demand took place, but the fine weather, and to a certain extent of depression have induced feelings of hope that every walischer to his standard would be soon re-reduced.

BURSTON.—The intelligence from Burston is of the most alarming character. In a letter dated Tuesday from the neighbourhood, from a most respectable gentleman, great fears are expressed for the peace of the district. The following we extract from it:—At Burston, yesterday, I had seen accounts of the state of the people. It seems that the manufacturers have represented to the Secretary of State that they were far beyond the reach of their means of relief; they have 12,000 persons on their books, and must leave the master in the hands of the government. Sir J. Graham has sent down a special commissioner, Sir John Walsh, who has written for £300, which has been distributed, and more is forthcoming. A fearful struggle has taken place between the manufacturers and the labourer, the latter has been unsuccessful. The price of coal has come down to 5d per piec for 6d in each. A man can only earn 7/- 2/- per day in full work, out of which he has to pay expenses. At this price machinery even has no chance; but look at the condition of the miserable debts—2d per week at best in full work! Of course they cannot support themselves at this rate, and go to the government to demand relief; the new price lay is found to be totally inadequate, and the relief is felt. The magistrates in the neighbourhood are conveniently not at home, and I look to an outbreak. The greatest apprehension are entertained. On Sunday it is said, 20,000 persons met at Euston.

TRADE AND MONEY MATTERS.—The advance of the year into summer, with perhaps as great a progress in all under which there is any general employment is still scarce and labour a drug in the market. But though this is true, we would fain hope the crisis of the national disease has passed, and we are glad to find that those engaged in the pursuit of the week's business there is favourable; there were no further attempts to beat down prices; and the spinners and manufacturers who were selling to accept the rates of the current; were generally enabled to increase business.

Finsbury.—The intelligence is less cheering. Later stricken than her sister country with the fearful depression of the last three years, and less fruitful in natural resources, Scotland will be later in recovering; but a plainer truth will be that we have so good a market, will be far to set all right, from one end of the island to the other.

The money market continues in the most satisfactory condition, and the public securities have advanced a point during the week upon the previous high rates.

The Tea Trade, London, May 30.—There has been rather more tea imported this week than in any similar day week, viz. of 14d per lb on good and middling 2d. to 8d, on common, 3d. to 4d, on fine, 1d to 2d. on twiney, 2d. to 3d. on hyson, and 3d. to 4d. on souchong.

This took place at public sales of 6,800 packages on Friday, when only 2,500 packages were sold, and the average price was 1d per lb, the remaining 4,800 offered only 2,000 sold, as the importers would not submit to the low rates offered.

The small quantity noticed at taken at Friday's rates. The dearness last week was £10 14s.

At the Auction of the Chinese Tea, which commenced on the 25th instant, greater inactivity prevailed than has for many years past, owing to the recent abundant arrivals of Tea from China, and the total disappearance of speculators from the market. The tea was not well received, and the price in prisons during the last two years, but who have been caught cautious by experience, who is, doubtless, a boon to the public. It will require some new and very alarming feature in the Chinese quarrel to be announced before a similar feeling for speculation can be again created.

LONDON, May 31.—Tues.—There was considerable business in the public sales on Friday, consisting of tea, coffee, &c., and there being a desire on the part of the speculators to realize a considerable depression took place, and the usual sound English declined 1d, and the fine and very inferior sorts 2d to 3d. The market gave way full 1d; Souchong, 4d; and Hyson and all other green teas were about 1d to 2d per lb. lower.

Liverpool Corn Market, June 4.—The quantities of foreign and Colonial Wheat and Flour released from hand in this port, at the reduced scale of duties under the new Corn Act, from the 2d to the 26th instant, inclusive, comprise, of foreign Wheat, 25,739 qrs; of Indian Wheat, 9,170 qrs; and colonial Wheat, 9238 qrs; and colonial Flours, 1,000 qrs; and a large portion of the flour made for exportation has been sold for consumption.

Canada Flours, 55s. Gd.; United States, 5s. to 37s.

Liverpool Cotton Market, June 4.—It is a pleasure to be enabled to remark that the accounts from the manufacturing districts are more encouraging than for some time past, and manufacturers do not complain so loudly, the stocks now held by them are not so heavy, the present scale of rates obtainable is certainly very low, but the demand is not general. One of the causes of the want of the former is the great trade inquiry for Cotton, irrespective of the speculative business doing daily.

It is true to observe on the weather, but, without a doubt, the present favourable season has its full effect upon the springs of trade in general and most particularly in Cotton manufacture, should we be blessed with a good harvest, we should shortly experience industrial effects beyond our present knowledge.

Liverpool Cotton Market, June 4.—Sports.—There has been rather more inquiry for standard Staves, and several parcels, all pipe lengths, have been sold at £40 to £40 per M. Inferior are not worth more than £30 per M. Quebec Staves are quite unsaleable; these are quoted at £10 to £15 per M. Ash Hougham Staves are quoted at £10 per M.

Five—A quantity of Quebec Pine, of second quality, has lately been forced off by auction, at 1d per foot, but Quebec Pine of first quality is still selling at 1d per foot to consumers. A parcel of St. John Pine of fair quality was sold for 1d per foot, or £13 per ton. The champion of Pine Timber, which compares with that of former years, has certainly fallen off, with the quantity taken out of the market the past four months has averaged 350,000 feet per month.

Red Pine—Quebec Red Pine of large size is unquoted, and would sell at 2d to 2d per foot—con-

sum, 2d per foot; St. John Red Pine is 1d to 1d per foot.

Pitch Pine.—This market is overstocked with Pitch Pine. It has been sold as low as 2d per foot.

Elm—St. John Birch is worth 1d to 1d per foot.

Dales—of common quality, may be quoted at 2d per foot of two inches, and first quality deals at 2d to 2d per foot of two inches.

ANOTHER ATTEMPT TO ASSASSINATE THE QUEEN.

Another attack was made on the life of the Queen was made on Monday evening as her Majesty, accompanied by Prince Albert, was returning to the Palace, an assassin was prepared a pistol, and discharged it at the Queen, from very nearly the same spot from which Oxford fired. The wretch was instantly seized by a soldier of the Scotch Fusilier Guard, and is now in custody. He was at first supposed to be a member of the popular party, a man descending the Royal carriage (an open carriage), drawn by four horses and first quality deals at 2d to 2d per foot of two inches.

THE CHRONICLE.

SAINT JOHN, JUNE 24, 1842.

The English Mail, with dates to 5th June, arrived here on the 15th instant. The steamer (*Britannia*) came to Halifax on 11th June, and brought 45 passengers.

It will be seen by our extracts, that a disturbed attempt has been made, by a person named John Francis, on the life of the Queen, who was a pilot at Her Majesty's ship the *Brilliant*, a 44 gun frigate, and that this attempt proved unsuccessful.

It is reported that the Queen is safe.

THE ROYAL CARRIAGE.

The appearance of the Royal carriage emerging from the gateway was the signal of one long, loud, and continuous shout of hurrah, accompanied by cheering of hats, and handkerchiefs, and the words "God preserve the Queen". Her Majesty appeared perfectly calm and collected, although surrounded by a crowd of people, and remained for some time in conversation with her Grace.

The Queen and Prince Albert returned to the carriage, and the popular party, a man descending the Royal carriage (an open carriage), drawn by four horses and first quality deals at 2d to 2d per foot of two inches.

ANOTHER ATTEMPT TO ASSASSINATE THE QUEEN.

Another attack was made on the life of the Queen was made on Monday evening as her Majesty, accompanied by Prince Albert, was returning to the Palace, an assassin was prepared a pistol, and discharged it at the Queen, from very nearly the same spot from which Oxford fired.

The Queen escaped even harm from the atrocious attempt made upon her, as she was not aware of its occurrence until after her arrival at the Palace, and when the assassin had been committed to the hands of justice, when made known to the Queen, she was greatly alarmed, and of the popular party, a man descending the Royal carriage (an open carriage), drawn by four horses and first quality deals at 2d to 2d per foot of two inches.
