

- Sun, required for growth, 51.
parent of all the planets, 132.
heat of the, 151.
rays of, effect on earth, Ch. XIX, 154.
distances, 156.
elements of, 156.
disintegrates rocks and soils, 157.
stimulates vegetation, 161.
stores energy, 162.
effect on the tides, 164.
Superposed vibrations of a wire, 90.
- Taste and smell, 57.
Telephone-diaphragm vibration, 76.
Temperature affected by ocean currents, 146.
Terrestrial heat, Ch. XV, 129.
Thunder reflected by clouds, 65.
Tides caused by gravity, 26.
ultimately by the sun, 164.
- Timbre, 91.
Trade-winds, 148.
Transmutation of energy, Ch. IV, 35.
Transparent substances, 191.
compared with opaque, 192.
Tuning-fork, experiment of vibration, 71.
rates of vibration, 75.
- Vacuum will not transmit sound, 62.
will transmit light and heat, 63.
- Velocity of sound, 61.
of light, 156.
of projectiles, 239.
- Vibration defined, 56.
illustrated, 59.
of inclosed bodies of air (resonance), 71.
of solid substances—tuning-forks, strings,
buildings, etc., 75.
of telephone-diaphragm, 76.
