

Corpulent persons should preserve strict regularity.

Diphtheria, Influenza, Hoarseness, Croup, Pleurisy, Sore Throat, Congestion of the Lungs,

CURED IN A FEW HOURS.

Reader, if suddenly seized or if suffering with either the above frequently fatal maladies, do as follows, and you will be at once relieved from the distressing symptoms that either of these diseases inflict, and in fifteen minutes free from further trouble.

Diphtheria.

Preventive measures are the best in all cases. The moment you feel a dryness in the Bronchia or glands of the throat, with soreness, apply the Ready Relief, and bind a flannel saturated with Relief around the throat—take six of Radway's Pills; do this, and no further trouble will follow. If seized with it, and the membrane has become thickened, with all the accompanying symptoms of suffocation, etc., rub the throat and chest freely; also apply the Ready Relief clear, by means of a sponge fastened on a stick, to the inflamed glands and tonsils; give the Resolvent in small doses of half a teaspoonful every half hour, and Radway's Pills in large doses every six hours. The Ready Relief will, by its COUNTER-IRRITANT properties, withdraw the inflammation to the surface; its *Disinfectant* will neutralize the poison that induces the thickening or formation of the false membrane; and the expectorant properties of the Sarsaparillian will loosen the new-formed membrane, and enable the patient to throw it from the throat; the *Pills* will carry off all foreign humors, etc. Never need a person die with Diphtheria, Influenza, Croup, or other disease where the respiratory or Bronchial organs are attacked, if this course is followed. This treatment is quick, permanent, and sensible—better and quicker than burning with nitrate of silver or other escharotics. Beef-tea should be given three times a day in cases of Diphtheria.

NOVEMBER 3, 1872.

DEAR SIR: I received your letter and "False and True," also Almanac, and feel thankful for the favor, and have no objections to using my name. I feel safe to say that the Relief and Pills used right away will cure Diphtheria in a few hours. I used it last winter myself, and used it for my wife about two weeks ago, and feel safe to say that no medicines will prove so effectual. I would never have known the value of your remedies were it not for the case of Diphtheria I had. I have introduced it in three families in our place who would not use it for the world had they not seen the powerful effects it worked for us. I lent two of them parts of a bottle for some of their ailments, and now I can always see it in their use. Hope to see it in every family.

Yours respectfully,

W. J. HURST.

No. 694 SYCAMORE STREET, CINCINNATI, OHIO.

Cases of INFLUENZA and CROUP are speedily and successfully treated and cured by the R. R. R. Remedies. See directions.

CONGESTION OF THE LUNGS.

If suddenly seized with Congestion or Inflammation of the Lungs, Pneumonia, or Pleurisy, rub the chest and side, back and spine, freely with Radway's Ready Relief; give the Resolvent in doses of a teaspoonful every hour, and take 6 or 8 of Radway's Pills. In the most distressing forms, the patient will breathe free and easy. In a few minutes after the rubbing with the Relief, and swallowing the Resolvent, all danger will be passed as soon as the Pills operate; but it is well to continue the Resolvent and Pills in small doses for several days, and to wear around the body flannel soaked with Ready Relief. If the simple treatment in the above forms of epidemic diseases is followed, life will be preserved.

Apoplexy is prevalent between forty and sixty.

slides in a recess in one blade, and is held in proper position by a clamping-screw. Boiled starch can be kept fresh for two to four days by adding sulphate of copper.
