INTERNATIONAL STOCK FOOD CO., TORONTO, CANADA.

IDEAL FENCE
WHEN YOU FENCE, FENCE FOR GOOD.

A good fence adds its price to the value of the land. A poor fence soon becomes unsightly and worthless. The job must be done over again. You must go to all the expense of erecting a fence again. This costs lots of money in time and labor; it means piling expense on top of expense. It pays to do the job right in the first place. Put up the Ideal woven wire fence as shown above, and you will have done with that piece of fencing for many years. It's not going to rust out in a few years because it is heavily galvanized and it always looks well. It stands up. It holds its shape perfectly on any surface, hilly or level. There is a reason for this, and the reason is that Ideal Fence has the weight. It's all made of No. 9 hard steel wire, and has the famous Ideal lock at every wire crossing. Slipping wires are impossible with this lock. Any strain or pressure is distributed and borne by all of the wires. That means strength. There is not a domestic animal living that can go through or over it. And there is no trouble about hot or cold weather. It adjusts itself to all temperatures. If you cannot be sure of these things, investigate. Let us send you a book giving all details about Ideal Fence. It is free; write for it.

THE MCGREGOR-BANWELL FENCE CO., Limited,
Dept. B, WALKERVILLE, ONTARIO.

Sheep and Cattle Labels. If you are putting stock out this spring you will need them. Sample and circular free.

F. G. JAMES, Bowmanville, Ont.

QUESTIONS AND ANSWERS.
Miscellaneous.

POULTRY PAPER.

Mention the names of some of the leading poultry journals in Canada.

R. E. O.

Ans.—It is rather a cool proposition to ask us to do a stroke of free advertising of this nature, but we may say the Canadian Poultry Review, published in Toronto, is the leading Canadian poultry paper.

WARMING PIGPEN BY PIPE FROM STABLE.

1. Your answers re lightning-rods are very interesting. Would like to have you explain more thoroughly how they are erected. This is a question which will interest many of your readers very much.

2. We are intending to build a cement hogpen and henhouse, sidewise to our cattle barn, leaving about 16 feet between end of cattle barn and hogpen for driveway. Would like to know if we can run a pipe across from cattle stable to convey the hot air to heat hogpen.

FARMER.

Ans.—1. We will publish, shortly, an article in answer to this question.

2. An overhead pipe of sufficient size, or even an underground one, would, if the wind outside were blowing towards the hogpen from the barn, convey a strong current of heated air into the hogpen. If the wind was in the contrary direction, the current in the pipe would be towards the barn. Would it not be better to have henhouse and hogpen a little cooler than heated by air from stable, which would almost necessarily be used up, and foul?

T. B.

HIGH-LAND PERMANENT PASTURE.

I have twenty-five acres of high, stony land, somewhat difficult to cultivate, being so rough. Said land has quite often given satisfactory grain crops. Fully two-thirds of this land I would consider in condition for giving a fair crop of the ordinary mixture of red clover and timothy seed. Can you recommend a mixture of certain named seeds that will be likely to make a permanent pasture on the above specified land. The one-third of above mentioned land is where the question really is. It will yield a fair straw crop in a favorable season. The above mentioned land is about one mile from buildings, rendering it somewhat difficult to cultivate, in consequence of scarcity of labor. Water in connection with land is easy of access. Probably it would be well to say in reply just how many pounds to the acre of each separate variety should be sown.

SUBSCRIBER.

Ans.—The grasses best adapted for permanent pasture require several years to become thoroughly established. It is, therefore, good policy, in seeding down such a pasture, to use a good proportion of timothy and red clover, as these, though not of much account as permanent-pasture plants, furnish a good growth for a few years, and die out as the others take possession. Orchard grass, Kentucky blue grass, Canadian blue grass (wire grass), meadow fescue, with white clover, are the varieties recommended for high-land pasture. We would advise you to sow two-thirds your ordinary measure of timothy, red clover and alsike clover seed, with two pounds per acre each of orchard grass, Kentucky blue grass and meadow fescue, and six pounds lucerne seed added. We leave out Canadian blue grass and white clover as, probably, these will find their way in of themselves. The fittest will survive.

T. B.

When the Prince of Wales was a little fellow at school, he ran out of money, and knew his parents too well to ask for it. He sat down and laboriously prepared a letter to Queen Victoria, his grandmother, pathetically begging her to send him half a sovereign (about \$2.50). The Queen, instead of forwarding the money, wrote an autograph letter, full of wholesome advice. A few days later she received a brief response, which said: "Dear Granny,—Never mind about that money now. I don't need it. I have sold your letter for £2 (\$10)."

SUFFERING WOMEN

who find life a burden, can have health and strength restored by the use of

Milburn's Heart and Nerve Pills.

The present generation of women and girls have more than their share of misery. With some it is nervousness and palpitation, with others weak, dizzy and fainting spells, while with others there is a general collapse of the system. Milburn's Heart and Nerve Pills tone up the nerves, strengthen the heart and make it beat strong and regular, create new red blood corpuscles, and impart that sense of buoyancy to the spirits that is the result of renewed mental and physical vigor.

Mrs. D. O. Donoghue, Orillia, Ont., writes: "For over a year I was troubled with nervousness and heart trouble. I decided to give Milburn's Heart and Nerve Pills a trial, and after using five boxes I found I was completely cured. I always recommend them to my friends."

Price 50 cents per box or three boxes for \$1.25, all dealers or The T. Milburn Co., Limited Toronto, Ont.

Shropshire & Cotswold Sheep
