speculation in land, etc., and apart from the war, has expected and prepared for the slump in prices which has occurred.

It is rather remarkable, but it may be worth mentioning, that the exports from Great Britain for the month of January last were \$12,845,416, as against \$9,273,047 in the same month last year, and in February the exports were \$14,461,712, as against \$7,223,573 the previous year.

Regarding this most disastrous war, I am a peace man myself, but believe in the immortality of non-resistance. In all communities we find those who require to be restrained by physical force—lunatics, drunkards, thieves, murderers and disturbers of the peace. As in communities, I do not know of any good reason why throughout the civilized world law and order should not prevail. Germany, apparently, went mad over militarism, and must be subjected, and I am greatly in hopes that the ultimate outcome of this war will be an international court, with an international police to enforce the decisions of the court, and international control of all armaments. I think the President has correctly indicated present conditions and the immediate effect in this country, and it is unnecessary for me to add anything in that connection.

Before taking my seat I want to say that in the election of Mr. Howland as President a wise step was taken by the Directors. I have known Mr. Howland for many years, and have always regarded him as a man above reproach, also of sound business judgment. He was on the staff of the Bank in the early years, and since he has been on the Board in recent years has given a good deal of time and attention to the Bank's affairs. His father was one of my best friends, and, as you all know, was President of the Bank from its organization, in 1875, until his death in 1902.

PELEG HOWLAND, President.

SOW LATE CORN

Owing to the dry spring season it seems very probable that hay will be in very short supply next winter in many localities. To provide against this corn should be sown during June to provide fodder to make up for the shortage in hay. Corn is the cheapest for seeding and the most productive of all fodders. We have grown corn here in the West for 25 years and have found that it can be sown any time up to and as late as the first week in July, but the later it is sown the more seed should be used to get a profitable return. In 1913 we drilled in corn in rows three feet apart, and in continuous rows, not in hills. This was cut first week in September and yielded a very heavy crop of good fodder, about four feet high. In several previous dry years when hay prospects have been short, we have sown corn even as late as July 10 and each time with good results, as it grows very quickly in our hot July weather. We have always used fodder corn to feed horses. We find horses like it as soon as they become accustomed to it, and they will keep in good condition and even fatten on fodder corn in the winter months. For milch cows and cattle it is the cheapest and best of all fodders.
