otes advancing age. We all know the advantages of a youthful appearnce. Your hair is your charm. makes or mars the face. When it fades, turns gray and looks streaked just a few applications of Sage Tea and Sulphur enhances its appearance

Don't stay gray. Look young. Either prepare the recipe at home or get from any drug store a 50 cent bottle of "Wyeth's Sage and Sulphur Compound," which is merely the old time recipe improved by the addition of other ingredients. Thousands of folks recommend this ready to use preparation, because it darkens the hair beautifully, besides no one can possibly tell, as it darkens so naturally and evenly. You moisten a sponge or soft brush with it, drawing this through the hair, taking one small strand at a time. By morning the gray hair disappears; after another application or two, its natural color is restored and it becomes thick,

glossy and lustrous, and you appear

Crete Was the Seat of Ancient Greek Culture

Another Milestone Marked In History of this Splendid Organization

The annual meeting of the Leper Mission on Tuesday last marked another mile stone in the history of that organization. The various reports showed the mission to be in an excellent condition. The program was of much interest, beginning with hymn 109; prayer by the president; bible reading, Miss Whittaker, was well thought out, as was also the reading by Mrs. Booth on Miss Hatch's work. The recitation, "A Missionary Dream," by Miss Linscott was an inspiration.

The reports showed an increase when the demand upon one's time and purse are so taxed for so many other urgent needs. The amount raised for the year was over three were elected for the ensuing year:-President, Mrs. W. H. Whitaker. 1st Vice-Pres., Mrs. (Rev.) Peters. 2nd Vice-Pres., Mrs. R. Reid. 3rd Vice-Pres., Mrs. James San-

4th Vice-Pres., Mrs J. Gamble. Secretary, Mrs. James Adams. Treasurer, Mrs. Ritchie. Superintendents Surprise Soap wrz pers, Mrs.

"Without the Camp," Mrs. Warne. Mite Boxes, Miss Whitaker. Pianist, Miss Warne. The thank offering meeting is

be held at the residence of Mrs. Jas. Adams. There will be a good program, including an address on the work by a returned missionary. The amount raised for the year was over three hundred dollars.

HOW TO KEEP WELL

BY JOHN W. S. McCULLOUGH, M.D., D.P.H., CHIEF OFFICER OF THE PROVINCIAL BOARD OF HEALTH.

INFANT WELFARE-ARTICLE No. 2.

HE MOTHER should endeavor to maintain her health to the highest point before and after the baby's birth. She should do no heavy work for at least four weeks after the baby's birth. Particularly she should not work out. If she has any headache, puffiness of the face and legs, indigestion or vomiting, she should realize that these are not the necessary accompaniments of pregnancy, but that they are indications of something wrong, and that she should AT ONCE consult a capable physician and have the condition remedied. She should eat easily digested but good substantial food; keep her bowels regular, have plenty of outdoor air, light exercise, and at least eight hours sleep in a well-aired room. People are too atraid of fresh air. Some houses are shut up so continuously that it is a wonder the people living in them can be healthy. After the baby is born the mother's chief care should be directed to her child's welfare. Nursing the Baby.

The mother's milk is the baby's best food. Nearly every mother should be able to nurse her baby, and she should have every encouragement to persevere in breast feeding for four or five months at least. If she works out she cannot nurse the baby, and as a consequence artificial food, such as cow's milk or the expensive proprietary preparations are used, with the common result that the baby gets diarrhoea and frequently dies. The first great requisite then is, that to the mother must be left the care of the baby. Artificial Food.

If for any reason the mother is unable to breast feed her baby, artificial food must be used either partly or entirely. Then we are obliged to seek and recommend the best form of artificial food, but before doing so, physician, nurse, and mother must exhaust every means to keep up the breast supply. Do not try to do this by the use of beer, stout, wine, or any form of alcoholics. These articles do not improve the breast food, and besides they are bad for the baby. The best artificial food is cow's milk modified to suit the needs of the

growing child. The milk should be carefully selected. It should be the product of clean, healthy, well-kept cows. Certified milk is expensive, and if such milk cannot be procured then the raw milk should be pasteurized or boiled. Some authorities claim that boiled milk is more easily digested than raw milk. If raw, pasteurized, or boiled milk is used it should be modified as follows: THE FORMULA-1st Month.

A full-term baby will usually take in twenty-four hours:-Cream—Two ounces.
Skimmed Milk—Two ounces.
Boiled Water—Twelve ounces.

The sugar of milk should be dissolved in a few ounces of boiled water. Place this in a nitcher add the cream the skimmed milk and the balance of the boiled water, and stir with a spoon. This mixture should preferably le put in twelve separate bottles and placed in an ice-box, or kept in the pitcher and added to the bottle as used. The baby should during the first month have a bottle every two hours from say four in the morning to ten at night. The food should be warmed by sitting the bottle in hot water to warm it to a comfortable heat. It should be fed through a large rubber which fits snugly over the neck of the bottle. important that bottles, nipples, and all utensils used should be kept scrup-

Sugar of Milk-Six level teaspoonfuls.

llously clean. Too great care cannot be taken in this regard. Formula for Second Month:-Cream-Five ounces Skimmed Milk-Five ounces Boiled Water-Twenty ounces.

Sugar of Milk-Four level tablespoonfuls. Formula for Third Month:-Cream-Six ounces Boiled Water-Twenty ounces

Sugar of Milk-Four level tablespoonfuls.

(Continued Next Week.)
