Fish Famine in Inland Centres.

A fish famine during the Lenten season in some inland centres with high prices in most others is now probable says an Ottawa despatch. The Atlantic seaboard has been literary swept clean by the immense export trade to Great Britain during the last six months.

One house alone exported 100,000 pounds through its Montreal agency. During the last six months the price to the trade has increased 50 per cent and with the sudden rush of orders this is likely to go much higher. Halibut can scarcely be secured, and salmon, fresh herring, haddock and smoked fish are in the same category.

Up until 1913 Australia led the world for numbers in sheep when she had 85,000,000 head, but was being closely followed by the Argentine with 80,000,000. Drought is said to have reduced Australia's sheep in 1915 72,000,000 head, which reduces her to third place. Asiatic and European Russia combined possess about 70,000,000 sheep. The United States had about 50,000,000 sheep on farms and ranges on April 15, 1916.

Fly From Europe to New York. Vienna, March 1—via London, March 2—Herr Fokker, the builder of one of the most successful military flying machines used in the German and Austrian armies, predicts an era of aerial passenger traffic after the war. Speed, he says is bound to make air craft a popular vehicle of travel, but only for great distances, for which reason the inventor redicts the successful operation of aircraft.

A despatch to The Handelsblad from Zeevaar, near the German frontier, says it has been learned from travellers from Germany that the important manufacture of aniline dyes and medicines, owned by the Baer Company, at Leverkusen, in the Rhine Province, was blown up last week. Two streets were for the most part ruined and many persons were killed.
