ting it. Injury from insects was report ed in only a few instances, and these ed in only a few instances, and these were not of a serious nature. In those sections of the province where the crop was a failure more of it would have been plowed up but for the fact that it boy was the victim of a ritualistic murwas seeded down with clover, and farm

ers are anxious to save the excellent catch of grass by resowing the patchy spots with some spring grain-usually barley. In a number of cases also some inferior fields of wheat have been left untouched in the hope that they might pick up with favorable weather. Most of the reports coming from the Lake Eri district were favorable, while in the Counties of Huron and Bruce in the adjoining Lake Huron district conditions were reversed, and a considerable portion of fall wheat land had to be plowed up or resown. The crop was also more or less of a failure in the Georgian Bay counties. In the West Midland district wheat on the whole was of fair promise, and the same may be said of the Coun ties of Lincoln, Wentworth, Halton and Peel in the Lake Ontario district; but the other counties of this district (York to Prince Edward) give rather discour-aging reports. In the more eastern parts of the province, where but little fall wheat is grown, conditions range from fair to poor.
