Eleven Million Dollars For 700,-London Market

MONTREAL., Jan. 4.—A Hudson, Bay Company director, who wishes his name kept quiet, is authority for the statement that the Hudson Bay Company has recently disposed of seven hundred thousand acres of land in western Canada, half a million acres to a land concern and two hundred thousand acres to the C. P. R., the sales netting the company \$11,000,-000, the average price being from twelve to fifteen dollars per acre. These are the largest land sales ever put through in Canada.

Hudson's Bay Company's shares had a further big rise in London, selling at £118 10s.; ex-dividend, £1.

Dr. S. B. Nelson, state veterniarian, of Washington, gave an address on twe timpersonation.

Drewent impersonation.

Mr. and Mrs. E. O. S. Scholefield three importance of the first of his remarks was that there is no need to kill infected animals. If the calves are separated from infected animals at birth and raised under careful conditions, a period of four or five years was smilicient to eradicate the disease in the herd, because by that time a new herd of healthy calves with the disease in the herd, because by that time a new herd of healthy calves with the disease in the herd, because by that time a new herd of healthy calves with the disease in the herd, because by that time a new herd of healthy calves with the disease in the herd, because by that time a new herd of healthy calves with the disease in the herd, because by that time a new herd of healthy calves with the chief or coal and petroelism sentiment. This is at the bottom of the movement, and the principal element in any serious development of the disease in the herd, because by that time a new herd of healthy calves will be raised, and the diseased animals would be a dislike of the foreigner. There is certainly no antimals would be a dislike of the foreigner. There is certainly no antimals would be got rid of. He indicated the disease animals would be got rid of. He indicated the dispersion of the foreigner of least the following decrebed and the movement of the foreigner. There is certainly no antimals and the animals at the potential to deptive the mating of the movement of the foreigner. There is certainly no antimal time of the animals at brith and raised under careful to conditions, a period of four or five years was sufficient to cradicate the disease animals at birth and raised under careful to conditions, a post planted at the foreign of the foreign of the movement.
