

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

- Colds
- Toothache
- Earache
- Headache
- Neuralgia
- Lumbago
- Rheumatism
- Neuritis
- Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Mono-acetic acid derivative of Salicylic acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

TOO MUCH MONEY

The British Government is quite right in ordering an official inquiry into the sweepstake in which a woman won £20,000. No woman should be trusted with that much money. (Montreal Gazette).

A MISFIT

Hon. James Murdock did not prove a particularly useful official of the late Meighen Government. His language and general attitude in connection with the disturbances at Sydney show that he is utterly unfit for his place in the King Cabinet. (The Farmer's Sun).

MARQUIS WHEAT

(From the Youth's Companion). Man has learned to do some remarkable things with organic life, both animal and vegetable. He must do the work experimentally, for, although he has found out much about laws that govern heredity, he cannot account for some of the things that happen or fail to happen when living stocks are blended. But still he usually finds a way to get what he wants from Mother Nature. Let us consider, for an example, Marquis wheat:

Northwestern Canada is a land of wide-spread prairies well adapted, so far as soil is concerned, to wheat farming and too far north for any other crop that is nearly so profitable as wheat. But you cannot grow winter wheat in Canada or even in the northern tier of states in our own country. The severe winters are sure to kill any plants that have sprouted and begun to grow in the fall. Canada must have a Spring-sown wheat, and, if its people are to take advantage of the fields that spread up to the Peace River Valley within a few degrees of the Arctic Circle, it must be a rapidly growing variety, one that matures within ten weeks of planting.

There are other qualities that a useful variety must have. It must be able to resist drought no less than cold, for western Canada is often both cold and dry; if it is to sell at a good price, it must mill well and bake well; and it must produce a high yield to the acre. There have always been varieties of wheat that have one or two of these five essential qualities, but until recently there was none that combined all of them. That there is one now is owing to the long and patient labor of Dr. William Saunders of Ottawa and his sons.

Beginning with a Russian wheat that will ripen in a latitude of more than sixty degrees north, they crossed it with the well-known Red Fife wheat, which has superior milling qualities. When they had got a hybrid variety that would ripen within seventy days and make excellent flour, they bred into it a Calcutta wheat that is notable for productiveness and for its power to resist drought. And so year after year they worked away, trying one combination after another, selecting this and rejecting that, finding that one hopeful kind of crossbreeding would not answer and that another, tried on the off-chance, would answer very well, until at last they had produced a stable seed that would produce wheat with every desirable quality for subarctic culture. That wheat they call Marquis.

Incidentally the Saunders established another variety that they called Prelude. It will ripen in eight weeks and has been raised at Dawson within three degrees of the Arctic Circle. It may perhaps be grown even in the lower Yukon Valley. It does not produce heavily, however, and for that reason is not worth planting where any other variety will grow.

The service of the Saunders family not only to their native country but to mankind as well is worthy of more recognition than it has received. They are men who have done better than those whom Dean Swift praised so highly—the men who make two blades of grass or two ears of corn grow where only one grew before.

They have caused whole acres of waving grain to spring up where before none would grow. They have pushed forward the domain of civilized man in the face of cold and drought and given to Canada new homes for its people and new sources of inexhaustible wealth.

CAR UPSET—THIEVES SOON ON THE SPOT

This side of W. D. McKinlay's store at Lower Onslow a car driven by Mr. F. Cooper, of Truro, skidded on the muddy highway and turned over, smashing the top. This accident would have been more serious if the driver had not been running his car slowly. The driver was uninjured. He left his car upside down and when a friend went for the disabled car the next morning he found that night ghouls and thieves had stolen the four tires from the wheels and also the two extra ones carried on the car.

This is an outrage that should land these thieves in the Penitentiary and take away forever their license to drive a motor vehicle in Nova Scotia.

URGES THE CHURCH TO ADVERTISE

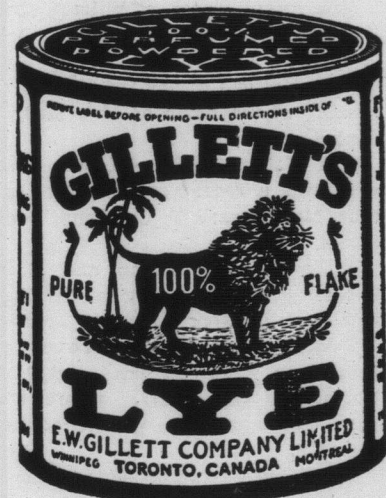

"Every church should have a fund for purchasing space in the newspapers and should advertise in the daily and weekly paper, regularly, persistently and as consistently as do the members of the church who are business men," is a statement made by the Rev. T. T. B. Smith, division of publicity, committee on conservation and advance of the Methodist Episcopal Church, at the recent convention of the Associated Advertising Clubs of the World.

The speaker in the course of his address before the delegates to the convention also paid tribute to present day newspaper editors and declared that there are real, living prophets of God in the editorial sanctuaries and publishing offices of many large metropolitan dailies in America. The fact that some newspapers feature sensational news which is lacking in moral tone and is a detriment to the progress of Christianity is a reflection rather on the churches than on the owners and editors of such papers, said the speaker.

If the churches were on the job, said Mr. Smith, they would insist that the owners and editors of newspapers who are church members apply Christianity to the task of making a newspaper which would help the coming of the kingdom of God on earth rather than hinder its progress.

Mr. Smith is strong against secrecy in church conferences. He declared that "star chamber" methods at preachers meetings only lead to indirect and incorrect reports of proceedings reaching the newspapers and if incorrect reports of such meetings are published, the preachers themselves are the only ones to blame. "Make a friend of the reporter," advised Mr. Smith, "and you will have no regrets."

The time is not far distant, he declared when every theological school will have a course in journalism to equip your ministers with the knowledge necessary to write catchy church advertisements for their local press. It pays to advertise, he said, and the increase in communicants and larger collections bear that truth out in hundreds of American churches. But he warned against ministers "sponging" on the papers. Every clergyman should pay for his publicity, declared Mr. Smith, and the preacher owes it to the public and the members of his congregation to see that the news about his church and about religious advance in general is properly handled.

ANNAPOLIS COUNTY GIRL IN THE UNITED STATES

Miss Alberta I. Young Wedded to Mr. Robert Fraser.

A few days ago at the home of the bride, 169 Adams Street, Waltham, Mass., Miss Alberta I. Young, daughter of Mr. and Mrs. John Young, of Young's Cove, and Robert Fraser, son of Mrs. Annie J. Fraser, of Waltham, Mass., were united in marriage. The ceremony was performed at three o'clock by the Rev. Herbert E. Levey, pastor of the Beth Eden Baptist Church. Rings were exchanged. The bride wore gray crepe de chine with touches of pink and a hat to match, and she carried a bouquet of roses and sweet peas. Her bridesmaid, Miss Marguerite Young, wore pink crepe de chine and carried a bouquet of roses and sweet peas. Wallace E. Fraser, a brother of the groom, attended as best man.

There was a reception to the members of the two families after the ceremony. The house was decorated with cut flowers and potted plants. After a wedding trip covering the Atlantic Trail some time will be spent at their cottage at Nantasket. Mr. and Mrs. Fraser will reside at 189 Adams Street, Waltham, Mass., upon their return. Mr. Fraser is a graduate of the Waltham High School and is now employed in the Hair-spring Department of the Waltham Watch Factory.

SEVEN YEARS OF TORTURE

Headaches and Indigestion Ended By "Fruit-a-lives"

The Marvellous Fruit Medicine Like thousands and thousands of other sufferers, Mr. Albert Varner of Buckingham, P.Q., tried many remedies and went to doctors and specialists; but nothing did him any good.

Finally a friend advised him to try "Fruit-a-lives"—now he is well. As he says in a letter: "For seven years I suffered terribly from Headaches and Indigestion. I had belching gas, bitter stuff would come up in my mouth, often vomiting, and was terribly constipated. I took Fruit-a-lives and this grand fruit medicine made me well!" 50c. a box, 6 for \$2.50, trial size 25c. At dealers or sent by Fruit-a-lives Limited, Ottawa, Ont.

DR. H. B. ATLEE EMINENTLY QUALIFIED FOR CHAIR OF GYNAECOLOGY

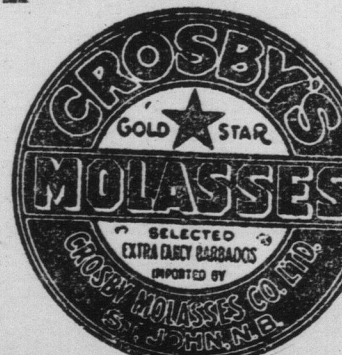

Son of Ex-Mayor A. E. Atlee of Annapolis—Sketch of His Scholastic Career.

Speaking of new work at Dalhousie Medical College, the Halifax Chronicle of Tuesday referred thus to Dr. H. B. Atlee, son of the former Mayor Atlee of Annapolis Royal:— In the first place Dr. H. B. Atlee, who arrived at Halifax by the Pittsburgh from England, will inaugurate a new development in the teaching of Gynaecology. Dr. Atlee was appointed last summer by the Hospital Commission as visiting gynaecologist to the Victoria General Hospital. He has already given four years of post-graduate study to that subject, and has just finished another nine months of intensive study and operating in the London hospitals under the leading gynaecologists and obstetricians of that great medical centre. He has had the wonderful good fortune to obtain two hospital appointments during his stay in London, as House Surgeon to the Chelsea Hospital for Women and Registrar of the Samaritan Hospital for Women. President Mackenzie has received letters from such outstanding leaders of the profession as C. Herbert Roberts, Senior Surgeon to Queen Charlotte's and the Samaritan Hospitals; J. Bright Barrister, Gynaecologist and Surgeon to the Prince of Wales, Queen Charlotte's and the Chelsea Hospitals; Arthur Giles, Waits Eden, etc., stating that Dr. Atlee is fitted in an unusual degree for a young man to operate and take full charge of the gynaecologist department of any hospital.

THE SILENT PARTNER

So much has been heard from the side of capital and the side of labor that another important partner in industry may be entirely ignored. Capital long ago made itself heard and for a long time acted as though it were the only factor in the world's industry and entitled to exercise supreme control. In recent years, however, several rude jolts have been given to that position and the danger of late has been that labor would act in a similar manner and assume that it were supreme and entitled to control. Whilst this struggle has been going on, there is a third partner which has been quite silent and yet can put forward as great claims to recognition as either of the others. That partner is the consumer. What hope could either of the other partners have if this third partner were to withdraw. It is the consumer who makes expansion of business possible. It is he who establishes law and order so necessary for commerce to run into orderly channels. It is the consumer through his government who provides tariffs and protective measures of many kinds which so directly contributed to the welfare of industry. More than anything else it is directly from the consumer that the profits come, over which capital and labor have their disputes. No doubt when a better industrial order has been established the consumer will have more definite representation in industry than now obtains and the price he pays for a product will be just as important an item for consideration as the profit of the capitalist or the wage of a laborer; but that day is not yet. In the meantime, let the silent partner be given some recognition.
