

enough, but, when three of them have had a hand in it in two languages, it is apt to be a fine affair. Even the works on medicine, which endure, are those which possess style. Facts are not enough, and a laboratory is not a good place for the cultivation of the literary quality. That is why so many of the recent books on bacteriology will pass away. This book will not pass away, because, while this artistic quality is absent, it contains a full and plain record of thorough work set forth according to a plan and easily accessible by means of a good index. A thorough test of the book warrants the statement that it contains all that a reasonable person requires to know upon the subject with which it deals. Matters, not yet decided, are discussed in a temperate way, and the authors do not try to prove too much. One who reads all of Mr. Saunders' publications, and they are all worth reading, seizes with joy upon the pictures that have now become so familiar by their continual reproduction. That admirable exercise in perspective, "The Boy filling the Tubes," originally drawn by Kaula, is much missed in the present work.

SANMETTO IN SENILE IMPOTENCE, AND AS A GENERAL REMEDY IN GENITO-URINARY CONDITIONS AND COMPLICATIONS.

Sanmetto has, during the past few years, pleased me very much, particularly in senile cases, where impotence was and had been pronounced for years. As a general remedy in genito urinary conditions and unpleasant complications accompanying these cases, the results are, in the majority of cases, very satisfactory. Chas. E. Bennett, M.D., 1876, Detroit School of Med.; Mem. Am. Med. Assn., Ohio State Med. Soc., late Pres. Fulton Co. (Ohio) Med. Soc., Surg. L. S. & M. S. R. R., Wauseon, Ohio.

SANMETTO IN CYSTITIS AND PROSTATITIS—ALSO IN GRAVEL.

I used a bottle of Sanmetto upon myself. I was suffering with cystitis and prostatitis and received some relief. I think by continuing its use will effect a cure. My age is sixty-five years, not so easily cured as younger persons. We have a man in town by name J. S. K., who had been suffering with gravel for years and had spent much with physicians. He used Sanmetto, and it would be hard to believe the amount of calculi that passed in a few days; in fact it was disintegrated and passed so rapidly that he was forced to stop the medicine for several days. If desired, he will report the case himself. J. Y. DeShong, M. D., Judsonia, Ark.
